

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + Make non-commercial use of the files We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + Maintain attribution The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

GOVERNOR'S MESSAGE.

TO THE LEGISLATURE:

We should be wanting in gratitude did we not thankfully recognize and appreciate the many blessings which have been vouchsafed us during the year just closed. In all that contributes both to the spiritual and material welfare of a people—in all that contributes to their comfort and happiness—our Heavenly Father has blessed us beyond our needs.

In submitting the annual reports of the several State departments and institutions, I congratulate you upon the fact that they show the public affairs of the State to be in a prosperous condition. Our State polity is so wisely adapted to the needs of the people, and so favorable to the growth and prosperity of the commonwealth, as to require but few changes at your hands, and those rather of detail than of system.

By the reports of the Secretary of State and State Treasurer it will be seen that the balance in the State Treasury belonging to the various funds, at the close of the last fiscal year, was \$133,627 11.

The receipts and disbursements of the general fund, during the last fiscal year, were as follows:

RECEIPTS.		
State tax and tax on suits	\$533,151 20	
Railroad companies, taxes	247,296 72	
Insurance companies, taxes and fees	88,950 31	
From plankroads, banks, peddlers, and other sources	17,297 89	
Total		\$ 886,696 12
disbursements.		
Permanent appropriations	\$ 77,826 05	
Legislative expenses—session of 1870	95,838 94	
Penal and charitable institutions	328,908 36	• • • • • • • • •
To complete the State capitol	45,238 90	
Interest on State debt	159 952 28	
Miscellaneous	198,565 05	
Total		\$906,829 58

The above disbursements	are properly	classified by	the Sec-
retary of State, as follows:			

For State institutions. For State capitol completion. For interest on State debt. For special appropriation and other extraordinary expenses	45,238 90 159,952 28
Giving a total of	\$589,949 27
Which deducted from the total disbursements, leaves as the ordinate current expenses of the State the sum of	\$316,380 31
STATE DEBT.	
The amount of the State debt has not been cha	inged during
the year, being for	_
State bonds outstanding	2,183,800 00
	\$2,252,057 00
The resources of the State for 1871 are as follows	ws:
Defined to see the start	\$1,066,823 24
The estimated expenditures are:	
For salaries and permanent appropriations\$146,292 12 Legislative expenses, present session	•••••••
Miscellaneous, printing, publishing laws, gas, fuel, &c	
	\$1,041,746 64
Balance	\$25,076 60

It must be borne in mind that should you appropriate more than the amount of the above balance for extraordinary purposes, the result will be a deficiency in the general fund at the close of the year. It is entirely safe to carry a deficiency of about \$25,000.00, which, with the above balance gives for building purposes or other extraordinary expenditures, should such be determined upon, the sum of \$50,000.00 this year Should you find it necessary to appropriate more than the above sum for such purposes, the excess should be made payable during the year 1872, so that the financial officers may not find themselves embarrassed with a deficiency in the general fund greater than can be provided for.

It is not necessary for me to urge the propriety of the greatest prudence in making appropriations for the ye. Economy has long been the general rule in our State affairs; extravagance and waste the rare exceptions. The State can afford to do anything which is right, and necessary to be done. Provide for doing that, and no more, and the people will not complain.

There was expended from the Governor's contingent fund, \$1,707.61. Balance in the fund, \$492.65. A small appropriation should be made to the fund.

TRUST FUNDS.

The last legislature adopted the system of loaning the trust funds to school districts for the erection of school buildings, enacting a number of laws, each authorizing such loan to a certain district, instead of one general law to govern all loans. from the funds. Such general law should be enacted, giving the commissioners of school and university lands discretion to loan to districts as application is made; the sum to be limited to a small per cent. of the assessed valuation of the taxable property of the district; the terms and time of payment specified, and power to collect principal and interest to be vested in the Secretary of State, with authority to levy and collect a tax whenever such payments are not promptly made. I know of no better way to invest these funds. It is safe, because the loan is made upon perfectly good security, the State reserves the power to compel payment according to contract, and it

enables the people to use their educational funds for educational purposes. It is a great improvement on the original plan of loaning to individuals for purposes of private speculation, too often upon doubtful security. Total productive educational funds, \$3,325,642.24. The increase last year amounted to \$160,061.41.

SCHOOL AND UNIVERSITY LANDS.

The State has now for sale 386,504 acres of school land; 10,440 acres university land, and 105,879 acres agricultural college land. Heretofore these lands have been sold at too low a price per acre. The educational funds have suffered this loss in order to hasten the settlement of the localities in which the lands are situated. This is not right. The State should be as prudent in selling these lands as is the individual proprietor who desires to make the most of them.

They are held as a trust by the State, to be disposed of honestly and judiciously, for the benefit of the educational funds. Whatever excuse there may have been in the past for selling them at a low price, it no longer exists. They are being purchased mainly by speculators, and the actual settlers, when they buy them, will have to pay to the dealer a large profit which the funds ought to realize. The fact that speculators are eager to buy plainly shows that the lands are selling for less than their value. Every dollar that they are worth to the. settler ought to enure to the funds. I therefore recommend that all these lands be immediately withdrawn from market, and that they be carefully appraised before any futher sales are They are now sold at the following prices per acre: made. University land, average \$2.00; school land, average \$1.13; agricultural college land, \$1.25.

The number of acres of land sold by the State during the past fiscal year was 175,410.

WAR CLAIMS.

The total amount of the claims against the United States incidental to raising, equipping, subsisting and transporting troops sent to the field, was	\$1,742,202 98
Of which the United States has paid as follows:	
To holders of quarter master general's certified accounts	\$1,362,811 26
Total amount originally disallowed and suspended Of this amount, there has since been allowed upon explanations and additional evidence furnished, and credited the State, against her quota of the \$20,000,000 direct tax	\$379,391 72 219,742 06
From this apparent balance of	\$159,649 66 23,249 08
Leaving an unsettled balance of	\$136,400 58

Another special settlement is soon to be made upon elucidations recently sent to the Third Auditor's office, which it is confidently expected will result in a further allowance of at least \$60,000, though probably \$80,000.

I am confident that the State authorities will be able to convince the auditing officers that nearly the whole of these claims should be paid. Every effort will be made to do so. The explanations and further proofs have been prepared and furnished by Gen. W. W. Tredway, who was appointed State agent for that purpose. He has discharged the arduous duties devolved upon him with great efficiency, and to the entire satisfaction of the State authorities.

ASSESSMENT OF PROPERTY FOR TAXATION.

Your attention is called to the remarks of the Secretary of State, in his report, regarding the unequal assessment of property for taxation in different portions of the State.

The disparity in the values of the same kind of property is so glaring as to call for some stringent legislation. As an ex

ample, the Secretary pertinently enquires, "Why should horses be valued at \$92 19 in Bayfield, and only \$8 85 in Kewaunee? or \$76 26 in Clark, \$75 58 in Dunn, \$63 14 in Rock and \$65 95 in Walworth, and only \$16 75 in Manitowoc, and \$27 88 in Brown?" He states that there is the same disparity in the values of other classes of taxable property.

The value of the taxable property, as fixed by the State Board of Assessment, is \$455,900,800. The State tax levied last year amounted to \$720,323 24, being 1 58-100 cents on the dollar. One hundred and seventy-five thousand dollars of this sum is to be expended in erecting buildings for State institutions. From the census statistics I learn that the total tax levied in 1869, by counties, cities and towns in this State, was \$4,753,815. This sum is very much less than was actually levied and collected.

BOUNTIES ON WILD ANIMALS.

It is strongly suspected that much fraud is practiced, by obtaining our state bounty for killing wolves, lynxes and wildcats which were not killed in the State. The Secretary of State estimates that at least \$15,000 will be expended this year for such bounties, hence it is worth your while to enquire how it happens that so large a proportion of the claims of this character come from counties bordering on other States.

LIBRARIES.

Large and valuable additions have been made to the library of the State Historical Society, 2,000 volumes of books and 1,300 pamphlets and documents having been received during the past year, making an aggregate of 45,500 books and pamphlets in its possession. The society is constantly increasing its facilities for usefulness, and is resorted to for reference purposes by people from all portions of the State. Its sphere of usefulness would be greatly enlarged if a catalogue of its valuable collections were published.

The State Library contains 8,935 volumes, 528 having been added during the past year.

There are in the State 2,857 libraries, which contain 880,-508 volumes.

CONSTITUTIONAL AMENDMENTS.

The people having, at the last election, adopted the amendment to the State constitution authorizing the abrogation of the grand jury system, appropriate legislation is necessary to give effect to the will of the people.

The last Legislature adopted a joint resolution, proposing an amendment to the constitution prohibiting special legislation on certain subjects. I recommend that you agree to the same. If submitted to the people it will, I doubt not, be adopted by an almost unanimous vote, and when it shall have become a part of our fundamental law, one of the greatest evils of our system of legislation will be removed, and future legislators will be relieved from a vast amount of labor which is not only of no benefit, but a positive injury to the State. The adoption of this amendment will diminish the legislation of the State more than one half.

REVISED STATUTES.

Your attention is called to to the fact that but 145 copies of the revised statutes are now in the hands of the Secretary of State. Heretofore at least 200 copies have been required yearly to meet the demands of the legislature and public officers. A revision or at least a compilation of the statutes cannot in justice to the wants of the people, be longer delayed. Many of the most important of our statutes relating to internal administration, which always should be compactly codified, are scattered through the volumes of session laws published since the last revision. Such a multiplicity of acts has been passed, at the same and different sessions of the legislature, upon the same subject, some of which are indexed and others not, as to compel the Chief Justice of the Supreme Court to

remark in a recent decision, that "an accurate knowledge of our statute law has become almost impossible."

INDUSTRIAL STATISTICS.

The statistics compiled from the census recently taken, and given in the report of the Secretary of State, show a rapid increase in wealth and population. In 1860 the population of the State was 775,881. It is now 1,055,559, a gain of 36 per cent. The increase of manufactures has more than kept pace with the increase of population, as shown by the following statement:

	1860.	1870.	Increase.	Inc. per ct.
No. of establishments No. of hands employed Value of products	15,414	7,136 39,055 \$85,624,966	4,072 23,641 \$57,775,499	1 32 1 53 2 07

The number of acres of improved lands, which in 1859 was 3,746,167, has increased to 5,795,538, nearly 55 per cent.

In 1859, 15,637,458 bushels of wheat were produced. The yield of 1869 was 25,323,647 bushels, a gain of nearly 62 per cent. The other grains grown in 1859 amounted to 20,323,647 bushels, in 1869, to 37,739,067 bushels.

The present indications point to a more rapid growth in the immediate future than in the several years past. The increasing demand for public lands, the projecting of numerous railways through portions of the State now comparatively thinly settled, the constantly increasing volume of immigration, the tide of manufacturing capital now flowing westward and seeking investment in favorable localities, all give promise that the decade upon which we have entered will be marked by an activity and prosperity beyond all our past experience.

The State and County Agricultural, and the State Horticultural Societies, continue to be actively useful as aids to our industrial prosperity, in disseminating practical knowledge among

the people. They are worthy of such encouragement and sup port as the State can properly give.

GEOLOGICAL SURVEY.

Under the provisions of chapter 137, general laws of 1870, I appointed John Murrish, Esq., to survey the lead district, make maps, and collect specimens illustrating the same. He has, I believe, faithfully discharged the duty, and his detailed report is herewith submitted for your information. I call your special attention to the necessity for such reasonable encouragment as you can properly give to stimulate our mining interests.

I have heretofore recommended that provision be made for a thorough geological survey of the whole State. Time strengthens my conviction that it is unwise enconomy to withhold the little that is necessary to thoroughly explore our vast natural resources, and give to the world a full, scientific account of their nature and extent. Such an advertisement of our hidden wealth cannot fail to bring to the State millions of capital for investment, and, by the creation of new industries, to open up on every hand other avenues to prosperity.

REFORM SCHOOL

There is no school in the State doing more good than the Reform School at Waukesha. It is admirably managed in every respect. I regard it as among the most important of our institutions, and believe that it should be afforded every facility for the proper care and education of all who may be committed to its charge. The trustees report that another family building is necessary, the cost of which will be \$16,000. They now have an opportunity to purchase a tract of land adjacent to the premises which is much needed, and as the opportunity will not occur again to purchase the same on favorable terms, an appropriation of \$4,000 should be made for the purpose. Whole number of pupils in attendance during the past year, 293; number October 1, 1870, 206; amount ex-

pended for the support of the school during the past year \$32, 103,04. The new building for work shops has been erected in a substantial manner at a cost of about \$17,000.00; the appropriation being only \$12,000.00. The current expenses of 1871 are estimated at \$32,000.00—to pay deficiency for 1870, \$6,228. The last legislature having by law prohibited the commitment of girls to this school, the question now arises for your consideration, what shall be done with that class of girls who ought to have the benefit of the restraining influences of such an institution? Can we afford to neglect them, and allow them to grow up to be a curse to themselves and society? not the State to make every effort to save them from becoming vagabonds, and lead them to lives of usefulness? It is not what these children are now which we have cause to fear, but what they are certain to become if not properly protected. I commend this subject to your earnest attention, as one of the most important you will have before you for consideration.

STATE PRISON.

On the second of May last the workshops of the State Prison were destroyed by fire. Immediately after the disaster the commissioner commenced making arrangements to rebuild. The sum of money appropriated by the last Legislature was not sufficient to defray the expense. To call the Legislature together in extra session would have involved a large expenditure of money, and unnecessarily subjected the members to great inconvenience; therefore, in view of the fact that six banks in the State generously offered to advance to the Commissioner \$30,000, and that a large portion of the machinery and material for rebuilding was offered upon credit and favorable terms, it was wisely determined by Lieutenant-Governor Pound, who at that time was acting Governor, not to call an extra session. The banks referred to are the National Exchange Bank, of Milwaukee; The Milwaukee National Bank of Wisconsin, The Wisconsin Marine and Fire Insurance Co. Bank, The State Bank of Madison, The First National Bank of Madison, and the Bank of Madison. Each have honored the draft of the Commissioner for \$5,000. The new building is well constructed, substantial and practically fire-proof. The machinery is of the most approved kind, and the whole establishment has been so arranged as to be one of the most convenient and economical chair factories in the country. It is believed that the same number of men can turn out nearly double the number of chairs that could be made with the conveniences and machinery of the shop destroyed. If that proves to be true, the fire will have been an advantage instead of a disaster, The total loss by the fire was about \$70,000. The Commissioner asks an appropriation of \$33,000 for current expense account, and for payment of debt and purchase of stock, \$55,000. I believe this will be the last large appropriation which will ever be required for that institution. If nothing unforeseen occurs it will be nearly, if not quite, selfsupporting. Its affairs are ably administered by Commissioner Wheeler, and his report is very complete in all its details. On the first of this month there were 217 convicts in this prison.

CHARITABLE INSTITUTIONS.

From the reports of the various boards of trustees having charge of the State charitable institutions, and from a personal inspection of each of them, I feel warranted in asserting that they are all in excellent condition; that the officers are laboring faithfully and efficiently for the good of those whose care devolves upon them, and that the results attained compare more than favorably with those of other like institutions throughout the Union.

One hundred and forty-four pupils received instruction at the Institute for the Education of the Deaf and Dumb during the past year. One hundred and twenty-two were present at the close of the year, being twenty-four more than ever before at one time. Total expenditures, including all repairs and improvements, \$28,834 93. Estimated expenditures for 1871,

including extensive repairs and permanent improvements, \$38,864 00.

The disbursements for the support of the Institute for the Education of the Blind amounted to \$19,722 40. For the completion of the new building, \$22,158 45. The total cost of the whole structure has been about \$155,655 00. It is in every respect suitable for the purposes for which it was erected, and will probably afford ample room for the accommodation of the school for the next twenty years. Sixty four pupils received instruction during the past year. Estimated expenditures for current expenses this year, \$18,000 00, and for payment of indebtedness, lighting apparatus, school apparatus and steam pump an appropriation of \$6,973 50 is asked for. Both of these schools give excellent instruction.

The Soldiers' Orphans' Home school has fully maintained its creditable standard during the year. The children have been well cared for in all respects. Those in charge have endeavored to give them a home in fact, as well as in name, and have succeeded admirably. Nor is this home given to them as a charity, but as a portion of the great debt due them from the people. The children are making the most of their opportunities, and will bring no discredit upon the State when they shall have gone forth into the world to care for them selves. Whole number of pupils in attendance during the year, 331. Amount expended for their support, \$41,877 40. Current expenses for 1871 are estimated at \$40,000 00.

Six pupils from the Home are attending the State Normal School at Whitewater, fitting themselves to become teachers. I recommend that a larger number be allowed this privilege.

The trustees of the Hospital for the Insane, report the institution not only out of debt at the close of the last fiscal year, but with funds on hand sufficient to defray all expenses of the first quarter of the present. Valuable improvements have been made, additional farm lands have been purchased and the whole property is in excellent condition. The only

objection to the site is about to be removed by the establishment of a station within half a mile of the building, on the Baraboo and Madison railroad. The farm gave a clear profit of \$5,285.74 during the last year. Whole number of patients treated during the year 532. Average number 360. Current expenses for the year \$80,518.37. Expended for permanent improvements \$7,344.94. Since the Hospital was first established there has been expended by the State for land, buildings, and permanent improvements, \$432,310.05. There has been expended for the treatment and support of the insane inmates, including ordinary repairs of buildings and furniture, \$145,123.74. The current expenses for this year are estimated at \$75,000.00, and \$17,200.00 are reported to be required for additional improvements and clothing for poor inmates.

Pursuant to the act passed by the last legislature I appointed Wyman Spooner, H. H. Giles, E. W. Young, H. N. Smith, Parlan Semple and J. T. Kingston, commissioners to act with Dr. A. S. McDill, superintendent of the hospital at Madison, in selecting a site for an additional institution for the insane. An eligible location was made in the town of Oshkosh, on the banks of Lake Winnebago, where a tract of land, containing three hundred and thirty-seven 66-100 acres was purchased by the commissioners for \$10,000. This sum has been paid, and the land duly conveyed to the State. Immediately after the location was completed, I appointed E. M. Danforth, A. M. Skeels and D. W. Maxon, building commissioners. They have adopted plans and advertised for proposals to erect such portion of the building as the present law provides for.

The necessity for more accommodations for the insane becomes every day more apparent, and it is the duty of the State to provide without delay for the proper care of at least five hundred of these unfortunates who are now penned up in our jails, poor-houses and private dwellings. The additional hospital should be completed as soon as possible. When this is

done, and the present hospital enlarged to the size originally contemplated, by the addition of two wings, we shall have hardly sufficient room to receive all who require hospital treatment. I know that I am recommending the immediate expenditure of much money, but, gentlemen, I cannot forget that there are hundreds of insane persons suffering for want of these hospitals. No one can visit our jails, poor-houses, or dwelling houses, where insane persons are confined, and see how much their misery is aggravated by the want of proper care, without being convinced that the State ought to act promptly and liberally in this matter. The insane can be properly treated only in institutions designed for that purpose. These cannot be provided by counties or cities. Justice and economy alike dictate that the State should establish and maintain them, and humanity protests against delay in so doing.

I have heretofore recommended the founding of a state school for the education of feeble-minded children. The experience of other states where they are in operation has shown that such schools are nearly, if not quite, as beneficial in their results as those established for the education of the deaf and dumb, or the blind. The education of this class of unfortunates, the highest possible development of their feeble faculties, is due them from the state. Nor should it be regarded as a charity, to be grudgingly bestowed, but a duty, to be cheerfully performed. In changing their lives from a curse to a blessing; in reclaiming them from a life of abject wretchedness; in saving them from sinking, with advancing years into hopeless idiocy, society will reap the highest reward for the performance of a sacred duty. I bespeak for these children your earnest, practical sympathy. In a few years the property in Madison now occupied for the Orphans' Home will be available for the accommodation of this school. If it shall be established immediately, only temporary arrangements will be required.

Senators M. H. Pettit, E. S. Miner and S. D. Burchard, and

Assemblymen Matthew Keenan, Willard Merrill, G. C. Swayne, G. T. Thorn, W. P. Rounds and H. A. Chase were appointed members of the visiting committee of the state. They have made a very thorough examination of the affairs of the state penal and charitable institutions, and visited the charitable institutions of the city of Milwaukee. Their report will be laid before you at an early day.

I again submit for your consideration the policy of reducing the number of each board of trustees having charge of our benevolent institutions to five, and that there be established a State Board of Charities, which shall have the general oversight of them all, and over the Reform School, and the county jails and poor-houses, with full authority to enter and examine into their general management, at all times, and to be required to report to the State annually. I am fully convinced that such a board will be of very great practical benefit to the State, and of much assistance to the trustees having immediate control of the institutions. Such has been the experience of every state which has organized such a body. This change will tend to secure the greatest possible economy, uniformity and progress in the management of the interests thus placed under supervision.

EDUCATIONAL.

It is a source of real pleasure that I am able to say to you that our system of education continues to meet with the hearty approval of the great mass of the people. The common schools have been well sustained during the past year, and are steadily drawing nearer that state of perfection which it should be our aim to have them attain. For this we are indebted, in a great measure, to the teachers. They manifest a zeal in their labors, an appreciation of the responsibilities of their high calling, and an emulation to excel, that merits the warmest commendation. The district and graded schools should be the best in the State, and I hope to see them reach this point of excellence at no distant day. The State author-

ities, by judicious encouragement, can do much to hasten this consummation.

Notwithstanding the satisfaction we may feel in view of the success of our common schools, the fact that over fifty thousand children do not attend school in the State stands forth a warning to the people that fifty thousand children are growing up in their midst to be men and women who are not fitting themselves to become intelligent, useful citizens. of them will, in consequence of their ignorance, be vagabonds, fitted only for prisons, brothels, and poor-houses. Firmly believing that this source of future danger to the State should be removed, and that no parent has a right to thus rear a child, I renew the recommendation presented in the last annual message, for the enactment of such a law as will compel each child in the State of proper age, under ordinary circumstances, to attend school a given number of months each year, for a reasonable number of years.

From the report of the Superintendent of Public Instruction, I learn that the—

Number of children over four and under twenty years of age is	
Number that attended school during the past year	264,525
Number of school districts in the State	4,802
Number of teachers required to teach the schools	5,661
Amount expended for public educational purposes	

There was apportioned, during the year, to the school districts from the school fund income \$159,271.38.

The State normal schools at Whitewater and Platteville have thus far fully satisfied the expectations of the people. They are doing the work for which they were established in such manner as to reflect great credit upon the gentlemen having them in charge. The school building at Oshkosh has been completed, and is a structure of which the State may be proud. It has cost \$44,271.45. The Regents will put this school in operation this year, as soon as the income of the normal school fund shall be sufficient to pay the annual expense thereof. It will be several years before the income of the fund will sup-

port the fourth school; hence it is not probable that another school building will be erected at a very early day.

Total productive normal school fund	8671,802	49
Increase of productive fund during the past year	32,860	50
Receipts of the normal school fund income during the past year	52,121	91
Balance in the income fund September 30, 1870	17,588	09

There are now held by the State for sale 899,150 acres of land belonging to the normal school fund.

It is gratifying to learn from the Regents' report that another year of continued success and substantial progress has rewarded the labors of those in charge of the State University. The average attendance has materially increased, although somewhat hindered here, as in other institutions, by the stringency of the times. The standard of education is constantly rising higher, and in the direction of scientific studies. The faculty are efficient in the discharge of their duties, and zealous to increase the usefulness of the University and extend its beneficent influences. The withdrawal of President Chadbourne from the University is a source of deep regret to those who know him and appreciate his eminent fitness for the high position he so ably filled. But the friends of the University may congratulate themselves that its control has devolved upon one in every way so worthy and qualified to assume the responsibility as the Vice President, Professor Sterling, who commands in a high degree the confidence of all.

The chair of Geology, Mining and Metallurgy has been created during the present year. The Law Department is unusually prosperous and affords facilities for the study of law second to none in the west. The Female College building is in process of erection and will be ready for occupancy this year. The Regents assure us they shall do all in their power to provide for ladies the same facilities for college education that are enjoyed by gentlement. This policy, wise because just, should never be departed from. The building for military drill and gymnastic exercises has been completed, and is well adapted to the purposes for which it was designed.

To ensure continued and increasing prosperity to the University, it is only necessary that the State continues to take a friendly interest in its welfare, giving to those in charge such cheer and encouragement as devotion to a high and laborious trust always deserves. It has already taken a place among the best colleges in the country. Now their equal in merit, I predict that in a few years it will be their equal in prestige and attendance.

Number of acres of University lands remaining unsold	10,4	140
Number of acres of Agricultural College lands remaining unsold	105,8	379

In the death of Alexander J. Craig, late Superintendent of Public Instruction, who died July 3, 1870, the State has sustained a great loss. Ardently devoted to the improvement of our educational system he labored to that end with a zeal beyond his strength to the last day of his life. The results of his works testify to the energy and ability with which his arduous duties were performed.

IMMIGRATION.

The State Board of Immigration has continued its labors during the past year. Twenty-four thousand pamphlets have been issued, in various languages, for distribution. Agents have been employed at Milwaukee and Chicago to give information regarding our State to such as desire it, and to afford to all immigrants passing through such assistance as they could. The agents report that 17,364 immigrants, arriving at those cities, have located within the State during the year. Besides these, a large number have come into the State by other routes. There was expended by the Board during 1870, \$1,043 83. All that was possible with that sum has, I believe, been accomplished, and the results are such as to warrant greater efforts in the same direction. I am convinced that more can

be accomplished by giving the whole charge of this interest to one person, who will devote his entire time to it. The expense need not greatly exceed the present expenditures, while the results will be vastly greater. I therefore recommend that the office of Commissioner of Immigration be established.

My attention having been frequently called to the fact that immigrants, in many cases, were subject to abuse, extortion, neglect and fraud while on their passage to, and upon their arrival at eastern ports, I joined with the Executives of several of the Western and Northwestern States in calling a National Immigration Convention, which was held at Irdianapolis, Indiana, on the 23d day of last November. It was composed of prominent gentlemen from almost every portion of the Union, twenty-two States and two territories being represented, and all the questions relating to the welfare of the immigrant were fully considered and discussed by men who have given the subject much earnest attention. I herewith submit for your consideration an official report of the resolutions adopted. In the conclusions therein expressed, favoring the establishment of a Federal Bureau of Immigration, to be entrusted with the sole charge of protecting from fraud and abuse, while in transit to their destination, those who come from Europe to find homes in this country, I fully concur. It is manifestly for the interest of the whole country, and more especially the West, that every hindrance to immigration be removed. The fear of being subjected to wrongs and annoyances while traveling through a strange land, is, I am assured, potent to deter many thousands of people of the old world from seek among us. By removing all grounds for such fear, by assuring the immigrant that he will be protected and his reasonable comfort secured in every stage of his tedious journey, we shall largely swell the volume of immigration now pouring upon I know of no better way to convey this assurance, our shores. and make sure such protection, and correct the evils which now exist, than to carry into effect the plan proposed by the convention

INDIANS.

The northwestern part of this State is infested by roving bands of Indians, who ought to be removed and placed upon reservations. It is decidely best for both races that this should be done at an early day, as they are a constant annoyance to the white settlers. An appropriation was made by the present Congress to defray the expense of such removal, but no steps have been taken therefor. The attention of Congress should again be called to the subject.

FOX AND WISCONSIN RIVER IMPROVEMENT.

We have now a reasonable certainty that the improvement of the Fox and Wisconsin rivers, so as to give to the people a great national water highway between the lakes and the Mississippi river, will be undertaken by the general government. of Congress, passed at the last session, provides for ascertaining by arbitration the sum which ought in justice to be paid to the Green Bay and Mississippi Canal Company for its property, rights and franchises, and authorizes the Secretary of War to adopt for the improvement of the navigation of the Wisconsin river such plan as may be recommended by the chief of the Bureau of Engineers. The act also requires that the canal company shall file with the Secretary of War an agreement, in writing, whereby it shall agree to grant and convey to the United States its property and franchises upon the terms awarded by the arbitrators, and provides that no money shall be expended on the improvement of these rivers until such agreement shall be filed. On the 25th day of October last I was verbally notified by the vice-president of the canal company that such an agreement had been forwarded to Washington. By letter received November 17th last, I was informed by the Secretary of War that he had appointed William Larrabee, of Clermont, Iowa, arbitrator on the part of the government. On the 23d day of the same month I received a communication from the secretary, conveying the information that

the agreement filed by the company was, upon further examination, found to be unsatisfactory to the war department; that it had been returned, and the appointment of Mr. Larrabee recalled. Thus the matter stood until the 3d day of this month, when I received the following letter from the president of the company:

"NEW YORK, Dec. 29, 1870.

"SIR: This company will file an unconditional agreement under the late act of Congress relating to the Fox and Wisconsin rivers.

"The agreement which was filed in the office of the Secretary of War on the 27th October 1870, was, on the 19th November, 1870, returned as being conditional and consequently not satisfactory to the Department.

"Very respectfully yours,
"SAMUEL MARSH, President"

I had hoped to be able to communicate the fact that a satisfactory agreement had been received by the War Department. I do not doubt that it has been, as on the 9th inst., I received the following telegram from the President of the company: "Have mailed to Secretary of War unconditional agreement duly executed."

An appropriation of \$100,000 was made by Congress at the last session, for the improvement of the Wisconsin river, but no portion of it has been expended because of the delay in filing the agreement referred to. With the requirements of the law satisfied in that regard, it is hoped that another and larger appropriation will be granted by Congress, and that the work on the river will be vigorously prosecuted during the coming spring.

Regarding the improvement of the these rivers among the most important national works contemplated, I shall in the future as in the past, devote all the time and labor necessary to its furtherence, and it will be a source of life long satisfaction to

me if I can, even in a small degree, be instrumental in hastening it to completion.

RAILROADS.

The lines now constructing and those projected, with prospect of early completion, will-soon afford to the larger portion of the State ample railroad facilities. The roads from Madison to Portage, and from Eagle to Elkhorn, have been completed during the year. Work on the Baraboo Air Line from Madison northwesterly, is being pushed energetically forward. The Green Bay and Lake Pepin road is in process of construction from Green Bay to New London. The West Wisconsin road has 115 miles completed, and will undoubtedly be finished to the city of Hudson early the coming summer. The Milwaukee and Northern Railroad is open to Cedarburg, and another section will be completed during the present year. The Portage, Winnebago and Lake Superior Land Grant road is in the possession of men of energy and business capacity, and, I am informed, will be commenced immediately and built as rapidly as possible. The road from Oshkosh to Ripon will in all probability be constructed this year. Work on the Northern Pacific has begun in earnest. This enterprise is one of vast importance to the whole country, and of much prospective benefit to Wisconsin.

The land grants made by Congress in 1856 and 1864 to aid in the construction of a railroad from Lake St. Croix to Superior and Bayfield, expired by the terms thereof, in May, 1869. The failure of Congress to renew these grants has caused great disappointment to thousands of settlers in the northwestern portion of the State. If Congress finally refuses such renewal, great injustice will thereby be done to these settlers, and to Wisconsin. Thousands of people, years ago, settled along the lines of these contemplated roads upon the faith of these grants. They have purchased several hundred thousand acres of the reserved land, paying the government double price therefor in consideration of the grant, thus reim-

bursing the government for a large portion of the granted lands. To snatch from them the benefits of a grant for which they have paid the government, because of delays for which they are in no wise responsible; to withhold these grants just at the time when their renewal will ensure the speedy building of the roads, will be an act of injustice and impolicy which I do not believe Congress will commit. Deeming these roads of the utmost importance to Wisconsin, and that the renewal of the grants was due to our people, I have felt it to be my duty to use every proper effort to secure the assent of Congress thereto; and I shall not relax my efforts to aid in the development of that portion of the State most interested in this enterprise, nor in giving every possible encouragement to all other schemes of internal improvement which will add to the prospersity and resources of the commonwealth.

These railroad lands have been for nearly two years under the charge of the State for protection against trespassers. Gen. Samuel Harriman has, during that time, been the agent of the State to discharge this duty. He has caused to be collected for stumpage by R. D. Pike, agent of the Bayfield land office, \$15,725; by the United States marshal, \$7,885, and has collected himself and paid into the State treasury \$14,176.13. Total amount collected, \$67,786.13. The sum paid into the state treasury, less expenses incurred, will be held by the State in trust for the parties who may construct the contemplated roads. The agent is confident that he shall succeed in preventing further depredations.

POSTAL TELEGRAPH.

The Legislature, at its last session requested the Senators and Members in Congress from Wisconsin to use their most efficient efforts to procure at an early day, the passage of a law making provision for connecting with, and adding to, the present post office facilities, a complete system of telegraphy, so as to bring within the reach of the great mass of the people

this most desirable means of communication. I call attention to this subject in the belief that you will, after full consideration, reiterate the request of your predecessors.

SOLDIERS' CEMETERIES.

I herewith submit a communication from the Secretary of War, asking the consent of the State to the purchase, by the United States, of the Soldiers' Cemetery at Madison. burial places of our patriot dead are sacred to the people of this country, and will so remain until the last spark of patriotism shall have died. Nor will the people consent that the remains of those who died in the defense of the Union shall ever be disturbed to suit the convenience of those who sought with bloody hands to destroy our free institutions. No insult could have been offered to the loyal people of the country more cruel than was embodied in the resolutions of a United States Senator, recently offered with a view to the removal of the remains of the soldiers now buried on Arlington Heights, near Washington. The United States Senate has the hearty thanks of all who love the cause for which those soldiers died, but more especially, of the surviving comrades of those who sleep in these consecrated graves, for its indignant refusal to receive and consider such an infamous resolution.

NATIONAL.

The peace and prosperity which reigns throughout the United States, the vigor and honesty displayed in the management of the national finances, the steady reduction of the national debt on the one hand, and of the taxes on the other, all testify to the wisdom and efficiency of the present Federal administration. That the same general policy, so salutary in its results, and so generally approved by the people, will be pursued in the future we have the assurance of the President, and another year will find us with our financial affairs in still better condition, and our credit in the money markets of the world equal to that of any other nation.

While our peace is so profound, and its prospects of continuance so fair, while the fiscal system of the government is so satisfactory, it is a fitting time to scrutinize our governmental machinery in every part, to eradicate every abuse, and remove therefrom every element of weakness. A large portion of the people have come to realize the great and wide spreading evils which flow from our present civil service system, and there is a general desire among men of every shade of political belief for a radical reform therein. change is desired as will remove the patronage of the government from the partizan contests of the people, as will permit subordinate appointments in the civil service only for demonstrated fitness, and make the tenure of office to depend upon zeal and fidelity in the service of the government rather than party or individuals; such change as will relieve the President, cabinet officers, senators and members of Congress from the constant drudgery of distributing this patronage—leaving them untramelled to consider only those matters which concern the statesman. I share in this desire, because I recognize in our present manner of dispensing Federal patronage the most demoralizing element in our political system. These evils have grown to their present magnitude gradually, through many years. No party nor class of men are responsible for them, but our generation will justly be held responsible for their continuance if fully aware of the evil, and realizing the danger, we do not improve our opportunity to make the reform which the safety of the nation demands. Fully assured that the people of this State are in accord with these sentiments, I recommend that you present a memorial to Congress asking for the enactment of such laws as will effect the desired change.

CONCLUSION.

I have thus given you a brief statement of the condition of the State. To your care her interests are now committed. The office of a legislator is one of the greatest responsibility. The powers conferred upon you are the highest which can be exercised under our constitution. The other departments of the government are mainly but ministers of your will; they but walk in the paths your wisdom marks out for them. Upon your action depends, in a great degree, the public welfare. Your duties are arduous, and their results far-reaching. I share with your constituents the desire that your session may be harmonious, and that discarding all matters of merely private and local interest, your deliberations shall be directed to measures of general concern, tending to advance the honor of Wisconsin and the prosperity of her people.

LUCIUS FAIRCHILD.

EXECUTIVE CHAMBER, January 12, 1871.

DOCUMENTS ACCOMPANYING

GOVERNOR'S MESSAGE.

The following are the documents referred to in the governor's message:

IMMIGRATION CONVENTION.

Indianapolis, December 9, 1870.

Governor—I have the honor to transmit to you, and through you to the honorable the senate and house of representatives of Wisconsin, certified copies of the preamble and resolutions, adopted by the "National Immigration Convention" assembled at Indian-

apolis on the 23d of November last.

I am directed by the executive committee of that convention to ask your most careful consideration of the spirit and intent of these resolutions, with the hope that the unqualified sanction of the people of Wisconsin may be accorded, and in such manner as shall secure the earnest co-operation of her senators and representatives in securing the enactment of such laws as will afford to the immigrant, while in transitu, the National Protection he is justly entitled to receive.

I am, sir, your obedient servant,

JOHN S. LOOMIS,

Sec'y National Immigration Convention.

To His Excellency,
LUCIUS FAIRCHILD,
Governor of Wisconsin.

NATIONAL IMMIGRATION CONVENTION.

ROOMS OF THE EXECUTIVE COMMITTEE,

CHICAGO, ILL., Dec. 10, 1870.

The "National Immigration Convention," called by the Governors of the northwestern and western States, met at Indianapolis, Indiana, on the 28d day of November last. There were twenty-two

21-Gov. Muss.

States and two Territories, fully and ably represented at the Convention.

The following preamble and resolutions were adopted by the Convention:

REPORT OF THE COMMITTEE ON RESOLUTIONS.

The committee on resolutions respectfully submit the following report, as substantially embracing the predominant sentiment of the members of the "Emmigration Convention," as contained in the resolution feferred to us for consideration.

It must be manifest to all who have heard the deliberations and discussions of the convention, that justice, patriotism and philanthropy demand the immediate interposition of enlightened public sentiment and law for the protection of the rights and interests of the people of other lands, who are annually leaving their native countries and coming to our great national home of freedom. That great and grievous wrongs have been perpetrated, cannot be doubted; and it is equally clear that full and efficient remedies for

existing evils ought to be supplied.

The important question to be solved is: What source or department of power can afford an adequate remedy? It is believed to be the judgment of this Convention, as indicated by the resolutions introduced and referred to the committee, that upon our National Government is devolved the duty and responsibility of controlling jointly with other governments the embarkation and transit of emigrants, and co-operatively with auxiliary institutions in controlling the debarkation and protection of the emigrants, in obtaining a permanent home in the place of their choice in the land of their adoption.

This is eminently a question of national importance, as upon the proper protection, care and culture of this class of population largely depend not only on their progress and prosperity, but also the fullest development of the resources of our country, and the permanency and perpetuity of our Republican principles and institutions. The committee therefore present the following resolutions as containing briefly but substantially, the views of this convention:

1. Resolved, That additional legislation and a more rigid enforcement of existing laws on the subject of immigration are necessary to prevent actual abuses and frauds, and protect the true interests of the emigrant on his arrival and while in transit to his destination in this country, and that for the accomplishment of this purpose, in the opinion of this convention, appropriate legislation is imperatively demanded of the Federal government.

Resolved, That the President of the United States be respectfully requested to open negotiations with countries from which persons emigrate to this country, so as to secure a joint jurisdiction on emigrant ships for the protection of emigrants against abuse and fraud, and that a copy of this resolution be transmitted to the

President of the United States, and to the congress of the United States.

2. Resolved, That this Convention unqualifiedly condemns all schemes, combinations and monopolies oppressive to emigrants, by which they are deprived of the proper and usual facilities for cheap and safe transportation, and by which various impositions are practiced upon their indigent and dependent condition.

4. Resolved, That in the opinion of this Convention, a "Bureau of Lamigration" thould be established under the auspices of the

Federal Government.

5. Resolved, That a committee of one from each State and Territory represented in this convention, be appointed to memorialise Congress for such legislation as will most fully accomplish the views expressed in the foregoing resolutions.

6. Résolved, That all capitation taxes collected from emigrants, whether imposed directly or indirectly, with or without color of law, are odious and unjust, and ought to be abolished.

(Signed,)

SAM'L. GALLOWAY, of Ohio.
ALLEN C. FULLER, of Illinois.
J. H. NOTEWARE, of Nebrasks.
A. T. SHAW. of Tenuesse.
CHAS. W. MURTFELDT, of Missouri.
JAMES M. HARVEY, of Kausas.
EDWARD M. McCOOK. of Colorado.

Official.

John L. Loomis, Secretary.

WAR DEPARTMENT, WASHINGTON, D. C., August 10th, 1870.

To the Governor of the State of Wisconsin, Madison, Wis.:

SIR: In compliance with section 2 of the act entitled "An act to amend an act entitled an act to establish and to pretect national cemeteries," approved July 1st, 1870, requiring me to do so, I have the honor to enclose a copy of the act referred to, with the request that you make application to the legislature of your State for its consent to the purchase by the United States of the national soldiers' cemetery at Madison, (Forest Hill,) Wis.

I am, Governor,

Very respectfully, your obedient servant,

WM. W. BELKNAP, Secretary of War.

[PUBLIO-No. 131.]

AN ACT to amend an act entitled "An act to establish and protect national cemeteries."

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from the time any state legislature shall have given, or shall hereafter give, the consent of such state to the purchase by the United States of any national cemetery mentioned in the act entitled "An act to establish and protect national cemeteries," approved February twen ty-second, eighteen hundred and sixty-seven, the jurisdiction and power of legislation of the United State over such cemetery shall in all courts and places be held to be the same as is granted by section eight, article one, of the constitution of the United States; and all the provisions of said act of February twenty-second, eighteen hundred and sixty-seven, shall be applicable to the same.

Sec. 2. And be it further enacted, That it shall be the duty of the Secretary of War to cause copies of this present act to be sent to the governors of all such states wherein any of such national cemeterics may be situated, to the end that the legislatures

of such states may give the consent herein mentioned.

Approved, July 1, 1870.

ANNUAL REPORT

OF THE

SECRETARY OF STATE

OF THE

STATE OF WISCONSIN,

For the Fiscal Year ending September 30, 1870.

Office of the Secretary of State,

Madison, Wis., October 10, 1870.

To his Expellency, Lucius Fairchild,

Governor of the State of Wisconsin:

Siz:—As required by law, I have the honor to submit a statement of the several funds, revenues and expenditures of the State for the fiscal year ending on the 30th day of September, 1870, together with such abstracts, tables and matters of general interest, as pertain to the office of Secretary of State.

The balance in the treasury belonging to the several funds on the 30th day of September, 1869, was \$155,935.40.

The balance in the treasury belonging to the several funds, on the 30th day of September, 1870, was \$138,627.11.

The receipts into and disbursements from the treasury, including balances from the General Fund, Trust Funds and other Funds specified, during the past year, were as follows:

Mar. 22, 1866	Mar. 22, 1966	Mar. 22, 1866	Mar. 22, 1866		

From the foregoing statement, it appears that the outstanding debt of the State, on the 80th day of September, 1870, was as follows:

State Bonds. Certificates of Indebtedness. Currency Certificates.	2,183,800 0	()
Total .	\$9 0K9 0K7 0	ν -

Of the outstanding Bonds of the State, the amount of \$36,600 has been redeemed during the last year, and Certificates of Indebt-edness for the same amount have been issued to the several trust funds, as required by law.

The balance of the bended indebtedness of the State would have been liquidated in like manner, if the bonds could have been purchased; but as they are not yet due, parties holding them are not disposed to sell.

SCHOOL FUND.

The School Fund is composed of:

- 1. Proceeds of lands granted by the United States for support of schools.
- 2. All moneys accruing from forfeiture or escheat and trespass penalties on school land.
- 8. All fines collected in the several counties for breach of the penal laws.
- 4. All moneys paid as an exemption from military duty; and
- 5. Five per cent. on sale of government lands.

Receipts.

Sales of lands. Dues on certificates. Loans—payments on mcrtgages. Peralties and forfeitures. Taxes. Fines. Transfers from other funds.	\$22,675 77 23,680 12 4,576 50 842 46 186 52 962 01 775 15

# UNIVESITY FUND INCOME.

# Receipts.

According to chapter 80, general laws of 1870, the entire income of this, and of the Agricultural College Fund, is placed at the disposal of the Board of Regents, by transfer to the Treasurer of the University, to be distinct and independent of the accounts of the State, leaving this office no further record of its disburements.

The above amount of \$24,146 07, and the amount of \$15,530 32, the income of the Agricultural College Fund, paid to the Treasurer of the University, were transferred under the provisions of this law.

## AGRICULTURAL COLLEGE FUND.

This fund consists of the proceeds of the sales of 240,000 acres of lands granted by Congress to the State for the support of an institution of learning, where shall be taught the principles of agriculture and the arts. The interest on the productive fund forms the income.

#### STATEMENT

Showing the names of the clerks employed in the office of the Secretary of State, for the year ending September 30, 1870, with the amount paid each, and the particular service rendered by each.

## Clerks in the office of Secretary of State.

Levi Alden, printing clerk	\$1,575	00
D. H. Tullis, bookkeeper	1,775	
C. C. Dow, bookkeeper, trust funds	866	
James M. Bull, bookkeeper, trust funds	400	00
W. H. Williams, insurance clerk	1,175	00
N. T. Martin, insurance clerk	252	
James Bennett, proof reading	974	88
G. H. Brock, recording marriages	850	00
John T. Jones, recording marriages	900	00
Robert Monteith, recording clerk	1,300	00
Charles F. Legate, platting	1,112	00
J. F. Hauser, recording marriages	003	00
Roger C. Spooser, temporary	182	00
W. K. Barney, proof reading, temporary	12	00
Mrs. M E. Judkins, copying, temporary	67	50
Miss Mary E. Jones, copying, temporary	43	50
Miss Kate Tullis, copying, temporary	64	68
Total	B11,299	28

Of the above number, eight are permanently employed in the office. Of the others, four were employed by my predecessor last year; and five temporarily on extra work.

#### STATE OF WISCONSIN—Dane County—88.

Ll. Breese, being duly sworn, says that the foregoing list contains the names of all the clerks employed in the office of the Secretary of State, during the year ending September 20, 1870, as he verily believes; that the amount was actually paid to each clerk as stated, and that the same was necessarily expended to enable him to properly discharge the duties of the office of Secretary of State.

LL. BREESE,

Secretary of State.

Sworn to and subscribed before me this 10th day of October, 1870.

T. W. GIBBS, Notary Public, Dane Co., Wis.

#### STATE TAX.

The state tax for the year 1870 has been levied and apportioned among the several counties. This apportionment was based on the valuation fixed by the last State Board of Assessment, the rate per centum being 1 58-100 mills on the dollar of such valuation.

2—SEQ. OF STATE.

The amount due from counties for the support of persons therefrom in the State Reform School during the past year, was added to the tax apportioned to each of such counties, as required by law. The apportionment will be found in appendix marked "B."

The amount of state tax levied for the last five years, with the assessed valuation by the State Board of Assessment, will appear from the following table:

Valuation.

State tax.

\$20,000 00 \$68,291	2doto Oshk	osh In. Hosp	10,000	
			\$20,00	0 00 \$68,291 1

Both of these amounts were paid in 1870, but included in the estimates for 1871.

The increase in the State 'tax for 1871, is principally due to large appropriations made by the last Legislature for the purpose of building new structures for State Institutions. In the amount authorized to be levied under chapter 119, general laws of 1870, there is appropriated for the building of an additional institution for the insane, the sum of \$125,000, and for an additional University edifice the sum of \$50,000, making a total of \$175,000. Deducting this from the total tax levied, it would leave the State tax proper about what it has been during the last three years.

When it is considered on the one hand, that our population is over a million, and that the number of those in our public institutions, depending on the State for support, are correspondingly increasing, and necessitating increased appropriations, and our development in population and wealth on the other hand, it must be admitted that the above exhibit is quite favorable, being but little more than one and one-half mill on the dollar of the valuation by the State Board, which is a smaller per centage than in any year during the period mentioned.

It is confidently expected that the amount levied will be more than sufficient to meet all claims upon the General Fund during the year 1871. This, however, will depend entirely upon the action of the next Legislature. If large appropriations shall be made in addition to those estimated and provided for in the foregoing statement, requiring payment during the current fiscal year, it will necessarily make a corresponding deficiency in the General Fund, on the 1st of January, 1872.

#### ESTIMATE OF EXPENDITURES

During the year commencing January 1, 1872.

Chapter 10, section 27, subdivision 3, of the revised statutes, provides that the Secretary of State shall submit with his annual report a detailed estimate of expenditures to be defrayed from the treasury for the ensuing year.

The expenditures for the year 1371 have already been estimated and provided for, the tax having been levied and apportioned to the several counties. This tax will be received into the treasury about the first of next February; and it is expected that it will be sufficient to meet all claims upon the treasury till December 31, 1871.

It will be necessary for the Legislature, at its next session, to provide by law for the expenses of the State government during the year commencing January 1, 1872.

The estimates herewith submitted are intended to cover this period.

Allowing the following estimates of expenditures to be correct, it will be necessary to provide for a State tax, in addition to the estimated resources, and the amount now authorized by existing laws, amounting to about \$380,000. With economical legislation, it is believed this amount will be ample to meet all liabilities of the State during the year 1872.

### ASSESSMENT OF PROPERTY FOR TAXATION.

In the appendix to this report (marked "C,") will be found an abstract of the assessment of real and personal property of the several counties, and the valuation thereof, as returned to this office by the several clerks of the boards of supervisors for the year 1870, as required by law.

The returns are full and complete from all the counties with the exception of the counties of Ashland and Green Lake, and the towns of Bloom and Forest, in the county of Richland. Every effort made to procure the returns from these towns and counties have been unavailing. No reports were received from the counties of Ashland and Green Lake last year. It is a matter of regret that any should fail to comply with the plain requirements of the law, by refusing to furnish information so valuable and necessary.

In order to provide the Legislature and the public with such facts as will the more readily enable them to discover some of the exist-

ing evils connected with the subject of assessments, great care has been taken in compiling the table mentioned. By reference thereto, it will be seen that every article of property is valued considerably -lower than in the preceding year. This may serve to show the almost unavoidable tendency existing to assess property under the true and legal basis, namely, cash values. While it may be that no injustice would be suffered directly by the individual tax-payer by having property assessed under its true value, provided a uniform basis could be established according to which every class of property, including money and securities, could be valued equally, yet the tendency of such a system would not only place the State as well as the individual, in a false position, both as to values and rates of taxation, but it would also inevitably lead to other and The law establishes the true cash value as the basis, greater evils. and a conscientious and faithful conformity to its provisions in this respect is a result most earnestly to be hoped for.

The following table shows the average valuation of property therein specified. In the first seven counties it will be seen that the average valuation is below, while the last seven show the average to be above that of the State at large:

Counties.	Average value of horses.	Average value of cattle.	Average value of mules and asses.	Average value of sheep.	Average value of swinc.
Brown	<b>\$</b> 27 88	<b>\$</b> 9 72	\$36 38	<b>\$</b> 62	   <b>\$</b> 1 36
Calumet	27 16	9 46	28 00	74	1 46
Kewaunee	8 85	5 65	18 71	84	1 17
Manitowoc	16 75	7 22	17 38	61	94
Marathon	25 86	10 44	58 75	1 01	1 79
Ozaukee	29 69	11 81	36 08	89	2 56
Shawane	82 00	8 47	41 66	78	88
STATE AT LARGE	54 26	15 29	63 53	1 39	3 60
Bayfield	92 19	41 82			8 00
Clark	76 26	25 77	104 12	1 71	4 50
Dunn	75 58	18 41	89 84	1 78	8 47
Pierce	74 22	17 41	94 55	1 49	8 74
Rock	68 14	17 59	78 94	1 56	5 95
Walworth	65 95	22 71	73 05	2 04	6 50
Waukesha	64 61	21 82	78 36	1 81	5 85

It is impossible to account for the great disparity in values of property of the same class in the above counties, and in other counties not included in this table, unless it be admitted that the true basis was disregarded. Why should horses be valued at \$92.19 in Bayfield, and only at \$8.85 in Kewaunee; or \$76.26 in Clark, \$75.58 in Dunn, \$63.14 in Rock and \$65.95 in Walworth, and only \$16.75 in Manitowoc and \$27.88 in Brown, both of which are lake shore counties, while some of the other counties with high values are far in the interior and a great distance from the leading markets? There is nearly the same disparity in the values of other classes of taxable property. This is manifestly a want of conformity to the law, and the sooner this irregularity is remedied by a strict adherence to the cash basis, the more equally and satisfactorily will the burdens of taxation be distributed.

COMPARATIVE STATEMENT of the number, value and average value of property in the years 1869 and 1870. Also the decrease and increase of each class.

*On account of a clerical error in the footing, this item in the report of 1869 was \$437, 627, 856, but should have been as above.

### INSURANCE.

Chapter 59, general laws of 1870, provides that the Secretary of State shall annually, on or before the first day of May, prepare and print in a single document, the information contained in the statements made by Insurance Companies, and communicate the same to the Legislature.

In compliance with these requirements, a report was made, which will be laid before the Logislature, containing such remarks, and statistical matter in reference to the condition and operations of Insurance Companies doing business in this State, as will, it is hoped, in a measure at least, supply the information desired.

# STATISTICS OF IMMIGRATION.

The following statement shows the number of immigrants arriving in Wisconsin for settlement from April to October 10, 1870, as reported to the State Board of Immigration by the Milwaukee and Chicago agents:

April  May  June  July  August  September.  October 10, 1870	1,966 1,746 1,703 588 92	182 1,709 1,831 3,034 546 712 156	76 248 117 70 78 67 48	10 86 184 211 103 16	48 89  4 18	8 69 15 8 10 31	1,127 4,067 3,898 5,021 1,270 922 282
	6,868	8,170	699	560	99	136	16,582

Of this number 8,726 came by way of Milwaukee and 7,806 by way of Chicago. A large majority of the Scandinavians came from Norway. The French immigrants, and those of several other nationalties arrived by the way of Green Bay and other lake ports, of whom the board has no account.

The amount expended for this object during the past year was \$4,628.92, an itemised statement of which may be found in appendix "A," page 64 of this report.

#### STATE PRINTING.

The present contract for doing the state printing expires on the 31st of December next. The commissioners, authorized by law for that purpose, advertised for sealed proposals as required by law, for doing the state printing for the term of two years, commencing on the 1st day of January, 1871.

At the hour specified, the following sealed proposals having been received, were opened:

1. W. G. Roberts	 28 per cent.	discount.
2. M. J. Cantwell	 45 per cent.	discount.
8. A. E. Gordon	 50 per cent.	discount.
4. Atwood & Culver	 L8 per cent.	discount.

Messrs. Atwood & Culver being the lowest bidders, and having executed the agreement and bond, and all other obligations required of them by law, the contract was awarded to them for the term of two years from the first day of January, 1871, at fifty-three per cent. discount from the maximum prices established by law.

### RAILROADS.

An abstract of the business of the several railroads operated in this State, together with the annual reports made by their officers, will be found in appendix "D."

During the year ending December, 31, 1869, eighty-five miles of new roads were constructed. The aggregate increase of the gross earnings, during the same period, was \$425,321 27; the increase in the transportation of wheat alone being 6,338,488 bushels.

### REVISION OF THE STATUTES.

The supply of the revised statutes is nearly exhausted, there being but 145 volumes on hand. After furnishing the next legislature with the usual number, there will be but few, if any, remaining.

The supply of the session laws for the years 1859 to 1863, inclusive, is also exhausted. Demands for these session laws are frequently made by officers who are entitled to them, but the State has not been able for some time past to supply them. New towns

are also being continually organized, whose officers cannot be informed of their duties unless they are furnished with the laws.

Since the revision of the statutes in 1858, a large number of laws have annually been enacted, involving many intricate changes. It requires, therefore, great labor, and, in many instances, it is extremely difficult to find what the law is.

In view of these facts, I would respectfully recommend that the Legislature take immediate action to secure an early revision of the laws.

#### COUNTY AGRICULTURAL SOCIETIES

Synopsis of the annual reports of the several County Agricultural Societies of the State will be found by reference to appendix "E," from which the following exhibit is made:

Number of societies, 84.

# MARRIAGES, BIRTHS AND DEATHS.

The number of marriages returned to this office during the year ending Dec. 31, 1869, was 17,252, as will appear by reference to appendix "F."

The law providing for the registry of births and deaths not being generally observed, the number returned to this office during the year named was by a few counties only; the counties of Milwaukee, Manitowoo, Polk and Washington returning 2,182 births, and the counties of Manitowoo and Polk returning 228 deaths.

### INCORPORATIONS.

A list of incorporations organized under the general laws of the State, during the past year, will be found under appendix "G," the number being ten.

#### RELIGIOUS SOCIETIES.

The number of religious societies filing proof of their organization in this office during the last year was eight, a list of which is contained in appendix "H."

#### ELECTIONS.

Tables containing the result and canvass of the votes for State Officers, Members of Congress and Judges of the Circuit Courts will be found in appendixes marked "K," "L," and "M."

#### CENSUS OF 1870.

By joint resolution No. 4, of 1870, it was made the duty of the Secretary of State to compile and arrange the census of inhabitants in the State for 1870, by towns and counties, together with such agricultural and manufacturing statistics as he might deem useful, and to include the same in his annual report.

The labor attending the work contemplated by the resolution referred to was very great. All the schedules containing the enumerations by the assistant marshals had to be carefully footed, arranged and condensed. The time within which it was necessary to do the work being very short, it was found impossible to make so full and complete a compilation of the census material as might be desired.

#### STATISTICS OF POPULATION.

The statistics of population have been arranged and condensed with great care, and although some additional items of interest could have been prepared had the time permitted, it is believed that the exhibits made will be found substantially correct.

At a late day a supplemental return of population from Chippewa county was received, showing 2,684 additional inhabitants. This

return was furnished to this department by the United States marshal in aggregates, by towns, and could not, therefore, be classified like the other returns.

The following comparative table shows the aggregate number of each class therein specified, according to the seventh, eighth and ninth enumerations, taken respectively in 1850, 1860 and 1870:

Classes.	Census of 1850.	Census of 1860.	Census of 1870.
No. of Dwellings	56,816	154,036	198,243
Families	57,608		<b>20</b> 0,668
White Males	164,851	406,796	541,228
White Females	140,405	367,914	508,834
Colored Males	365	658	1,494
Colored Females	270	518	1,820
Blind	63	220	201
Insane	54	288	691
Deaf and Dumb	_	812	814
Idiotic	92	257	258
Deaths during the year ending June 1		7,141	9,070
Aggregate population		775,881	1,055,538

It will be seen from the foregoing table that the increase of population in the state since 1860 is 279,678, being a gain of 86 per cent.

One other prominent fact disclosed by the census, is the alarming increase in the number of the insane.

The following statement shows the increased per cent. of insane during the last three decimal periods:

Years.	Insaue.	Population.	Per cent. to Population.
1850	54	805,891	.000 17
1860	283	775,881	.000 86
1870	691	1,055,559	.000 65

The comparative proportion of insane to the total population will appear from the following statements:

1850, one insane to every 5,655 population.

1860, one insane to every 2,812 population.

1870, one insene to every 1,528 population.

Statements of the population of the State by towns, cities and villages, and a recapitulation by counties, will be found under appendix "N."

# STATISTICS OF AGRICULTURE AND MANUFACTURES.

In appendix "O" will be found a statement of the productions of agriculture and manufactures, by counties.

The returns of schedule three, containing the agricultural statistics, were received, with the exception of five towns from the county of Racine, no copy of this schedule having been made in one district of that county for this office. Efforts were made to procure the returns from Washington, but up to the time of putting this report to press they had not been received.

The following table shows the total number of acres of improved lands in the State, together with the aggregate amounts of the leading productions therein specified, according to the census of 1860 and 1870:

·	1860.	1870.
No. of acres of improved lands	3,746,167	5,795,538
businels of wheat	15,657,458	25,323,647
bushels of rye	888,544	1,356,786
bushels of corn	7,517,300	14,875,968
bushels of oats		19,878,794
bushels of barley	707,307	1,627,569
pounds of wool		4,086,688
bushels of potatoes	8,818,309	6,642,845
pounds of butter		22,257,117
pounds of cheese	1,104,300	1,494,145
tons of hay		1,280,432
pounds of hops		4,738,222
Estimated value of farm productions, including		
betterments and additions to stock		77,507,261
No. of corporations, companies or individuals		
manufacturing more than \$500 in value		
annually	8,064	7,136
No. of hands employed		89,055
Value of manufactured products	\$27,849,467	\$85,624,966

A very large and gratifying increase in the productions of agriculture, compared with the statistics of 1860, will be observed.

The amount of wheat produced to each inhabitant in 1860, was 20.18 bushels; the amount of wheat produced to each inhabitant in 1870, was 24 bushels—showing a gain of nearly 62 per cent.

The increase in the manufacturing industry of the State during

the same period is greater still, as will appear from the following statement:

	1860	1870	Increase.	Inc. per ct.
No. of establishments No. of hands employed Value of products	15,414	7,186 89,055 \$85,624,966	4,072 28,641 \$57,775,499	1 32 1 53 2 07

## SOCIAL STATISTICS.

In appendix "P" will be found such social statistics compiled from the census returns, as were deemed of general interest.

The following table gives the aggregate results:

Public debts of counties, cities and towns	<b>\$3,738 965</b>
Total tares levied,dododo	
Whole number of paupers supported during the year	1,588
Cost of support	147,879
Criminals convicted	886
Number of libraries	
volumes	880,508
church organizations	1,792
church edifices	1,896
Seating capacity of churches	455,088
Value of church property	\$4,749,988
Number of newspapers	
Circulation	

All of which is respectfully submitted.

LL. BREESE,

Secretary of State.

#### STATE OF WISCONSIN,

OFFICE OF THE SECRETARY OF STATE,

Insurance Department.

MADISON, May 1, 1870.

To the honorable the legislature of the state of Wisconsin:

The undersigned, secretary of state and ex-officio commissioner of insurance, has the honor to lay this, the first annual report of the insurance department of Wisconsin before you, comprising abstracts of the statements of the several insurance companies transacting business in this state for the year ending December 31, 1869.

Respectfully your obedient servant,

LL BREESE,

Secretary of State and ex-officio Commissioner of Insurance.

## INSURANCE REPORT.

#### PART I.

### FIRE AND MARINE INSURANCE COMPANIES.

STATE OF WISCONSIN,

OFFICE OF SECRETARY OF STATE,

Insurance Department.

MADISON, May 1, 1870.

To the honorable the legislature of the state of Wisconsin:

Under the provisions of chapter 56 of the general laws of 1870, approved March 14, 1870, the secretary of state who under the constitution of the state is auditor, was constituted also ex-officio, commissioner of insurance; a position which he had previously held, without the name however, by virtue of the laws then in force. It was further provided in section 32 of said act, that he should establish in his office a department to be called "The Department of Insurance," the expenses of which department, it is understood, are to be paid out of the fees received from the several companies transacting business in the state. Owing to the late day in the session of the legislature on which the law was passed, and to the fact that nearly all of the companies transacting business in the state had already complied with the provisions of previous laws and secured their licenses and paid their fees under the same, it could not be, and was not expected that the insurance department would be fully organized and put in operation to any considerable extent, this year. The fees received and

to be received for that portion of the year remaining subsequent to the passage of the law would not pay the salary of one clerk for three months. It is hoped and expected, however, that this department will be efficiently organized previous to the reception of the next annual statement of insurance companies.

Arrangements are made nowithstanding the delay in a complete organization, to exercise a watchful supervision over the several companies required to report to this department, and to protect the people of the state from the operation of fraudulent transactions and irresponsible companies. New and improved forms for statements have been prepared in accordance with the provisions of the new laws, as nearly uniform with those of the most advanced states as the law and the facts to be ascertained will allow; and it is confidently expected that all companies will cheerfully furnish all the information called for.

Heretofore in the history of the legislation of this state, the main idea seems to have been, not so much to guard the interests of the people against wild cat organizations, which grow up on public credulity in a night, and like Jonah's gourd melt away before the devouring worm of ignorant or corrupt management, when most needed for protection; but to extract the greatest amount of money in the way of burdensome and almost prohibitory taxes, from the treasuries of both legitimate and illegitimate companies.

The people of the state are to be congratulated upon the adoption of a somewhat more liberal and enlightened policy for the future than in the past; and it is to be hoped that the insurance companies will reciprocate by affording the requisite guaranties of safety, and by placing the rates of premiums on as low a basis as is consistent with their own good and that of the public. The interests of each are mutual, since one depends upon the other for patronage, and the other upon the one for protection.

The magnitude of the business done in this state, by the companies of this and other states is not generally understood or appreciated. To illustrate this, reference will be made in this part of the report, only to the transactions of Fire and Marine companies. The following table shows the number of companies transacting business in the state for the past five years, as appears from reports made to this office. No statement of the transactions of Wisconsin companies was made to this office earlier than for the year 1866, the law previously requiring their reports to be made to the Governor.

[Table No. 1.]

FIRE AND MARINE INSURANCE COMPANIES,

Showing receipts and losses in Wisconsin for the last five years:

COMPANIES OF OTH- ER STATES.	YEAR.	CASH PREMI- UMS.	TOTAL	LOSSES PAID.	TOTAL.
51 companies	1865	\$669,994		\$164,056	
51do	1866	1,041,694		620,887	
57do	1887	1,169,151		698,881	
66do	1868	1,274,886		629,156	
72do	1869	1,178,174		665,440	
Total	••••		\$5,328,849		\$2,777,870
Wisconsin Com- Panies.					
8 companies	1865	No report.		• • • • • • • • • •	
8do	1866	\$284,181		\$117,660	
9do	1867	881,856.		78,617	.,
8do	1868	386,538		180,184	
8do	1869	367,626		217,220	
Total	••••		\$1,870,161	·	\$598,681
Grand total of a	li Co's.		\$6,698,510	•	\$8,871,001

From the above table it appears that the number of companies of other states increased from 51 in 1865 to 72 in 1869. The Wisconsin companies remain the same in number; but the places of two which failed last year, to-wit: the Milwaukee Insurance Company and the Rock River Insurance Company of Beloit, were supplied by two new stock companies, to-wit: the Brewers' Protective and the Northwestern National, both of Milwaukee.

The number of companies now authorized by this department to transact business, is as follows:

Wisconsin companies	8 79
Total	87

The following companies, not having filed their annual statement for the last year, are not authorized to transact business in the state, and are understood to have withdrawn, to-wit:

The Buckeye Insurance Company of Cleveland, Ohio, The Enterprise Insurance Company of Cincinnati, Ohio.

The following named companies having complied with the laws of this state, have been authorized to transact business, since the date of the last report from this office, to-wit:

#### Wisconsin Companies—

Brewers' Protective, Milwaukee, commenced business in 1868, but did not report to this office until January, 1870.

Northwestern National, Milwaukee, commenced business in July, 1869:

#### Companies of other States—

American, Chicago, March 11, 1870. Fireman's Fund, San Francisco, February 28, 1870. Independent, Boston, February 10, 1870. Lamar, Chicago, April 26, 1870. Royal, Liverpool, October 19, 1869. State, Chicago, March 7, 1870. Teutonia, Cleveland, November 1, 1869. Union Fire, San Francisco, March 25, 1870.

The name of the "Mutual" of Buffalo, N. Y., has been changed to that of "Buffalo Fire and Marine."

The Hartford Steam Boiler Inspection Company, has been included, for convenience, in the list of Fire and Marine Companies.

#### WISCONSIN COMPANIES.

The business of insurance companies organized in this state until very recently, has been conducted on the mutual plan, which when prudently managed, with prompt collections from agents, with safe investments of surplus, and the rates for premiums so arranged as to secure a sufficient amount of cash receipts to meet ordinary emergencies, is perhaps as satisfactory and secure as popular sentiment demands. But it has been and probably will be the case, that whenever extraordinary causes render an assessment on the notes of the insured necessary, a want of confidence will at once spring up, resulting in great embarrassment in future operations. So that it would appear to be both politic and necessary to success to secure such a premium reserve as will render such calls few and far This is no less desirable in mutual than in joint between. stock companies.

The insurance commissioner of the state of New York remarks on this point:

"Companies must manage in such a manner as to collect net premiums enough to pay losses, or the sinking of capital will inevitably result in the ruin and dissolution of such corporations. If premiums are inadequately adjusted to risks or if expenses and commissions are so large as practically to result in an excessive diminution of rate, or if business is not kept in hand and within the control and knowledge of the officers, and a general laxity of discipline is allowed to pervade a corporation, insolvency must follow as inevitably as the penalty follows the violation of any of the physical laws of nature."

The fate of the late Milwaukee Insurance Company, and of the Rock River Insurance Company of Beloit, will suggest to any one familiar with the insurance business of this state, a striking illustration of the truth of the above remarks. Of the immediate causes of the failure of these two companies, this department has no official statements upon which to found an accurate estimate.

But a lesson might be learned from a slight examination of their last statements filed in this office in January, 1869, a few months previous to their failure.

The Milwaukee Insurance Company reported gross assets amounting to \$118,599.

These assets consisted of

Cash on band. Cash in hands of agents and others. Premium no'es. Bills receivable. Miscellaneous.	35,860 25,620 76,480
<b>—</b>	

The total amount of liabilities was reported at \$32,856, including the amount necessary to reinsure all outstanding risks, showing a nominal surplus of \$85,723.

The Rock River Insurance Company reported gross assets as follows:

Cash on hand	210,203
Cash in hands of agents and others	80,210
Premium notes	244,172
Bills receivable Bonds and stocks Miscellaneous	20,376
Bonds and stocks	6,000
Miscellaneous	600

The total amount of liabilities was stated at \$3,100, not including estimate for reinsurance, leaving an apparent surplus of \$358,461.

And yet these companies with so large a surplus on paper could not meet their ordinary engagements.

Failure may easily however, be attributed to several causes which may serve as a warning to others similarly situated, if such there be. 1st. The small amount of cash on hand or secured. 2d. The profuse liberality of both companies in allowing over \$80,000 cash to lie dormant in the hands of agents, and their unlimited confidence in their agents. 3d. Their inability to collect a sufficient amount to meet their liabilities from a large amount of premium notes and unsecured bills receivable. 4th. Neglect to adjust their cash and note premiums so as to secure themselves against just such emergencies as happened. What was undoubtedly lacking was cash or secured assets sufficient to constitute a reliable premium reserve, in relation to which point notice will be taken hereafter.

Ot the eight Wisconsin companies now transacting business, six are mutual and two joint stock companies, as exibited in the following table:

[See table No. 2.]

### RE-INSURANCE FUND.

As the laws regulating the affairs of Insurance Companies incorporated in this state, did not, previous to the making and filing of the last annual statements, require said companies to make any estimate of the amount necessary to re-insure their outstanding risks or fix any basis for such estimate, it was hardly to be expected either that any uniform rule would be adopted, or that any statements at all of this kind would be made. These estimates have been made voluntarily upon no prescribed basis. Table No. 4 on page 14, shows most remarkable discrepancies in the manner of making such estimates.

The Milwaukee Mechanics Mutual and the Northwestern National have estimated their re-insurance fund at forty per cent of the premiums paid on unexpired risks. The Madison Mutual has based its estimate on a comparison of the annual losses for the last five years as appears from its own business experience, making no estimate for risks having more than one year to run. What basis has been adopted by the remaining companies is unknown.

In order to illustrate the discrepancies more clearly, the following table has been prepared, showing the amount of premium reserves, as estimated by the companies, to each \$1000 of risks in force.

[TABLE No. 5.]
WISCONSIN FIRE AND MARINE COMPANIES.

Showing estimates of amounts necessary to re-insure all risks in force on the 31st day of December, 1869, as estimated by the companies, and the proportion to each \$1000 of risks.

NAME OF COMPANY.	Amount of re- insurance as estimated by company.	Total amount of outstand-ing risks.	Re-iraurance estimated on each \$10000f risks in force.
Brewers' Protective	<b>\$</b> 6,000	<b>\$</b> 990,775	<b>\$6</b> 06
Dodge County Mutual	54,617	21,846,667	2 50
German Mutual	9,500	972,885	9 76
Germantown Farmers' Mutual.	16,138	. 6,455,004	2 50
Herman Farmers' Mutual	1,866	546,511	2 50
Madison Mutual	90,479	68,762,427	1 49
Milwaukee Mechanics' Mutual	96,204	15,809,118	6 28
Northwestern National	7,878	1,394,738	2 27
Totals and average	<b>\$281,677</b>	\$111,974,125	<b>\$2</b> 5 <b>2</b>

[Nore—The re-insurance fund of the Germantown Farmers' Mutual and the Herman Farmers' Mutual was not reported by the companies, but is estimated by this department on the basis of the Dodge County Mutual.]

From the above table it will be seen that the rate of re-insurance as applied to each \$1,000 of risks in force varies from \$1.42, the estimate of the Madison Mutual, to \$9.76, that of the German Mutual. No marine or inland risks are included in this statement excepting a very small amount in the statement of the Northwestern National. According to the report of the insurance commissioner of the state of New York for 1869, the rates of re-insurance of companies transacting business in that state, as charged to said companies, and estimated at fifty per cent. of premium on unexpired risks, varied from

\$2.47, the lowest, to \$10.00, the highest on each \$1,000 of risks in force, being at an average of \$5.24, including all the companies reported. Estimating the same at forty per cent. the average would be \$4.19. The average of Wisconsin companies as estimated, is \$2.52, a trifle more than one half of estimates made according to the uniform rule of forty per cent. No allowance has been made so far as appears from statements made, for any amount of risks having more than one year to run.

In future statements a greater degree of uniformity will be insisted upon, and the revised blanks for annual statements will be made to show the amount of unearned premiums or unexpired risks, and the amount of such risks terminable in one, three and five years respectively, distinguishing fire, marine and inland risks. The rate of forty per cent of the gross premiums received on fire risks, and the full amount received on marine and inland risks will be adopted as the standard for this state. Although neither this nor any other inflexible rule may be strictly accurate as applied to all companies, still it meets with the more general approbation of insurance men than any other.

Most of the companies of this state being mutual companies, and having a large amount of premium notes subject to assessments to fall back upon in case of emergencies, may be considered safe and reliable so long as prudently managed, even without so large a reserve fund as is to be expected of companies doing business on the joint stock plan; since every person insured becomes a stockholder to the amount of the premium notes held in his name by the company, assessments upon which can be enforced through the courts.

The Northwestern National Insurance Company of Milwaukee started out late in 1869 upon the joint stock plan, and but for unexpected losses on marine or inland risks, would undoubtedly have made a more favorable exhibit of its

balance. It still has a large surplus over all liabilities and bids fair to take a leading rank among our state companies.

The detailed statements of the Wisconsin companies will be found on the following pages.

### COMPANIES OF OTHER STATES.

Abstracts of the statements of the several joint stock insurance companies of other states reporting to this department will be found arranged in tabular form immediately following the detailed statements of Wisconsin companies.

As so little time has elapsed since the new law regulating these companies took effect, and as said law required the abstract of these statements to be published on or before the first day of May, no further analysis of their contents will be attempted than is contained in the tables referred to.

Table No. 1, exhibits the capital, assets, income, expendig tures, liabilities and surplus of said companies, on all liabilities except capital.

Table No. 2, exhibits the amount of risks written in 1869, the total amount of risks outstanding on the 31st day of December 1869, and the several items of income.

1

Table No. 3, exhibits the several items of expenditure of said companies.

Table No. 4, exhibits the liabilities of said companies, classified.

Table No. 5, exhibits the receipts, losses, and the several amounts paid for taxes and license in Wisconsin; the last column includes the three per cent upon gross receipts in this state for the year 1869, and also the license fee of \$500 for companies which commenced business during said year and up to the date of this report.

The abstracts of life insurance companies will; be found in Part II of this report.

### LIFE INSURANCE COMPANIES.

### PART II.

Containing on abstract of the several statements made to the Secretary of State of the state of Wiscon: in for the year ending the 81st day of December, 1869.

### STATE OF WISCONSIN,

Office of the Secretary of State,

Department of Insurance.

MADISON, May 2, 1870.

The several abstracts and tables showing the business and standing of Life Insurance Companies organized and transacting business in this state for the year 1869, and including those recently admitted to the state up to the date of this report, are as complete as could be made with the means and time at command.

The law provides for the publication of this report on the first day of May annually. Owing to the contemplated change in the law regulating Life Insurance Companies, many of the companies delayed sending in their statements until after the publication of the laws passed at the last session of the legislature, hoping for a remission in whole or in part of the large per centage heretofore charged them upon their receipts in this

state. Other companies had made application for admission, several of which have been admitted at so late a day as to render a more minute analysis than has been attempted with the force at command, impossible.

No attempt has been made, nor is it probable that any will be made for years to come in this state, to rival the comprehensive and exhaustive reports of the insurance departments of New York and Massachusetts, which have exerted, and it, is hoped, will continue to exert so important and beneficial an influence upon the manner of conducting the business of insurance in this country, under the lead and control of such men as ELIZUR WRIGHT, WILLIAM BARNES and JOHN E. SANFORD. It will perhaps be sufficient for the present, if by the use of the labors and the immense mass of material furnished by those departments, such a rigid scrutiny shall be exercised as to prevent the organization or admission into this state of any companies which cannot bear the test of a critical examination both of accumulated reserves and of the manner of transacting business.

The progress of life insurance in this state is illustrated by the following table showing the amount of receipts and losses in the state of Wisconsin, of the several companies reported to this office for the years specified:

Year.	No. of Companies.	Cash for Pre- miums.	Paid for Losses.
1865	12 companies	\$385,717	\$69,871
1866	20do	531,452	79,913
1867	88do	865,628	174,052
1868	85dv	1,174,108	252,947
1869	87do	1,254,283	310,089
Total	• • • • • • • • • • • • • • • • • • • •	\$4,161,188	\$876,872

Forty-one companies were authorized to transact business either for a whole or a portion of the year 1869, but only thirty-seven have reported any receipts in the state for that year.

The following named companies have ceased to do business in the state, either from lack of success or because of high rates of license charged, to-wit:

Penn Mutual Life, Philadelphia, Pa. . Atlantic Mutual Life, Albany, N. Y. Empire Mutual Life, New York.

The last named company was admitted to the state, November 8, 1869, but not having filed its annual report · as required by law, no license has been issued for this year.

The following named companies having complied with the laws of the state, have been admitted since October 10, 1869—the date of the last annual report of this office, to-wit.:

Empire Mutual Life, N. Y., Nov. 8, 1869.
International Life, Chicago, Nov. 11, 1869.
Hope Mutual Life, N. Y., Jan. 29, 1870.
Craftsmens' Life, N. Y., March 1, 1870.
Mutual Protective Life Assurance Company, N. Y., March 28, 1870.

Widows and Orphans Benefit, N. Y., April 8, 1870. Chicago Life, Chicago, April 14, 1870.

Teutonia Life, Chicago, April 25, 1870.

The Railway Passengers Assurance Company is included among the Life Insurance Companies in the several tables of this report, as a matter of convenience.

Forty-three companies are now authorized to transact business in this state; three having withdrawn and eight having been admitted since the last annual report.

The following table exhibits the transactions of the several companion named, in this state during the year 1869:

Total, 87: Companies	\$1,288,515	\$541,820	\$310,089

It will be observed that of the aggregate cash receipts in this state for 1869, amounting to the sum of \$1,238,515 by thirty-seven companies, that more than one-third the whole amount was received by the Northwestern Mutual Life Insurance Company of Milwaukee. Within the last few years this company has made the most wonderful progress of any company in the United States. An examination of its assets and premium reserves shows that it is worthy of the confidence of the people; and it is a matter of just pride to the citizens of this state that there are few, if any, companies anywhere holding a higher rank. In relation to gross assets and amount of risks for 1869, this company ranks as the ninth among those reporting to this department. In the number of policies issued in 1869 it ranks as the fifth. In each case the companies which rank it are old established organizations whose ramifications extended to every portion of the country previous to its existence.

Since filing their last annual report, the Northwestern Mutual Life has concluded to adopt the higher standard of reserve, based on the "combined experience" rate of mortality at four per cent interest, the highest rule known to any American company, this being the Massachusetts rule of reserve. The adoption of this rule rendered necessary the postponement of the usual dividend for this year, but will ultimately result in a higher degree of stability and security to its numerous policy holders. In taking this stand the company has been actuated by the most praiseworthy motives, and is fully endorsed by Prof ELIZUR WRIGHT, who may be called the father of scientific life insurance in this country, who recommended this change to the company, and who remarks on this subject as follows:

"In the light of both American and European experince of life insurance for the last century, the interests of the policyholders will be best served by adopting and maintaining hereafter the highest standard of reserve known to any American company. This standard, which assumes as the law of mortality the experience of the best English companies, and as the rate of interest, four per cent., was adopted by the state of Massachusetts in 1858, and has been maintained there ever since, is the only complete series of valuations ever applied to the business of life insurance by state authority, and also was approved by the largest convention of life insurance companies ever assembled in this country. The state of New York has successively proposed two different standards, both of which have the effect of requiring a considerably less reserve at the outset, and on new business; but by which, as every policy proceeds to its final limit, the reserve must rise by a steeper grade to the same amount, to wit, the whole sum insured. It is not denied that the business might be safely conducted on the New York rule of reserve, so far as the mere future solvency of the company is concerned. But a vast company of co-insurers, spread over a continent and binding together the present with future ages, should not be content with a bare sufficiency of reserve. It should keep a barrier of reserve between it and future insolvency ever on the increase and as impregnable as Gibraltar. The most satisfactory working will be obtained by a standard of reserve which will not only keep the old business wholly above the necessity of acquiring new, but will make it for the interest of new business to seek the company in preference to any new company that can be presented.

"This Company has at present a surplus, which has arisen from the excess of premiums and interest, and the favorable turn of the risks for the last two or three years, of about \$700,000 over the Massachusetts rule of reserve, and nearly \$1,200,000 by the New York rule. The policies that are to become claims within a few years would undoubtedly be benefited slightly by having a distribution of all the surplus over the New York reserve. But, on the other hand, fully

the half who are to live the longest and pay the most premiums before receiving their indemnity or endowment, will be most benefited by having the largest reserve retained, and which will, on the whole, be sure to yield them much the larger dividends, both on account of interest on a larger principal, and the cheaper acquisition of new business, when the latter can by no possibility be taxed to supply any deficiency of reserve in the old.

"It is to be borne in mind that the rule of reserve, whether high or low, makes no difference in the cost of the insurance furnished by the Company. The high rule makes the amount of insurance or risk borne by the Company on the policy less, but the policy-holder pays for what he gets at precisely the same rate. The high rule obliges him to insure himself, or use the Company as his savings bank, a little more largely. The more the interest received by the Company on its investments exceeds that assumed in the rule of reserve (4 per cent.), the more profitable it is to the average policy-holder to have the reserve large. The last three dividends, which were cast with reference to the former New York rule of reserve gave the advantage slightly to transient members and those destined to early indemnity at the expense of the majority, but the present plan will have the effect of establishing in the long run a juster and more satifactory equilibrium between the members."

The following table shows the relative standing of eleven of the largest companies reporting to this Department, as to number of policies issued and income in 1869, in the order of policies.

	Company.	Policies.	Gross Income
1.	Mutual Life, N. Y	14,010	\$15,494,142
2.	Equitable Life, N. Y	18,211	6,268,892
8.	Ætna Life, Hartford	11,877	6,129,096
4.	New York Life, N. Y	10,717	5,974,798
5.	Northwestern Mutual Life	9,891	3,828,589
6.	Knickerbocker Life, N. Y	9,046	5,041,924
7.	Continental Life, N. Y	8,7 <b>8</b> 1	1,549,158
8.	Phœnix Mutual, Hartford	8,628	2,481,571
9.	Connecticut Mutual	8,240	8,978,751
10.	Charter Oak, Hartford	7,209	4,084,486

The following table shows the gross assets and the total amount of risks held by the ten companies having the largest amount, arranged in the order of risks:

	Company.	Gross assets Dec. 31, 1869.	Total amount of risks Dec. 81, 1869.
1.	Mutual Life, N. Y	\$37,579,169	\$216,927,974
2.	Connecticut Mutual	27,566,479	177,856,621
8.	Equitable, N. Y	10,510,824	184,221,981
4.	Mutual Benefit, N. J.	19,422,208	129,928,107
5.	Ætna, Hartford	18,089,837	107,988,058
6.	New York Life	18,827,925	102,120,911
7.	New England Mutual	8,588,864	70,828,931
8.	Knickerbocker, N. Y	6,680,966	66,565,489
9.	Northwestern Mutual, Wig	6,757,582	59,618,674
10.	Charter Osk, Hartford	7,208,594	55,670,592

Table No. 2 exhibits the name, location and capital, of every company authorized, at the date of this report, to transact business in this state, together with a summary of income, expenditures, assets and liabilities. The last column, purporting to show the surplus of the several companies, not including their liability to their stockholders for capital, must be taken with some grains of allowance. This surplus is computed from the statements as filed in this department, but some of them are evidently defective. The amount necessary to re-insure outstanding risks has been estimated in round numbers in two or three instances, and in case of the Mutual Life of New York, the valuation of policies is returned as computed one year ago.

In other cases, it is not known whether the computation was made in accordance with the rule adopted in Massachusetts, or according to the American experience table of mortality, with interest at four and a half per cent as adopted in New York and some other states. And since most of these reports were made and licenses issued previous to the passage of the new law regulating life insurance companies, it has not been deemed necessary, nor was it possible, to cause additional or supplementary returns to be made in the time provided previous to publication.

Many of the defects in these reports arise from the fact, that the law of this state, and the forms of blanks in use did not require or provide for such a statement as is demanded in order to elicit a correct and complete exhibit of the affairs and transactions of companies reporting to this department. These deficiencies are now in the course of obviation, under improved legislation and more systematic forms.

The time for filing annual reports has been extended in case of life companies, from the first of February to the first of March. It is very desirable that all reports should be made promptly, and complete as to the details required, which are few in comparison with those of some other states.

Applications have been made by several companies, for admission into the state, which are doing the business of life insurance under the name of "Co-operative," "Mutual Benefit" associations, and other similar designations. No authority has been granted to any of them, nor will they be allowed to transact business in the state, until they have complied with all the conditions attached to regular life insurance companies. They have no guarantee capital, and as is remarked by the insurance commissioner of the state of Massachusetts—"Something of this sort may do well enough as a channel for neighborhood benevolence, while the project holds together, but it cannot pretend to have a scientific basis or financial stability."

Table No. 8 exhibits a comparison of the business of the companies named for the years 1868 and 1869, which is interesting as evidence of constant progress and earnest effort on the part of both old and newly organized companies. The number of policies has considerably increased in the aggregate, and the gross income in a still greater proportion from that of the previous year.

Tables No. 4, 5 and 6, respectively, show the details of income, expenditures and liabilities, of companies reporting for 1869.

Following the tables above referred to, will be found abstracts of the statements of each company in detail and as made to this department.

In conclusion, I have to suggest that the Massachusetts rule of reserves be adopted by this state, in lieu of that now provided by law. This will insure greater security to the insured, greater economy in the management of companies; and it is hoped will tend to the adoption of a uniform rule by all the states, which shall be the rule of absolute safety.

#### STATE INDEBTEDNESS:

The debt of the state amounts to \$2,252,057.00, and is classified as follows:

Normal Sch University l	ool Fund	\$1,559,700 479,500 111,000 -33,600	00 00	*********
Bonds maturing in	1877	\$200	00	*********
•	1878	6,000	00	
	1679	1,000	00	
	1880	12,000		
	1681	2,000		
	1882	80,000		
•	1884,			
•	1865	8,000		
	1886	7,000		
	1686	4,000		
				\$48,720 00
Gurrency cert	ificate			67 00
Total				82,252,067 00

#### SECURITIES DEPOSITED BY INSURANCE COMPANIES.

Chapter 100 of the general laws of 1866, provides that the State. Treasurer shall receive and hold in trust for the policy holders of any insurance company incorporated by the laws of this State, such bonds, stocks or other securities as may be offered by such company for the purpose of complying with the laws of other States, in order to the transaction of the business of insurance therein.

Under this law, the North Western Mutual Life Insurance Company of Milwaukee, has deposited in this office, one hundred theusand dollars in United States 5-20 registered bonds.

Of the Wisconsin State bonds deposited by insurance companies by virtue of chapter 820, laws of 1865, the following remained in the treasury at the close of the last fiscal year, and have since been withdrawn, vin:

Madison Mutual Fire Insurance Company	\$15,000
Madison Mutual Fire Insurance Company.  German Mutual Insurance Company, Milwaukee	5,000

#### SOLDIERS' DEPOSITS.

There are also in the Treasury the following Special Deposits made by or on account of soldiers, namely:

Daniel Bullem, Co. K., 5th Reg. Wis. Vols. Infantry, 1 U. S. 10-40 bond, with March 1866 and subsequent coupons	<b>\$100</b>	00

	24,146 07	

Section 2, chapter 80, of the general laws of 1870, provides that the entire income of all the funds pertaining to the State University shall be placed at the disposal of the board of regents, by transfer to the treasurer of said board, "thenceforth to be distinct and independent of the accounts of the State." Heretofore, all moneys received and paid out on account of the University, had been charged in the "University Fund Income account," which, though a distinct account of the State, was at the same time treated as the account of the treasurer with the regents of the University. Since the passage of said act, however, a separate and distinct account has been opened with the University, and all unexpended balances of the revenue pertaining to the same were, on the 31st day of March, transferred to this account. All moneys received since, and belonging to the income of the University, have also been paid over to the treasurer of the regents. A full report of the receipts and disbursements during the fiscal year ending September 30th, 1870 will be submitted to them, and embodied in their annual report to the Governor.

# BANKING DEPARTMENT.

## BANKS AND BANKING.

In accordance with the provisions of chapter 28, general laws of 1868, submitted to the people and approved by them at the polls, the office of "Bank Comptroller" ceased to exist as a distinct branch of the State government on the first Monday of January, 1870, and its records and duties were transferred to the State Treasurer.

As required by law, I herewith submit the following report of the condition and transactions of this branch of my Department, during the past fiscal year:

The whole number of banks doing business on the first day of October, 1869, according to the last annual report of the bank Comptrol er, was thirteen, with an aggregate capital of. \$425,000 00

During the year, the following banks have been organized under the general banking law, without circulation:

Home Savings Bank, Milwaukee, capital  Bank of Commercedodo  German Bank, Sheboygando  Bank of Commerce, Green baydo  National Savings Bank, Hudsondo	\$25,000 00 100,000 00 85,000 00 100,000 00 25,000 00	285,000 00
The Bank of Shebovgan has voluntarily relinquished bosiness—capital	•••••	\$710,000 00 25,000 00
Making the whole number of banks now doing business seventeen, with an aggregate capital of	••••••	\$685,000 00
And giving an actual increase of capital in twelve months of		\$260,000 00

The aggregate amount of securities held in trust	
for Binking associations Oct. 1, 1869, was	\$50,308 00 46,157 00
The amount held Oct. 1, 1870, is	46,157 00
Decrease in twelve months	\$4,151 00
The amount of circulation outstanding on the first day of October	r
1869, and subject to redemption was	. <b>8</b> 45,479 00 . 89,606 00
Decrease in twelve months	\$5,878 00
Chapter 143, general laws of 1866, authorizes banks their circulation without surrendering their charters, or in ner interferring with their general banking business. law the following banks are winding up their circulation:  Bank of Madison	26, 1871 27 15, 1870 12, 1871 15, 1871
During the year the following banks wound up in accord the provisions of the general banking law, have withdraw plus belonging to them:	dance with
Farmers' and Mechanics' Bank Oshkosh City Bank German Bank City Bank of Prescott	98 00 1,247 00
	\$3,065 00
Surplus is due the following banks, the payment of whit not be made until legal proceedings, now pending, have cided:  Bank of Columbus.  Bank of Prairie du Chien.  Kenosha County Bank.	
· · · · · · · · · · · · · · · · · · ·	\$4,881 00

There is also due to the Exchange Bank of Darling & Co., a surplus of \$2,172 00, which I deem it my duty to retain until the indebetedness of said bank to the state, on account of state bonds sold to the same, amounting to about \$3,655 00, is discharged.

By virtue of section 3, chapter 282, general laws of 1865, the State Treasurer procured from twenty-one banks an assignment of the securities held for their circulating notes as well as of the interest of such banks in such of their circulation as may not be returned for redemption, the State assuming the redemption of the outstanding circulating notes of said banks. These banks are now being wound up in accordance with chapter 144, general laws of 1868, and their outstanding circulation will be redeemed by me at par with treasury notes, on presentation. They are the following:

Names of Banks.	Circulation outstanding.	Time of redemption expires.
Bank of Beloit Bank of Grant County Bank of Green Bay Bank of the Intelior Bank of Jefferson Bank of Manitowoc Bank of Moneka Bank of Moneka Bank of Whitewater Corn Planters' Bank Elkhorn Bank Frontier Bank Monroe County Bank Northern Bank Prairie City Bank Roekwell & Co's Bank Sauk County Bank Shawano Bank St. Croix Valley Bank Walworth County Bank Walworth County Bank Walworth County Bank Walworth County Bank	1,688 00 712 00 2,978 00 2,124 00 605 00 490 00 988 00 265 00 1,562 00 495 00 520 00 1,797 00 256 00 494 00 1,201 00 878 00 750 00	May 1, 1871dododododododododododododododododododododododo

The stocks of the following banks have been exchanged for United States treasury notes, and with them I will redeem their circulation at par on presentation:

Names of Banks.	.Circulation ontstanding.	Time of redemption expires.
Hudson City Bank LaCrosse County Bank Merchants' Bank, Milwaukee Milwaukee County Bank Wisconsin Pinery Bank Bank of Sheboygan	93 00 180 00 235 00 869 00	Not advertiseddo do do do May 1st, 1878

Banks wound up and redeemed at par, in gold, by this office:

Union Bank, Milwaukee, (not advertised) outstanding circulation Germania Bankdodo	\$87 23	_
<b></b>		
	2110	00

**\$110 00** 

The time of redemption of the bills of the latter bank has expired, but the Treasurer will continue to redeem its circulation until the withdrawal of the securities.

## The Appendix will show:

- A. Securities, circulation and capital of banks.
- B. Names of stockholders and the amount of stock held by eac's.
- C. Names of personal bondsmen for each bank.
- D. List of banks, their location and officers.
- E. Bank note impressions now on hand.
- F. Bank note plates destroyed.
- G. Bank note plates now on hand.
- H. Condition of each bank in the state at the time of last report, July 4, 1870.

All of which is respectfully submitted,

HENRY BAETZ,

State Treasurer.

## ANNUAL REPORT

OF THE

# COMMISSIONERS OF SCHOOL AND UNIVERSITY LANDS

OF THE

## STATE OF WISCONSIN,

For the Elseal Foor ending September 30, 1870.

#### STATE OF WISCONSIN,

OFFICE OF COMS. OF SCHOOL AND UNIVERSITY LANDS,
MADISON, October 1, 1870.

To his Excellency, Lucius Fairchild,

Governor of the State of Wisconsin:

SIR—As required by law, we have the honor to report herewith to you our official proceedings for the year ending September 30, 1870

The reports of the Secretary of State and State Treasurer exhibit detailed statements of the receipts and disbursements on account of the several funds affected by our action, and to them we respectfully refer.

### LANDS SOLD.

The whole amount of lands sold during the year, and the class to which they belong, is as follows:

	Acres.
School Lands	55,586.11
University Lands	1,550.58
Normal School Lands	27,242.71
Drainage Lands	
Agricultural College Lands	40,580.41 47,145.22
Military Road Lands	895.20
Military Road Lands.  Marathon County Lands.	2,480.04
Making a total of,	175,410.27

For a detailed statement of these sales we respectfully refer to the accompanying tables, marked Exhibit "A," "B," "C," "D," "E," "F" and "G."

The number of acres sold, as compared with the three previous years, is as follows:

· ·	Acres.
Year ending September 80, 1867	168,451.86
Year endingdo 1868	
Year endingdo 1869	
Year endingdo 1870	

#### INCOME.

The amount of interest moneys received from the several productive trusts funds, during the year, is as follows:

School Fund Income University Fund Income Normal School Fund Income Agricultural College Fund Income	14,204 47,057	40 09
Total income	\$234,811	36
Income from Drainage Fund	\$1,889	48' ===

#### LANDS HELD BY THE STATE.

The table marked Exhibit "H" shows the number of acres of lands belonging to the State at the close of the fiscal year, the class to which they belong, and the counties in which they are situated.

The number of acres owned by the state, (revised and corrected,) is as follows:

School Lands	•		Acres. 386.504.00
University Lands			10,440.00
Drainage Lands	• • • • • • • •	• • • • • • • • • • • • • • •	. 1,195,100.00
Agricultural College Lands Military Road Lands			10,880.00
Marathon County Lands	• • • • • • • • •	• • • • • • • • • • • • • • • • • • • •	37,048.81
Total acres	•••••		2,643,002.57

In addition to the lands above mentioned we have, during the year, under authority from the commissioner of the General Land

Office, selected 131,006.33 acres of swamp lands, inuring to the state under the swamp land grant of Sept. 28, 1850. A list of these lands have been forwarded to the commissioner for approval, and when approved will be apportioned equally to the Normal School and Drainage Funds and put into market.

## PATENTS AND CERTIFICATES.

The number of acres of land on which patents have been issued on certificates of sale and full payment entries, and the number of acres sold on certificate during the year, is as follows:

#### PATENTED ON CERTIFICATES OF SALE.

PATENTED UN CHETIFICATES OF	DALLE.	
School Lands University Lands Normal School Lands Drainage Lands Agricultural College Lands	665.36 2,918 39 1,241.79	28,437.88
PATENTED ON ENTRIES.	•	
School Lands. University Lands. Normal School Lands. Drainage Lands. Agricultural College Lands. Military Road Lands. Marathon County Lands.	40,580.41 480.00 895.20	77,868 36
Total acres patented	- 	101,805.69
School Lands.		· · · · · · · · · · · · · · · · · · ·
Univer ity Lands		. 1,200.00
Total acres sold on certificate	• • • • • • • •	97,541 91

#### FORFEITURES.

Payments of interest on certificates and loans have been more complete than usual, and the forfeitures proportionately smaller. Forfeitures for the last year are as follows:

	Acres.	Amount.
School lands	9,883	10,613 58
School lands	720	1,659 00
Normal school lands		8,623 00
Drainage lands.	824	878 00
		589 00
Agricultural college lands		1,500 00
Normal school fund loans		1,450 00
Totals	15,101	\$20,312 58
•		

#### APPORTIONMENT OF DRAINAGE MONEY.

The table marked Exhibit "I" shows the amount of drainage money apportioned to the several counties, June 1, 1870, by virtue of chapter 537, laws of 1865, and under the law is to be applied in reclaiming swamp lands.

The amount apportioned is composed of the following items:

Total amount apportioned		
Trespass, material sold	72	
Interest on certificates of sale	1.877	79
Payments on certificates of sale	1,091	00
From sale of lands	\$33,989	68

### LOANS AND INVESTMENTS.

During the year, loans from the trust funds have been made to school districts, by virtue of special acts of the legislature, and investments in state sonds, as follows:

No. of District.	Town.	County.	School Fund.	University Fund.	Normal School Fund.	Agr'l College Foud.
116111111111111111111111111111111111111	Oxford	Buffalo. Calumet Columbia. Door. Eau Claire. Grant. Grant Green Lake. Jackson Jefferson La Crosse La Fayette. Marquette. Richland. Rock Sauk.	2,000 3,500 2,500 6,000 10,000 10,000	6,000	\$10,000 10,000 10,000 5,000	2,000 800 1,500
	mount loaned	• • • • • • • • • • • •	• • • • • • •	•••••		\$91,100 86,600 127,700

### PRODUCTIVE FUNDS.

The total amounts of the several productive funds under our supervision at the close of the fiscal year ending September 30, 1870, were as follows:

## SCHOOL FUND.

Amount due on mortgages	\$526,542 204,385 1,559 700	02
Total productive fund	·	
Showing an increase in the productive fund during \$53,213.14.  The changes in the first two items, of the product		
compared with the same items September 80, 1869, ha		
duced as follows:	-	
Amount due on certificates of sale, September 80, 1869  Decreased by payments	\$516,252 34,448	
Increased by new certificates of sale	\$481,809 44,733	
Amount due on certificates of sale, September, 30, 1870	\$526,542	49
Amount due on mortgages, Sept. 30, 1869	·	• • •
Increased by new loans	\$155,385 49,000	
Amount due on mortgages, Sept. 30, 1870	<b>\$204,885</b>	02
UNIVERSITY FUND.	•	
Amount due on certificates of sale	6,792 111,000 19,000	00 00 00
Total productive fund	<b>\$208,866</b>	14

Showing an increase in the productive fund during the year of \$1,168.

The changes in the first two items of the productive fund, as compared with the same items, Sept. 30, 1869, have been produced as follows:

as ioliows:	
Amount due on certificates of sale, Sept. 80, 1869	
Increased by new certificates of sale	\$68,795 14 8,879 00
Amount due on certificates of sale, Sept. 80, 1870	\$67,074 14
Amount due on mortgages, Sept. 30, 1869	\$5,792 00 1,000 00
Amount due on mortgages, Sept. 30, 1870	\$6,792 00
NORMAL SCHOOL FUND.	
Amount due on certificates of sale	126,001 50
Total productive fund	\$671,802 49
Showing an increase in the productive fund during \$32,860 50.	·
The changes in the first two items of the production compared with the same items, Sept. 20, 1869, have been as follows:	•
Amount due on certificates of sale, Sept. 80, 1869	
Increased by new certificates of sale	\$62;409 99 8,891 00
Amount due on certificates, Sept. 80, 1870	\$86,800 99
Amount due on mortgages, Sept. 80, 1869	\$94,755 00 8,758 50
	-

## AGRICULTURAL COLLEGE FUND.

Amount due on cirtificates of sale  Amount due on mortgages, (new loans)	6,100 00 88,600 00
Total productive fund	\$159,846 20
Showing an increase in the productive fund during \$72,819 80.  The changes in the first, third and fourth items of the fund as compared with the same items, Sept. 30, 1869,	e productive
produced as follows:	
Amount due on certificates of sale, Sept. 30, 1869  Decreased by payments	\$72,526 40 1,886 00
	\$70,690 40
Increased by new certificates of sale	42,955 80
Amount due on certificates of sale, Sept. 80, 1870	\$113,646 20
Amount due on certificates of indebtedness, Sept. 30, 1869 Increased by new certificates of indebtedness	\$8,000 00 80,600 00
Amount due, Sept. 30, 1870	\$33,600 00
Amount due on Dane county bonds, Sept. 30, 1869  Decreased by payments	\$11,000 00 5,000 00
Amount due, Sept. 30, 1870	\$6,000 00
DRAINAGE FUND.	
Amount due on certificates of sale	. \$25,662 98
This fund has been decreased by payments and feefe	itures as fol-
lows:	
Amount due on certificates of sale, Sept. 80, 1869	0
·	2,452 00
Total productive fund, Sept. 80, 1870	. \$25,669 98

The following statement shows the changes in the several productive funds from September 30, 1869, to September 30, 1870:

Sept. 30, 1869.	Sept. 80, 1870.
\$2,237,414 8	7 \$2,290,627 51
202,698 1	
688,941 9	•
86,526 4	•
\$3,165,580 9	88,325,642 84
	<del></del>

Showing a total increase in the productive trust funds, during the fiscal year, of \$160,061.44.

## TRUSTEES' REPORT.

To His Excellency LUCIUS FAIRCHILD,

Governor of the State of Wisconsin:

Z,

The trustees of the Wisconsin State Hospital for the Insane take pleasure in submitting to you their Eleventh Annual Report.

We would call special attention to the able report of the superintendent to the Board. The tables embodied in this report present as complete history of the operations of the Hospital, not only for the past year, but for the whole period of its existence and the facts therein contained must be of great interest to the people of the state.

The number of patients in the hospital at the date of the last report was three hundred and sixty-four. One hundred and sixty-eight have been admitted since, making a total of five hundred and thirty under treatment during the year. The average number in the hospital during the year was three hundred and sixty-two; the highest number at any time three hundred and seventy-six, and the lowest number three hundred and fifty-three.

The health of the patients has generally been good. Notwithstanding the extreme heat of the past summer, there has been no unusual sickness or epidemic desease in the hospital.

It offords us pleasure to state that the financial affairs of the hospital have been well managed during the past year, and that we are not only out of debt, but the unexspended balance of last winters' appropriation wil. be sufficient to meet the current expenses of the first quarter of the next fiscal year, thus saving the disagreeable necessity of asking of the legislature an appropriation to cover deficiences.

This state of things is especially gratifying in view of the fact that quite a number of greatly needed and important improvements have been made and fully paid for, within the year, among which we may mention the following: A water tank—a matter of the utmost importance to the safty and well being of the hospitalhas been put in at a trifle over six hundred dollars; additions have been made to the library to the amount of five hundred dollars; temporary sheds for sheltering straw and for other purposes have been erected at an expense of about three hundred dollars; substantial and commodious root cellars have been constructed, costing seven hundred and seventy five dollars; the laundry has been enlarged at cost of a little over four hundred dollars; a wood house has been erected at an expense of two hundred dollars; new seats have been put in the chapel at a cost of two hundred and ninety-five dollars; about three hundred and eighty dollars have been expended in fencing the new farm; a new boiler has been purchased and set in its place, at a cost of nearly seventeen hundred dollars; airing courts and sidewalks have been built, screens and guards put up, and other miner improvements made at an expense of eleven hundred and fifty dollars.

A Turkish bath has been prepared at an expense of one thousand dollars. A special appropriation was made to cover this expense.

In accordance with reccommendation of the legislative committee on charitable and benevolent institutions an item of eight thousand and two hundred dollars was included in the last winters' approprition for the purpose of purchasing additional lands.

Two purchases have been made during the year, of value and importance to the hospital. One, a purchase of seventy-nine acres adjoining the hospital property on the north and west and extending to the lake. This was purchased for six thousand dollars, being one thousand dollars less than was estimated by the committee of the legislature. This tract is mostly good farming land, and makes a valuable addition to the hospital farm. It also furnishes a most convenient and desirable site for the new farm barn, which is something not possessed before the purchase of this tract.

The other purchase was of a tract adjoining the lands of the hospital on the north, containing between nine and ten acres, for

which the sum of four hundred dollars was paid. This affords an excellent site for a cemetery for the use of the hospital, something that has been greatly needed for a long time.

In the early part of the season the Rev. T. B. Van Horn, an experienced landscape gardener was employed to survey and plat the hospital grounds, with a view of preparing a working plan for laying out the grounds. A very beautiful artistic plan was prepared by Mr. Van Horn and submitted to the trustees at their semi-annual meeting held in May last. The plan gave great satisfaction and was adopted by the board, and an order passed that all work in future, in laying out and ornamenting the grounds of the hospital, should be done in accordance with this plan. Its completion will be the work of years, and it is the calculation that it can be done very targely by the surplus labor of the hospital teams, and the working patients, with but a small outlay of money from the hospital funds.

We would respectfully ask of the legislature appropriations for the ensuing year as follows:

For the support of patients, and for ordinary repairs		\$80,000.00
For clothing for patients	• •	5,000.00
		6,000.00
For screws, window guards and furniture		
For continuing sewers to the lake		
For two additional wings		
Total	• • •	\$197,200.00

The average number of patients in the hospital during the past year was three hundred and sixty. The number of the insane in the State is now so large that it is safe to calculate that the hospie tal will always be filled to its utmost capacity, and the experienc of the past has show that eighty thousand dollars will be required for current expenses, with the hospital filled. The call for clothing-by the patients is increasing every year. As the fact becomes known that the State will and does supply clothing, less and less is done by the friends of the patients to supply their wants in this direction. The order of the Trustees to the Superintendent is, that no one in the institution must be allowed to suffer for the want of suitable clothing, and the result is that the demand has become so great that we deem it best to ask for a specific appropriation f

five thousand dollars for the purpose of supplying clothing to the patients.

The hospital is in urgent need of a barn. Something over a year since, a site was selected, stone hauled, and the foundation laid for a barn. The site was undesirable but was the best we had at the time. The legislative committee regarded the location selected as so objectionable, that they recommended a suspension of work until a more eligible site could be procured. A very desirable one was found, but it was on land not owned by the hospital. It has, however, been purchased since, and the only objection to the speedy erection of the barn has thus been removed. It is hoped that all will see the importance of an appropriation for this purpose. It is thought that six thousand dollars is the smallest sum that will erect a barn of sufficient capacity for the present and prospective wants of the hospital.

The screens, window guards, and furniture, for which an appropriation of two thousand dollars is asked, are very much needed for the convenience and comfort of the patients.

The sewers now discharge their contents upon the surface of the ground in front of the hospital, creating a nuisance that should be removed by extending them so that they will discharge into the lake. An appropriation of four thousand two hundred dollars will, enable this to be done.

The necessity for more extended accommodations for the insane is urgent and imperative. Much has been done in this direction, and yet strange as it may seem there are now in the state outside of the hespital provided for their reception, three or four times as many insane persons as there were at the time the first efficient measures were adopted to make provision for this unfortunate class of individuals. Notwithstanding all that has been done, there are nearly as many insane persons in our state to-day out of the hospital as there are in it. There is most pressing necessity that provision should be made for the accommodation of a portion at least of those now out of the hospital as speedily as possible. Let it not be hought for a moment that the enlargement of this hospital is asked with any view of postponeing the erection of the new hospital. This board have been from the first most earnest advocates of its

erection. Our position has been such that we could see and appreciate its necessity. The present building is full to overflowing, and there are hundreds who cannot be admitted.

Must these hundreds wait until the new hospital can be completed? It will be two years at least before it can opened for the reception of patients, while the enlargement of the present hospital can be completed in a little over one year, and let the additions to the present hospital be as large as they may, on the completion of the new hospital, there will be enough still out seeking for admission to to fill it to its utmost capacity.

We would urge the importance of this enlargement:

Because accommodations for one hundred patients can be First. secured in this way in about one-half the time they can be secured in This thing of time is a matter of the utmost importany other. The history of the treatment of the insane has developed the fact, that the hope of speedy cure is almost entirely dependent upon their being placed under treatment as soon as possible after the commencement of the attack. The proportion of cures among those who are early placed under treatment is very large, while in those cases where it is left to become chronic, the proportion is very small. Table No. 9. in the report of the superintendent will throw considerable light upon this point. The delay of a single year in providing for the accommodation of one hundred insame persons will without doubt result in the confirmed insanity of scores who otherwise might be speedily cured.

Second. Because accommodations for one hundred patients can not only be secured much sooner in this way that in any other, but they can be secured at much less expense. There is to be no center building erected for the accommodation of officers; there is to be no new system planned and carried out, but simply an attachment made to systems already in existence; no new engines to be purchased; no laundry to be built; no new officers to be employed, but every dollar expended will go directly to provide for the accommodation of more patients; and then when these accommodations are provided, the expense of the support of the additional patients will be much less than it would be anywhere else, for several years at least.

Third. We would present some considerations in favor of the enlargement of the present hospital, that are both of a humane and economical character.

There are hundreds of insane persons in the state that need to be provided for. Humanity demands that this provision be made as soon as possible. If we can provide for them in one year or eighteen months, what valid excuse have we for putting off this provision two years or two and a half? How many recent cases that might be speedily cured, may by the delay become hopelessly insane? What good excuse can we offer for allowing so many to pass from a state where they can easily be restored to one of incurability? To pursue this course of delay will be the worst possible economy. We would call special attention to that portion of the report of the superintendent where he shows the comparative cost to the state of the chronic cases with those that have left the hospital restored.

F

The whole number of patients who have enjoyed the benefits of the hospital is 1,828. The average annual cost of support per patient, on the daily average for the ten years the hospital has been open, has been \$224.42. Since the opening of the hospital 421 have been discharged as recovered. The records of the hospital show that the average time spent in the hospital for each of these cases was seven months. The entire support of these 421 cases cost the state \$55,113.80, and the average cost for each cuse was Now compare the cost of these 421 cases that left the hospital recovered with that of 106 incurable cases. Nearly three_ eights of the entire cost of the whole 1,323 patients that have been in the hospital, has been for these 106 incurable cases. The average cost of each one has been \$1,515.48, and the aggregate cost \$160,640.52, or nearly three times the amount spent for the 421 cases recoverd.

Twenty-seven of these cases, 23 of whom are still in the hospital, have cost an aggregate of \$57,012.54, or \$1,898.94 more than the aggregate cost of the 421 cases who have recovered.

It will be noticed that quite a number of these cases are still in the hospital, and the state may yet be compelled to expend tens of thousands of dollars more in their care and support, rendering the contrast between the cost of the curable and incurable cases still more marked.

To add the two additional wings will be but to carry out the original plan of the building and to place it in the power of the Superintendent to make a much more perfect classification of the patients.

For years past, and perhaps we may say almost from the time the hospital was first opened for the reception of patients, there has been on the part of many a strong opposition to the enlargement of the present building owing to the inaccessibility of the location. This objection is now removed by the construction of the Madison and Baraboo railroad and the establishment of a station within about a half a mile of the hospital building. Several of the Commissioners, who have recently visited various sections of the state, with a view of selecting a site for the new hospital, have frequently made the remark that all things considered, now that a railroad station has been established so near, they saw no place during their travels that combined so many advantages for a site for hospital for the insane as the one where this hospital is located, and gentlemen who have had the opportunity of visiting many of the hospitals in the different States of the Union have stated that the location of ours will compare favorably with the most eligible in the land.

This fact with the additional one, that we have a large and productive farm furnish strong reasons why the building should be enlarged, so as to furnish accommodations for the greatest number that can be advantageously provided for in one establishment.

There is doubtless a very general feeling throughout the state that exceeding liberal provision has been made for the care of the insane; but is not this an erroneous impression? In the erection of the present hospital the people have acknowledged the obligation to provide for this unfortunate class of our fellow citizens. But what is the limit of this obligation?

If there seven hundred insane persons in the state that cannot be safely and comfortably provided for by their freinds, what obligation is there upon the people to make provision for three or four hundred of them that does not equally demand that provision be made for the remaining three or four hundred? Why is it that this matter has been so long overlooked? Why is it that accommodations

for the insane have not been increased in proportion to the increase of their numbers?

There has been no complaint in days past of useless expenditure in this direction. The press, ever watchful of the public interests, has never complained that too much was being done to sustain this our greatest and most important public charity. The people have never complained that they have been called upon to pay too much tax for the support of this unfortunate class, but have always seemed willing, if not anxious, that the most liberal provision should be made for the support, at the public expense, of all who could not be comfortably provided for in some other way.

We repeat the question: Why is it that this matter has been so long overlooked? Have the representatives of the people in the legislature manifested the interest in this subject that its importance demands? Has the Board done its full duty? Has it not failed to present the claims of this unfortunate class more especially under their care, with that urgency and faithfulness the character of these claims required? Can there be a question in the mind of any one who will look at the matter candidly, as to the propriety and necessity of the immediate enlargement of the hospital as now Shall the million of people of our great State, with property assessed at nearly four hundred and fifty-six millions of dollars, themselves in the enjoyment of the inestimable blessing of reason, shall they refuse to provide for the safety and comfort of the few hundreds of unfortunates in their midst? One-fortieth of one per cent. on the assessed value of the property of the State will pay the expense of the enlargement we ask for; and will not the people of the State willingly, gladly contribute this small amount to provide speedy accommodation for one hundred insane now suffering among their friends or in the jails and poor houses of the State? And, after the wings are completed, one two-hundredth part of one per cent. on the assessed value of the State will pay the annual expense of the support of the additional one hundred thus provided And will not the people of the State joyfully contribute this insignificant sum for such a praiseworthy object?

We leave this matter in the hands of the legislature, with full confidence that they will take that liberal and enlightened action that the nature of the case so strongly demands.

The Madison and Baraboo railroad passes through the northeast corner of the hospital farm, a distance of about 110 rods. The company have shown a spirit of accommodation in locating a station at the nearest practical point for the accommodation of the hospital, and at a point too where it will be of comparatively little use to any others than to those who have occasion to visit the hospital, and in order that the liberal action of the company may be suitably acknowledged, we recommend the passage of a law by the legislature, granting to the road free right of way through the hospital lands.

Attention is respectfully called to the statements in the Superintendent's report relative to the products of the farm, and the advantage to the patients from outdoor labor such as they have in working on the farm.

In addition to the benefits derived by the patients from labor of this kind, it will be noticed that the clear profits of the farm products during the past year amount to five thousand two hundred and eighty-five dollars and seventy-four cents, being more than forty per cent. on the original cost of all the lands belonging to the hospital! This fact furnishes strong evidence in support of the wisdom of the legislature in authorizing the purchase of the additions to the hospital farm, and we trust this liberal policy on the part of the legislature will prevail until one or two other tracts of land in the immediate vicinity become the property of the state.

We take pleasure in repeating our expression of confidence in the officers in immediate charge of the hospital, and in expressing the belief that the institution, in all its departments, is managed with prudence and discretion, and for the best good of those for whose benefit it was established. The closet scrutiny, by the legislature, into the entire management of the hospital, is desired by the trustees.

Respectfully submitted, on behalf of the Board of Trustees,

H. H. GILES,

President, &c.

F. S. LAWBENCE, Secretary.

Madison, Octobor 11, 1870.

## SUPERINTENDENT'S REPORT.

To the Trustees of the Wisconsin State Hospital for the Insane:

GENTLEMEN:—In compliance with the law governing the hospital, I herewith present the Eleventh Annual Report of the Superintendent.

In reviewing the brief period so quickly passed since our last annual report and summing up the results for the year just closed, we trust that our labors have not been fruitless; that by the blessings of an Allwise Providence something has been done to ameliorte the condition and restore the health of those committed to our care: that none of those serious accidents to which institutions of this kind are peculiarly liable have befallen us; that no unusual sickness or epidemic decease has invaded our household; that a fair proportion of those under treatment have been restored to health and their homes; that the general health and hygienic condition of the house has at all times been excellent. The mortuary list, though large, the percentage of deaths has not been above the general average. A large portion of those who died during the year were chronic cases, some of them of long standing, in whom there existed but little hope of recovery.

For a summary of the operations of the hospital for the year you are referred to the following tables with the explanatory remarks which accompanie them.

TABLE No. 1,

Showing the general results during the year.

	Males.	Females.	Total.
Patients in hospital at date of last report	185	179	364
Admitted during the year	82	86	168
Whole number under treatment	267	265	532
Discharged, recovered	81	22	58
Discharged, improved	21	20	41
Discharged, not improved	'22	24	46
Discharged, died	18	14	82
Whole number discharged	92	80	172
Remaining September 30, 1870	175	185	360

At the date of last report there were three hundred and sixty-four patients in the hospital, of whom one hundred and eighty-five were males, and one hundred and seventy-nine were females.

There has been admitted during the year, one hundred and sixty eight—eighty-two males, and eighty-six females.

The total number in the hospital during the year was five hundred and thirty-two—two hundred and sixty-seven males, and two hundred and sixty-five females.

The highest number at any time during the year, was three hundred and seventy six—one hundred and eighty-nine males, and one hundred and eighty-seven females.

The lowest number during the year was three hundred and fifty-three—one hundred and seventy-four males, and and hundred and seventy-nine females, and the average number for the year was three hundred and sixty-two.

There has been one hundred and seventy-two discharges and deaths—ninety-two males, and eighty females—leaving at the end of the year three hundred and sixty patients in the hospital—one hundred and seventy-five males, and one hundred and eighty five females.

Of the one-bundred and seventy-two discharges, fifty-three have been discharged as recovered, forty-one as improved, forty-six unimproved, and thirty-two have died.

Of the fifty-three recoveries, thirty-one were males and twentytwo were females. Of the males, sixteen were married, thirteen were single and one widower. Of the females, twelve were married, five were single and five were widows.

One of those discharged recovered, was under fifteen years of age, three between fifteen and twenty, seventeen between twenty and thirty, thirteen between thirty and forty, fourteen between forty and fifty, and fifty-two between fifty and sixty, and three between sixty and seventy years of age; seventeen of those discharged recovered, were under treatment less than three months, fifteen between three and six months, sixteen between six and twelve months, four between one and two years, and one was under treatment over two years.

Of the forty-one discharged improved, many had so far recovered that they could be comfortably cared for at home and were removed at the request of friends; some of whom, had their residence in the hospital been prolonged, undoubtedly would have recovered.

Those discharged unimproved, were either patients who had been in the hospital for many years, or chronic cases admitted when the last addition to the hospital was being filled with patients, forty of whom were discharged to make room for recent or acute cases to whom the law gives the preference.

Thirty-two patients have died during the year—eighteen males and fourteen females. Of these deaths two resulted from exhaustion from acute mania, nine from exhaustion from chronic mania, five from pulmonary consumption, three from dysentery, three from paralysis, two from marasmus, two from epilepsy, and one each from diabetes, apoplexy, suicide, peritonetis, typhomania and gastroenteretis.

•	1 -	Aug. 20	O	8	_		Sep. 8	Sep. 10	Sep. 10		Sep. 14						Sep. 23	

For the fiscal year ending September 80, 1870, I have audited for bills which orders have been drawn on the treasurer, for \$87,-863.31.

Of this sum, \$80,518.37, was for the ordinary current expenses, including clothing for patients, repairs to the building and furniture; supplying the wear and destruction to bedding, crockery, cutlery, &c., and improvements on the grounds.

The following are the principal items for which this expenditure was made:

Wages	•	
Fuel		
Lights and oil	. 1,218	
Farm and barn expenses; implements and ropairs		
1,611 bushels oats		18
1,409 bushels corn	659	47
49,337 lbs. meal	716	06
475 barrels flour	2,095	23
27,0701 lbs. butter	6,179	16
8,505 dozen eggs	520	57
117,816 lbs. beef cattle	4,921	85
7,801 lbs. fish	502	65
2,567 lbs. cheese	402	00
13,072 lbs. brown sugar		81
8,125 lbs. whitedo		
9 barrels syrup	•	
184\(\frac{1}{4}\) lbs. honey		96
1,281 lbs. tea		_
3,409 lbs. coffee		
1,976 lbs. crackers		_
1,920 lhs. rice		
1,718 lbs. poultry		
Oysters		
Green and dried fruits	- <b>-</b> -	
Spice and small groceries, salt, &c	517	
Vinegar	97	-
Soap	667	-
Drugs, medicines and liquors	2,250	-
	671

Repairs on building and furniture	1,831	
Repairs on boilers and heating apparatus	1,055	
Miscellaneous	947	ŧΛ
· ·	400 ×10	
Total	₱50,010 (	=

I have also audited bills amounting to \$7,344.94, expended for the following purposes, for a part of which specific provision had been made:

New water tank	• •	\$608	93
Addition to library		505	84
Temporary sheds	• •	291	77
Root cellar		774	.88
Addition to laundry	• •	409	
Turkish bath	• •	1,011	
Wood house	• •	296	-
Seat in chapel	• •	295	
New boiler and setting	• •	1,689	
Pencing new farm	• •	879	
Airing courts, side walks, screens, guards and other improvement	. 8	1,152	87
	4		
	_	87,844	94
	_		

I have received from the following sources \$1,941.03, which I have paid to the Treasurer:

Refunded freight on coal	804	64
<u>-</u>	1,941	08

The construction of a new water tank, new boiler, addition to the library, seats for chapel and temporary sheds, were subjects of special recommendation by the committee on charitable and benevolent institutions of the last legislature, and for which special amounts were designated in making up the appropriation for the use of the hospital. The Turkish bath was the object of a special appropriation.

The other purposes for which the expenditures last mentioned were incurred were all much needed improvements. This was especially the case in regard to the new vegetable cellar; a convenience long needed, was a place for storing vegetables outside of the hospital building. Previous to the construction of the new cellar, all vegetables for the immediate use of the household had to be kept in the basement under the wards, the odor from them not unfrequently tainting the air of the whole building.

The wood house was also a much needed convenience, and the addition to the laundry had become a necessity, to provide more 4—Iss. Hos. [Doc. 5.]

room to accomplish the work pertaining to that department for our enlarged household.

Other works of improvement about the building, on the grounds and farm have been steadily carried on during the season, the principal part of the labor of which has been performed by the patients. We have grubbed and prepared for crops eighteen acres on the new farm, and have built over one mile of good substantial post and board fence.

In the early part of the season, by the direction of the trustees, Thos. B. Van Horn, Esq., an experienced landscape gardener, was employed to make a survey and plat of the grounds with the view to furnish a working plan to be carried out at some future time, as means and opportunity will be offered.

Mr. Van Horn has presented us an artistically prepared working plan of great merit, which we hope to see carried into effect at no distant day. But as it is a work of time to perfect any plan of ornamentation, and as this much desired work of improvement had been already too long neglected, I deemed it important that it should be commenced without further delay. In August I commenced work on the avenues, with such help as could be spared from the labor on the farm, and shall continue work on these improvements until the close of the season, with the working force that can be spared from other necessary objects.

Our grounds are ample and well adapted for the purposes designed—with a gentle southern slope from the building to the water's edge, the beautiful lake in front, the commanding view afforded from the building of the city beyond the lake, and the surrounding country, where busy life in its active form can be witnessed, and the seclusion and isolation, so important to an institution of this kind, preserved.

To carry out the plans of improvement contemplated; which I trust will be done with as little delay as possible, a small expenditure of money each year, will be required; and I certainly can conceive of no one object in which the outlay of a small sum will so-complish more good than in improving, beautifying and adorning these grounds, which, with their great natural beauty, enables them so easily to be made one of the most picturesque spots in all the

land, where this unfortunate class can resort for recreation and amusement, protected from the intrusions of the idle and the curious.

In connection with the improvements of the grounds, a green house and conservatory should be built, and the sewers which now terminate in open drains should be continued to the lake.

I have procured wire guards and placed across the corridors in two of the wards occupied by female patients, which are not only ornamental but serve the two-fold purpose of offering a protection to a variety of fine house-plants now kept in the wards, and protecting the windows from being injured by those outbursts of destructive violence so frequently occurring among the patients. I would reccommend them as a desirable improvement to be supplied to all the wards, when the funds for that purpose can be obtained.

I have also procured a sample of galvanized wire screen guard for the protection of the windows in the rooms occupied by violent and destructive patients, and reccommend them as a decided improvment over the close window shutters used for the same purpose.

The lower floor in the old wing occupied by male patients is much decayed and may require renewing during the coming year.

The repairs to the building and furniture in an institution for the insane are incessant, on account of the mutilation and damage done by maniacal, destructive and filthy patients, and to keep the building and furniture in good repair, that source of expenses will be increased each year in proportion to the age of the building.

Ten years have now clapsed since the hospital was opened for the reception of patients. And as requests for information are frequently made respecting the erection of the institution and its workings, which can only be obtained by reference to various legislative documents and previous reports of the officers of the hospital, and even then the information, thus somewhat laboriously obtained, is not always in a form to be made available—at least to the members of the legislature during the few busy weeks of the session. These considerations have suggested to me the propriety of preparing a brief sketch to show at a glance the provision made by the state for the care and treatment of her insane, and what has been accomplished in the ten years the hospital has been open for the reception of patients.

The first recommendation I find for state aid to provide for the care of the insane is in the first annual message of Gov. Wm. A. Barstow to the legislature, in 1854, in these words:

"I call your attention to the necessity of taking the preliminary steps for the erection of an asylum for the insane. The number in our state suffering from the effects of insanity is, in my judgment, sufficient to demand that something should be done for their relief. This disease requires a treatment peculiar to itself; a treatment the afflicted can receive only in institutions established expressly for that purpose."

The subject was referred in the senate to the committee on state affairs, which consisted of D. S. Vittum, A. M. Blair and Chaa. A. Eldridge. This committee presented an elaborate report, accompanied by "a bill to provide for a State Lunatic Asylum." They had evidently given the subject of insanity and hospitals for its treatment, much thoughtful consideration, and their report, sixteen years ago, contains much that is applicable to our present condition as regards provisions for treatment of the insane. They say on this subject there is a general and profound interest existing in the state. "From every quarter, from the press of every political party, from individuals of all pursuits and classes, without a single dissenting voice, we hear an expression of the warmest feeling, that no further delay should be made for taking measures for relieving the insane. * * * * *

"These insane persons must of necessity be wandering about our streets and fields, or confined in our jails, or in the custody of their friends. Those who are running at large endanger the public safety, and are in no way of recovery. As to those who are in charge of their friends, on one point there is a great uniformity of opinion among medical men in regard to their treatment, and that is, the importance of separating the patient from his family and customary associations.

"The legislature needs no high-wrought picture of the intense misery to which the poor lunatic is subjected who is incarcerated in the cold, cheerless, sunless, fireless cells of a jail."

Quoting from a report to the legislature of Massachusetts, they

continue: "Were a system to be devised whose express object it would be to drive every victim of insanity beyond the limits of hope, it would scarcely be in the power of man to suggest one more infallible in its general tendency than that which has been, is now, and will be in practical operation among us so long as we are destitute of asylum provision for the insane

"In view of this immense mass of unmitigated misery, the question occurs, what can be done for its alleviation? Happily for us, this question is not left for our own solution. It is a principle universally admitted that the only hope of restoring the insane to soundness of mind, exists in the agency of institutions in which they are separated from the community, and subjected to a course of medical and moral management very peculiar and wonderfully successful."

The committee concluded their report by saying:

"Believing that duty, no less than justice, mercy and true economy, demand the establishment of an asylum."

The urgency of this appeal has lost none of its force by the lapse of time. This report, in 1854, says, from the best information that can be obtained, it may safely be estimated that there are at the present time more than one hundred insane persons in this state needing the care of a public institution.

The bill reported by this committee became a law during that session, having passed the senate unanimously.

The law of 1854 provided for the appointment of three commissioners by the governor, to select a site and contract for the erection of a building, which, "shall be constructed in accordance with the plan of the Worcester Hospital for the insane; provided, that said commissioners shall have power to make any alterations therein which they may think necessary, which will not materially change said plan or increase the cost of said building."

This act also provided for the appointment of a superintendent, who should be an educated physician; he should be secretary to the board of commissioners and superintend the erection of the building. He was also directed to collect such information in relation to similar institutions as he may think proper, and lay the same

before the commissioners. An appropriation of \$15,000 was made to defray the expenses under the provisions of this act.

Under the provisions of this act D. S. Vittum, Dr. S. G. Bugh and A. S. Sanborn were appointed commissioners, and Dr. Geo. R. McLean superintendent.

The commissioners selected for a site the farm on which the present building is located, entered into a contract for the erection of a building, and the contractor commenced excavating for the foundation about six hundred feet south of where the present building now stands. But the commissioners, with the superintendent, after a careful examination of the subject, wisely concluded to adopt a plan of building more in accordance with the improved style of construction, and much better adapted for the purposes of a hospital for the insane, than the Worcester building—adopted the identical plan on which the present hospital buildings have been erected.

This deviation from the provisions of the law in regard to the plan of the building, together with rumors that the interests of the State had not been properly protected in making the contract, induced the legislature of 1855 to appoint a committee to inquire into the manner in which the contract was made, and whether it contemplated such a building as was specified by the act authorizing the erection of an Asylum. The committee reported that the commissioners had exceeded their authority; that the building contracted for was not such a building as the law authorized to be erected. The legislature repealed the law of 1854, and all work under the contract between A. Proudfit, the contractor, and the commissioners, was suspended

In 1856 a law was passed providing for a settlement of the claim of A. Proudfit, growing out of the contract under the law of 1854, and T. O. Howe, Fred. S. Lovell and Wm. Pitt Lynde were appointed commissioners to examine, hear and determine Mr. Proudfit's claim, and award to him what they deemed just and equitable.

The commissioners awarded Mr. Proudfit \$7,482, and there was also expended in connection with this settlement for commissioners' services, expenses and attorneys' fees, the sum of \$4,435.10.

This first effort on the part of the State to provide for the care

of the insane, cost twenty-seven thousand one hundred and two dollars and twenty-six cents, (\$27,102.26), as follows:

1854—L. J. Farwell, 104 80-100 acres land	\$1,500	00
appointed under the law of 1854	5.254	98
M. Martin, clearing grounds	400	00
A. Proudfit, on contract	8.080	20
1856—A. Proudfit, on settlement of his claim under the contract with the commissioners	7,482	00
Commissioners' services, expenses and attorneys' fees in connection with this settlement	4,485	10
Total	B27,102	26

The next movement on the part of the legislature to provide for the care of the insane, and which resulted in the erection of the present building, was in 1857, by the passage of "an act to provide for a State Hospital for the Insane."

This act provided that "the aggregate cost of the institution, with the location, when completed, shall not exceed the sum of one hundred thousand dollars," and appropriated thirty-five thousand dollars with which to commence the work.

Under the provisions of this act, Messrs. L. J. Farwell, Levi Sterling and John P. McGregor were appointed building commissioners, and under their superintendence the center building and one longitudinal and one transverse wing—one section on the east side of the center building, was erected.

This part of the building was completed and opened for the reception of patients in July, 1860.

In 1861 an act was passed providing for the erection of one section of one longitudinal and one transverse wing, on the west side of the center building, and appropriating forty thousand dollars for that purpose This section was completed and opened for the reception of patients in July, 1862. In 1866 an act was passed providing for the erection of one longitudinal and one transverse wing on each side. These last additions were completed and opened for the admission of patients in June, 1868.

In 1859 an act was passed entitled "an act to provide for the government of the Wisconsin State Hospital for the Insane." In 1860 this act was repealed, and the present organic act for the gov-

ernment of the hospital, under which the present board is asting, was passed.

Section 8 of this act, chapter 263, general laws of 1860, provides that "all insane persons who are residents of this state, who may be admitted into said hospital, shall be maintained therein at the expense of the state."

In 1866 an act was passed—chapter 105, general laws of 1866—requiring those who had the ability, to pay for their maintenance while inmates of the hospital. The act also provided that those who could procure from the county judge a certificate of inability to pay for their support in the hospital, should be maintained therein at the expense of the state.

On the 1st of October, 1866, the superintendent reports 180 patients in the hospital, and out of that number only 28 patients—18 per cent. of the whole number—paying for their maintenance.

In 1867, the legislature repealed the law of 1866, leaving the state to provide for the entire expense of supporting the hospital.

The following summary shows the appropriation made each year, the purposes for which it was appropriated, the receipts from other sources; the amount expended each year and the purposes for which it was expended; the cost of the lands belonging to the hospital, with the buildings and cut-buildings, furnishing and furniture, and improvements made on the grounds connected therewith, and the amount expended yearly for the support of patients, and for all other purposes:

TABULAR	Years	1854 6. 1857 6. 1858 1869 1869 1869

* Includes expenses of Investigating Committee, and Executive Committee, superintending building of wings.

From an examination of the items from which the preceding summary is condensed, I find the center building and the first section on the east side; together with laundry, engine house, boilers, air ducts, heating apparatus and furnishing the building for the reception of patients, exclusive of the site and the amount expended under the first contract, cost one hundred and sixty-one thousand eight hundred and twenty-eight dollars and seven cents, (\$161,828.07,) and provided accommodations for about ninety patients, by using a portion of the center building for that purpose; and the time occupied in building and preparing for the reception of patients, from the time the appropriation was made was three years and four months. The first patient was admitted July 14, 1860.

The next portion of the building, the first section on the west of the centre, was commenced in 1861, and completed and opened for the admission of patients in July, 1862, and with the heating apparatus and furniture requisite for its occupancy, cost forty-eight thousand one hundred and ten dollars and ninety-eight cents, (\$48,110.98) and afforded accommodations for seventy-five patients.

The next and last additions to the hospital building, one section on each side, was commenced in 1866 and opened for the admission of patients in June, 1868, and with the additional boilers, heating apparatus, furnishing and furniture ready for its occupancy—part of which was not procured until 1869—cost one hundred and forty-eight thousand six hundred and sixty-five dollars and five cents, (\$148,665.05) and provided accommodations for one hundred and thirty-five more patients.

There has also been expended at different periods, for the purchase of one hundred and eighty-nine acres of land, fencing and improvements on grounds, stables and other out-buildings, bakery, concrete floors in basement, sewers, cisterns, airing courts, side-walks, for extraordinary repairs, such as work on boilers after the explosion of 1868, repairing and re-painting the center building and old wards in 1868 and 1869, replacing the wood floors of the bath rooms and water closets with marble tiling, and other changes and improvements made in the building, forty-six thousand six hundred and sixty dollars and seventy-three cents, (\$46,660 78).

There is now connected with the hospital two hundred and ninety-three acres of land, on which, with the buildings and improvements connected therewith, including the amount expended on the first contract, the State has expended four hundred and thirty-two thousand three hundred and ten dollars and five cents, (\$432,310 05,) and provided accommodations for three hundred patients together with the officers and employes necessarially connected with the establishment.

There has been expended in the care and support of patients inoluding ordinary repairs to the buildings and the wear and tear of bedding and furniture, four hundred and forty five thousand one hundred and twenty-three dollars and seventy-four cents.

The following table gives the annual and weekly expenses, on the daily average number, of supporting patients each year since the opening of the hospital:

TABLE No. 15.

Showing the whole number of patients each year, the average number, the number at the end of each year, the current expenses for each year, and the annual expense of each patient per week for each year the hospital has been in operation.

Year.	Whole No.	Average No.	No aten of year.	dCurrent expeases		Annual ex pense per patient.

		1,988		\$445,124	74		,

In connection with the item of expenditure for the care and support of patients, there are some facts obtained from an examination of the records of the hospital, not without interest to the political economist, and the legislature, with whom rests the duty of providing for the care of the dependent classes.

The whole number of cases admitted to the benefits of the hospital is 1,323; and the aggregate time spent in the hospital, to the close of the present year, is 1,983 years.

The total amount expended for the support of those patients is \$445,123.74. The average annual cost of support per patient, on the daily average in the hospital for the ten years, has been \$224.42.

There have been discharged or have died 963 cases; of these, 421 cases have been discharged as recovered.

I find from the records of the hospital that the aggregate time spent in the hospital by these 421 cases, was 245 years and 7 months, and the average time for each case was seven months.

The entire cost of support for these 421 cases who have recovered is \$55,118.80, and the average cost of support for each case is \$130.91.

The following summary shows the aggregate time spent in the hospital, and the aggregate and average cost of support of 106 incurable cases, each of whom it has already cost over one thousand dollars for support; none of whom have recovered, but have either heen discharged as not recovered, or are still remaining in the hospital:

Caser.	Time in hospital.	Aggregate time in hospital.	Aggregate cost of cases.	Average cost of each case.	
8 12 7 11 80 17 21	do8 and 9.do.	115do 4.do 58do 7 mo's. 190do.:11.do	25,883 18 18,016 86 18,209 12 42,845 70 20,019 25	\$2,264 12 2,156 98 1,859 48 1,655 87 1,428 19 1,177 60 1,078 77	
106	•	716 years 3 mo's.	\$160,640 82	\$1,515 48	

From the preceding statement we find that of the total amount expended for the care and support of 1,828 cases who have been admitted, nearly three-eights of it has been expended for these 106 cases. The average cost of each has been \$1,515.48, and the aggregate cost of their support has been \$160,640.82, or nearly three times the amount expended for the care and treatment of 421 cases who have recovered.

Further, that 27 of these cases—23 of whom are still in the hospital—have cost an aggregate of \$57,022.54, or \$1,898.74 more than the aggregate cost of the 421 cases who have recovered.

The preceding statements contain nothing new as to the relative cost of treatment and support for the curable and incurable cases, but presents facts which are familiar to all who are engaged in the treatment and care of the insane, and which are realized in every state hospital—that the great burden of expenditures are for the support of the life-long cases, and not for those who are cured.

From these facts we may learn that in our efforts to lighten the burdens imposed on the public for the treatment and support of the insane, the first step to be taken, is to provide for the proper treatment and care of all acute cases, and see that none are permitted to pass into the chronic stage, through neglect or want of timely care, and thereby, as far as possible, prevent the number of the chronic insane from being added to.

If the public could be brought to realize the vital importance of early treatment in insanity, and be impressed with the fact that in its early stages it is one of the most curable of the nervous disorders, and in its chronic stages but little amenable to treatment, the great amount of the expense for the support of the chronic insane could be saved, and many unfortunate victims of this direful malady would be restored to their families and to usefulness and happiness, instead of dragging out a life of helplessness and misery—a constant source of anxiety and grief to their friends.

While we believe it the duty of the state to provide for the care of all the insane within its borders, who are not in a condition to be cared for in private families; with facts like these before us, it becomes a duty of the highest importance, to provide for the proper treatment of all acute cases, and thereby in a great measure arrest the prolific source of chronic insanity.

This can only in a measure be accomplished by giving preference to acute cases in admissions to this hospital. To do it fully, requires that more room should be provided without delay.

During the past year this hospital has been constantly overcrowded, and cases have been denied admission who were not only proper subjects for hospital care, but whom it was a hardship to turn away.

We have always deemed it our duty to admit all recent cases, and to do this I have been obliged, during the year just closed, to send home to be cared for by their friends or by the county authorities, forty one old chronic cases, in whom there existed but very remote hopes of any further improvement; and besides this, I have frequently been obliged to make up from tweuty to twenty-five extra beds, often been compelled to place them in the day rooms at night, and remove them each day. It was only by resorting to such expedients as this we were able to extend the benefits of the hospital to so great a number through the entire year.

While I am fully aware that this over-crowding impairs the general operations of a hospital and affects its usefulness unfavorably, still in view of the many urgent cases demanding immediate treatment, I have felt justified in admitting so many, though by so doing we seriously interfere with the comfort and efficiency of the wards and impose greatly increased labors and responsibilities on the officers and attendants. But it has been deemed preferable that some risk and inconvenience should be incureed, rather than that recent cases should be denied admission until the period of curability had passed.

And here, in this connection, it might not be deemed improper to examine and see how those who are charged with the responsible duty of previding for the care of this most unfortunate class, have discharged that important trust.

In 1854, the senate committee on State affairs say, there are now over one hundred in sane persons in the State requiring hospital care.

The census of this year, which is not entirely complete, show that there are now about seven hundred insane perrons in this state. Three hundred and fifty can be cared for in this hospital, leaving about the same number unprovided with hospital accommodations. We also gather from the census returns that a large number of the insane are in jails and poor-houses, where they are doomed to languish out a miserable existence, in these abodes of wretchedness and filth, and the others are either cared for in private families, or wandering about through the fields and highways, a source of continual anxiety to their friends and the community, not unfrequently

5-In. Hos.

[Doc. 5.]

endangering the peace and welfare of society and the lives of their friends.

Sixteen years ago, when we were just emerging from our territorial condition, weak and undeveloped, if the wants of the one hundred insane warranted the urgent appeal in their behalf contained in the report of the senate committee on state affairs, before quoted from, and justified the senate in voting unanimously for an appropriation for a hospital, now that we have grown to be a great and prosperous state, and have largely increased in all the elements of material wealth and prosperity, how much more strongly does the claims of those still unprovided with hospital accommodations appeal to the legislature for relief.

With these facts before them, it is hoped that no further delay will be had in providing the means to properly care for this most unfortunate dependent class.

How can this be most speedily accomplished, is a question of grave importance.

While the work on the new hospital, for the erection of which the preliminary steps have already been taken, should be vigorously pushed forward to completion, I still entertain the views expressed in my last annual report, "That the fact should not be overlooked that accommodations can be provided for one hundred more patients by additions to the present building, at a less cost than they can be provided for in any other way at present; and in making additions to the present building, they should be constructed with special reference to the care and management of the more excited and violent The facilities for a better classification thus afforded by recases. lieving the present wards of the more excited and violent cases, would greatly enhance the usefulness of the present hospital." Now that the only objections to the location of the present hospital buildings—difficulty of access and remoteness from a railroad—are obviated by the building of the Madison and Baraboo railroad, passing through the farm connected with the hospital, and with a station within a half mile of the building, I feel justified in urging that immediate action be taken to provide for the erection of an additional section on each end of the present buildings. tions were contemplated in the original plan for this hospital. They are required to afford the necessary room for a complete classification of cases, and will not make the building unwieldly in size.

An additional reason for urging that immediate measures be taken for the erection of these additions to this building, is that they can be built and completed for the admission of patients one year before any portion of the new hospital will be ready for occupancy.

This conclusion is justified from the history of the erection of other hospitals as well as our own. In the erection of this hospital it was three years and four months from the time the appropriation was made to commence the work with, until it was opened for the admission of patients. Were an appropriation made in the early part of the coming session for the erection of these additions they could be completed for the occupancy of patients by the middle of the summer of 1872.

Additional room for the accommodation of the employes, not engaged in the immediate care of the patients, has become a pressing necessity which cannot be longer delayed, without seriously impairing the efficiency of the organization, and interfering with the comfort not only of the officers but of all employed.

The original plan of this building contemplated that the employes should be accommodated—one sex on each side—on the first floor of the first section on each side of the center building, but this room was taken for the accommodation of patients, leaving the employes a d officer to be accommodated in the center building, a survey only of the purposes for which this building is used will be sufficient to demonstrate its inadequacy to comfortably accommodate the officers and employes for whom no other provision is afforded.

Besides, the construction of the building is such that no separation of the classes or sexes is afforded, for there is but one stairway, which has to be used in common by all classes of both officers and employes. While this condition of things remains unchanged, it is utterly impossible to enforce that order and discipline which should always prevail in an establishment of this kind. Neither can the officers be exempt from those disturbing influences, or have afforded to them that seclusion, quietness and repose after their fre-

quently exhausting labors, which are so essentially requisite to a high degree of physical and mental health.

Rooms are also needed for a sewing-room—outside of the wards—a tailor shop, a room in which to assort clothing after it is returned from the launary—a general store-room—none of which are provided for in the present buildings.

The room necessary for these purposes, as well as for the accommodation of the employes can be provided by the erection of a separate building in the rear of the center, better than in any other way, and in its construction reference should be had to making room for the removal of the general kitchen, bakery and steward's office at no distant day.

The committee of the last legislature on charitable and benovelent institutions, recommended that work on the new barn then commenced, be suspended and that lands adjoining the hospital grounds be purchased, which would afford a better location for the barn and other out buildings. A part of these lands have been purchased, and it is now desirable that a large farm barn should be built without further delay.

The number of patients whose entire supply of clothing has to be furnished by the state has become so great that this item materially affects the allowance for current expenses, and until provision is made for the supply, from some other source, it must be met by an allowance for that purpose.

For the fiscal year ending Sept. 80, 1871, there will be needed the support of patients, and ordinary repairs, exclusive of	<b>*</b> 00 000 00
clothing for patients	5,000 00
Clothing for patients	6,000 00
To continue sewer to lake, 1,400 feet	4,200 00
For landscape gardening and green-house	1,000 00
For screens, window guards and furniture	2,000-00
	\$98,200 00

The products of the farm and garden, although not so abundant as last year, on account of the drouth in the early part of the sesson, are still sufficient to well repay the labor and expense bestowed on their cultivation, and furnish our household with a supply of necessary articles that would be very difficult to obtain in any other

way. Besides this it has furnished useful employment for a large number of patients that would else have gone unemployed.

The value of labor in an institution for the insane cannot be measured by the amount of its productive industry alone. It confers invaluable benefits on the individual engaged that is seldom obtained through any other agency. Dr. Pliny Earle, after more than a quarter of a century's experience in the management and treatment of the insane, on the subject of moral treatment, observes in regard to the value of labor as a remedial agent: "Of all these measures or agents, that which has become universally recognised as the most extensively and generally beneficial, is useful manual labor. So important is this, other things being equal, the insane person formerly accustomed to labor with his hands, is much more likely to recover than the insane person not so accustomed; because the former can generally be induced to work, while the latter as generally absolutely rojects it."

"Labor requires and gives exercise, the great prerequisite and conservator of bodily health in both the sane and the insane. It gives, like a safety valve to steam, harmless escape to unnatural excitement. It invigorates digestion, stimulates all the vital organs to a wholesome performance of their functions, and produces sleep—that universal necessity to health. It recalls the mind from its vagaries and concentrates it more or less upon a rational subject. Every moment of such abstraction and concentration is a point gained; and although these results at first may be rare and few, yet, in many cases, by the force of habit, or of will, or of returning bodily health, or of all combined, they become more and more frequent and numerous, until reason gains the victory over unreason."

There is no kind of plabor so well adapted to the capacity of patients, or in which they can be so profitably employed as in agriculture and horticulture, in the production of these crops in which a large amount of simple hand labor, is required. In the work on the farm and garden during the past year it has been largely employed, and besides the farm labor the patients have performed a large amount of work in removing the earth in the rear of the build-

ing, grading and making roads, grubbing and clearing on the new farm, taking out stumps and stones on the old farm, etc.

This will be evidenced, in part at least, by the value of our farm products, compared with the cost, to the State, of their production, as will be seen by the following statement.

The steward has furnished me with the subjoined list of the productions of the farm for the year and the cost of conducting it.

Through the generosity and kindness of the proprietors, we have received through the year, the following newspapers:

Green Bay Advocate, Oshkosh Northwestern, Oshkosh Times, Fond du Lac Commonwealth, Waupun Leader, Berlin Courant, Appleton Volksfreund, (German,) Watertown Democrat, Watertown Republican, Jefferson Banner. Sheboygan Times, Richland County Republican, La Crosse Leader, La Crosse Republican, Chippewa Herald, Janesville Gazette, Beloit Journal. Racine Advocate,

Racine Journal,
Grant County Herald,
Dodgeville Chronicle,
Burlington Standard,
Monroe Sentinel,
Maine State Press,

And from the office of the Madison Democrat a large bundle of exchanges each week.

Dr. John T. Wilson, who had acceptably discharged the duties of first assistant physician for three and a half years, left the service of the hospital in March last, to engage in other business. The vacancy thus made was filled by the appointment of Edward G. Marshall, M. D., who during the preceding three years, had occupied the position of assistant physician at the Michigan Asylum for the Insane, at Kalamazoo. Since here he has performed his duties to my entire satisfaction. No other change in the corps of officers has been made during the year. Those now occupying these places are naturally qualified for their respective positions, and from experience have acquired that important practical knowledge of their duties which can be gained no other way.

To my associates in office, who with me have shared the cares and responsibilities of the institution, for their faithful and intelligent co-operation in our endeavors to ameliorate the condition of those under our charge, I am largely indebted for whatever of success has attended our efforts.

The attendants to whom is committed the immediate care of the patients, also merit commendation, having generally been faithful and efficient in the discharge of their arduous and responsible duties.

In conclusion, there only remains to me, gentlemen, the pleasing duty of thanking you for your uniform kindness and support extended to me personally, and for the continued interest you have manifested for the welfare of those unfortunate persons under our mutual charge.

A. S. MoDILL,
Superintendent.

September 30, 1870.

#### REPORT OF EXECUTIVE COMMITTEE.

### To the Trustees of the Wisconsin State Hospital for the Insane.

GENTLEMEN:—The Executive Committe would respectfully report that they have andited accounts and authorized orders to be drawn upon the current expense fund since the last annual meeting as follows:

The committee have also authorized the purchase of additional land, as follows:

From Michael Pauli, "Seventy-nine acres, to be taken off the south side of that part of the southeast quarter of section 27, town 8, north of range 9 east, lying east of the Catfish river, and off the south end of west half of southwest quarter of section 26, in town and range aforesaid, to be taken off by a line running parallel with the south line of said section."

The legislature at its last session appropriated the sum of \$8,200 for the purchase of additional land.

١

The committee authorised the drawing of an order upon this fund in favor of Michael Pauli for the sum of \$6,000, in full payment for the above described laud.

At a meeting of the committee held May 5th, the following record of their action was made:

"After examining the hospital grounds with a view of selecting a suitable spot for a cemetery, in accordance with the instructions of the trustees, the committee and superintendent were unanimous in the opinion that it was desirable to purchase a ten acre lot, adjoining land now owned by the hospital, belonging to Mr. Judge, whereupon it was

"Resolved, That said tract of ten acres be purchased, provided it can be had for a sum not exceeding forty dollars per acre, and in the event it can be purchased within that limit, that the cemetery be located on the north west corner thereof."

Mr. Judge having accepted the offer of the committee on the receipt of a deed for the same on the 8th day August, the committee authorized an order to be drawn on the land fund in favor of Michael Judge, for the sum of \$400, in full payment for said ten acre tract.

Abstracts of title of both tracts of land were procured, which with the deeds, after being recorded were deposited with the treasurer of the hospital.

The laundry has been enlarged by the superintendent with the advice of the executive committee, in accordance with the action of the trustees, at their annual meeting, and we think the work done cannot fail to meet with the approval of the board.

The committee have been unable to purchase from Mr. Woodward the strip of land on the west side of his farm, desired for the purpose of changing the entrance to the hospital grounds. The unreasonable price he asks for the land-\$2.000—is an indication to the committe that he is unwilling to dispose of it.

At a meeting of the committee held May 5, they entered the following upon their records:

"The committee recommend the superintendent to employ Rev: T. B. VanHorn for such length of time as he, the superintendent, may deem necessary, to aid in the commencement of the work, in in carrying into execution the plan adopted by the trustees for laying out the hospital grounds."

The action taken by the superintendent in accordance with this recommendation, and the progress he has made in the contemplated improvement of the hospital grounds, will doubtless be fully set forth in his annual report to the trustees.

An excellent cellar for storing vegetables has been erected in the rear of the center building during the past year. We think the work is well done, and that it will meet with the approval of the trustees.

The committee have made their usual visits to the hospital as required by the by-laws, and from the examinations they have made from time to time they are satisfied that the officers and employees

are generally diligent and faithful in the discharge of the duties imposed upon them, and that we all have good reason to be well satisfied with the management and progress of the institution committed to our charge.

So far as the committee are advised of the views of the superintendent relative to an enlargement of the hospital, and to the erection of a building in the rear of the center building for cooking purposes, for sleeping accommodation for the male help and for other purposes, they are prepared to give them a cordial endorsement.

Respectfully submitted,

SAMUEL D. HASTINGS, E. W. YOUNG, WM. R. TAYLOR,

Executive Committee.

Madison, October 11, 1870.

# TREASURER'S REPORT.

# To the Trustees of the Wisconsin State Hospital for the Insane:

The undersigned, treasurer, submits the following annual report:

On the first of October, 1869, there was a cash balance in the treasury amounting to the sum of	\$2,219 101,200 1,941	00
Making a total	\$105,360	78
I have paid out during the year in redemptiom of orders issued by the secretary		26
Leaving balance in treasury of	\$9,298	47

There is also remaining in the State treasury a balance of the appropriation of last winter of twelve thousand dollars, making the amount now applicable to the payment of current expenses \$21,296.47.

Accompanying this report is a detailed statement of disbursements, marked "A."

All of which is respectfully submitted.

SIMEON MILLS,

Treasurer.

#### REPORT OF VISITING COMMITTEE.

To the Trustees of the Wisconsin State Hospital for the Insane—

GENTLEMEN: As chairman, by appointment, of the visiting committee for the five months past, I respectfully submit the following brief report:

The committee for the months of May, June and July, with the exception of Chas. D. Robinson, Esq., made their regular visits of inspection, but to my regret, I was unable to meet the committee of August and September.

So far as I am at liberty to speak for the committee first named, it will be almost a repetition of their sentiments, already spread upon the record book of the institution. All the wards and departments of the hospital were visited and examined. The assistant physician, (the superintendent being necessarily absent) and steward accompanied us and courteously imparted all information as to the government and discipline, the general principles of treatment, medical and moral; the method of keeping the statistical history of the institution, and record of cases and their progress, etc., we The patients in their personal attire, and the could desire. appointment of their rooms, showed perfect cleanliness and order-To this important condition no doubt may be attributed the excellent sanitary record during the protracted hot weather of the present summer.

To one somewhat accustomed to walk the wards of a general hospital, it was very gratifying to observe, as we mingled with the unfortunate inmates, their grateful recognition of their medical attendant, and, I may add too, the kindly tone and manner of address of the latter.

The deportment of the immediate and constant attendants, whose labors of watchfulness by day and by night cannot be too highly

appreciated if faithfully performed, indicated a patient care of their respective charges. The superintendent who can obtain employees of this class, who can temper firm control over their darkened and irresponsible minds, with a patient tenderness that flows from a sympathetic appreciation of their afflicted condition, has secured one indispensible element of success in the treatment of the insane.

But the observations of three short visits to such an institution, and the necessarily superficial examinations of its extensive details, and the slight acquaintance, however pleasant, with its official directory, will not justify me, if so disposed, in lavish encomiums. Yet, while I know how easily we may be deceived as to the "inner life" of such institutions, I should be unjust to my own impressions of this noble state charity and the efficiency of its management, if it did not record my belief that your honorable board had made a wise selection of its resident officers.

E. MORGAN,
Chairman.

## REPORT OF AUDITING COMMITTEE. ·

š

Wisconsin State Hospital for the Insane, Madison, Oct 11, 1870.

To the Board of Trustees for the Wisconsin Hospital for the Insane:

The undersigned, auditing committee, would respectfully report that, in accordance with the duties imposed upon them by the by-laws, they have caused a "careful and critical examination of the books and vouchers of the treasurer," as well as his annual report submitted to them by the board, and everything has been found correct. The vouchers in possession of the treasurer have been examined and found to correspond with the amounts he has reported to have been paid out by him; and said vouchers have been duly canceled.

The books of the superintendent of the hospital have also been carefully examined. The original bills for articles purchased during the year, have been looked over with care, item by item, and compared with the orders drawn for their payment, and all have been found correct.

In the general management of the hospital, it gives the committee much pleasure to state, that great satisfaction has been given by the officers in charge. The institution has become an extensive one; it requires a large amount of money to defray its annual expenses; and it is highly important, that those having in charge its finances, should be persons of correct business habits, and of the strictest integrity. From the examination of the affairs of the hospital, that your committee has been able to make, it is but just to say, that the officers in charge during the past year, have possessed in a high degree, the necessary qualifications for an able and faithful discharge

of the several duties required of them. These duties have been performed with fidelity, and greatly to the advantage of the State, as well as to the unfortunate inmates of the hospital.

Improvements about the building and grounds, have been made during the fiscal year just closed, as rapidly as the funds appropriated for such purposes would permit. It will require time and considerable money to do all in this direction that would be desirable. But it is a great satisfaction to your committee, as it should be to the people of the state, to know that the Wisconsin Hospital for the Insane, ranks high among the institutions of the kind in this country. It is, comparatively a new institution; but it has few superiors. Under its present management, the people have abundant reason for complete satisfaction.

DAVID ATWOOD,
YATES ASHLEY,
Auditing Committee.

# SECRETARY'S REPORT.

To the Trustees of the Wisconsin State Hospital for the Insane:

GENTLEMEN—I berewith submit a detailed statement of warrants drawn by me on the hospital treasurer for the year ending September 30, 1870.

Respectfully submitted,

F. S. LAWRENCE,
Secretary.

### TRUSTEES' REPORT.

To His Excellency LUCIUS FAIRCHILD,

Governor of the State of Wisconsin:

The Board of Trustees of the Soldiers' Orphans' Home of Wisconsin herewith respectfully present their Fifth Annual Report.

There was appropriated by the last Legislature for current expenses for the year, the sum of forty thousand dollars, and for the purchase of a library, the sum of two hundred dollars. The financial report of the Superintendent herewith submitted gives a detailed statement of the amount expended and the items of expenditure. We are gratified in being able to report a more satisfactory financial state of the Institution. Its present management appears to be more economical than formerly, while there is a marked improvement in the general appearance of the Institution, and a greater degree of comfort and contentment among its inmates. In accordance with an act of the last Legislature, six of the pupils of the Home were selected from a number recommended by the State Superintendent of Public Instruction, and placed in the State Normal School located at Whitewater, where they are now pursuing their studies with a view of becoming qualified for teaching. a matter of doubt, whether the amount appropriated for this object will be sufficient, and we respectfully recommend that the act be so amended that the Trustees may use a larger amount, should it be found necessary—say not to exceed fifty dollars for each pupil.

There will be needed for the coming year an appropriation of forty thousand dollars for current expenses. We do not deem it safe to estimate for a smaller amount, although we hope to be able to show a balance on hand at the end of the next fiscal year. A

reference to the report of the Physician will show that the inmates of the Institution have during the past year been blessed with health in a remarkable degree.

During the past year nearly all applications for admission coming within the rules prescribed by law have been accepted; and we are of opinion that the present capacity of the Institution is sufficient to accommodate all admissible applicants. For much information of an interesting nature and the data required for a complete understanding of the workings of the Institution we respectfully refer to the annexed reports of the officers of the Home.

In conclusion we feel under obligations to express our thanks to the officers and teachers of the Home for the fidelity they have exhibited in the discharge of their respective duties, and for the deep interest they have evinced in the welfare of the unfortunate children committed to their charge.

N. M. LITTLEJOHN,

President Board of Trustees.

C. K. PIER, Secretary.

#### EXECUTIVE COMMITTEE'S REPORT.

To the Board of Trustees of the Soldiers' Orphans Home:

GENTLEMEN:—Your Executive Committee would submit the following report of the disbursements of the fund of \$8,500 00, appropriated by the legislature of 1869 for the purpose of repairs and replacing the property destroyed by fire.

At the date of last report there had been expended \$4,587.17 leaving a balance of the fund unexpended of \$3,912.83. The improvements in progress at that time were soon after completed, and there was a balance left of \$307.30, which was transferred to the general fund. For an itemized account of the expenditures, we refer to the vouchers on file with the State Treasurer and Superintendent of the Home.

We are glad to state that the financial, sanitary and moral condition of the Home is highly satisfactory, and we believe it to be successfully carrying out the objects for which it was established.

Respectfully submitted,

N. M. LITTLEJOHN, HENRY HARNDEN, JAMES PINTLIFF.

## SUPERINTENDENT'S REPORT.

To the Trustees of the Soldiers' Orphans' Home of Wisconsin:

GENTLEMEN:—I respectfully present the following as the report of the Institution for the year ending September 30, 1870:

Number of children in the Home at the date of the last report Admitted since theu	
•	
Total	
Of this number there have been discharged	79
Number belonging to the Home September 80, 1870	959
Applications on file accepted	13
Total number belouging to the Home	265

The name and history of each child received during the past year is as follows:

- JULIA WORTLEY—aged 9 years, daughter of Valentine Wortley, 18th regiment, died in military service, mother dead, entered October 5th, 1869, by B. S. Kerrs, from Monroe, Green Co.
- Betsey Jameson—aged 7 years, daughter of Silver Jameson, 27th regiment, died at Little Rock, Ark., mother in poor house, entered October 13th, by H. M. Warner, sup't of poor, Black Earth, Dane Co.
- MATILDA HOWARD—aged 8 years, daughter of James Howard, 20th regiment, died at Prairie Grove, Ark., entered March 81st, by mother, Madison, Wis.
- ORRIS P. LANGDON—aged 11 years, son of Frederick Langdon, 11th regiment, died at St. Louis, Mo., entered October 9th, 1869. by mother, Cambria, Wis.

- AUGUSTA CORDIER—aged 9 years, daughter of Adolph Cordier, 26th regiment, died at Milwaukee, entered October 14th, by H. Cordier, Waupun, Wis.
- KATIR CORDIER—aged 7 years—as above.
- ELLA MARY SHUKS—aged 5 years, daughter of William Shuks, 2d regiment, died in the Wilderness, entered Oct. 25th, by G. W. Dutton, guardian, Madison.
- ELLSWORTH McDonald—aged 8 years, son of Clark McDonald, 1st regiment, died at Danville, entered November 18th, by mother, Burnett, Dodge Co.
- ALBERT BACON—aged 12 years, son of Daniel S. Bacon, 3d battery, died at Hamburg hospital, Tenn., Nov. 22d, entered by mother, Wassoya, Dodge Co.
- WILLARD BACON—aged 9 years, as above.
- LEWIS B. DUCHER—aged 11 years, son of Nathaniel Ducher, 12th regiment, died at Natchez, Miss., entered November 23d, by mother. Milwaukee, Wis.
- ELLEN WHITE—aged ten years, daughter of Andrew White, 8th regiment, died at St. Louis, entered November 23d, by mother, Racine, Wis.
- THOMAS WHITE-aged 9 years.
- James White—agad 8 years, as above.
- RACHEL PERRY—aged 12 years, daughter of George Perry, 8th regiment, died at Eastport, entered November 24th, by mother, Brooklyn, Wis.
- James J. Perry-aged 10 years.
- CHARLES R. PERRY-aged 8 years, as above.
- HARRIET E. THORNE, aged 12 years, daughter of John G. Thorne, 29th regiment, died at Helena, Ark., entered Dec. 6th, by mother, Palmyra, Wis.
- ARTHUR J. THORNE-aged 10 years—as above.

- JOHANNA NASH—aged 3 years, daughter of Albert H. Nash, 17th regiment, died at Corinth, Miss., entered December 9th, by mother, West Prairie, Vernon Co., Wis.
- CHRISTINA NASH-aged 11 years-as above.
- Edward Nash-aged 10 years-as above.
- CHARLES CRAMER—aged 10 years, son of Wm. S. Cramer, 32d regiment, died at Nashville, Tenn., entered February 2, 1870, by mother, Burnside, Wis.
- Chas. W. Lindsley—aged 8 years, son of Whiting S. Lindsley, 35th regiment, died at Morganza, La., entered February 8th, by mother, Fond du Lac, Wis.
- Myron T. Lindsley—aged 7 years—as above.
- H. E. Damkochler—aged 6 years, son of Ernst Damkochler, 26th regiment, died in prison at Andersonville, entered Feb. 16th, by mother, Sturgeon Bay, Wis.
- CLARA E. DAMKOCHLER-aged 8 years-as above.
- HENRY FEILDS—aged 11 years, son of Stephen Feilds, 18th regiment, died at Macon Ga., entered February 20th by J. G. Palmer, gaurdian, Baraboo, Wis.
- Sam Long—aged 12 'years, son of Edward Long, 37th regiment, died at Petersburg. Va., entered Febuary 21st, by Scott Case, gaurdian, Farmington, Wis.
- Edward Long-aged 9 years-as above.
- OLIVE MAY DELAP—aged 12 years, daugter of Robert W. Delap, 30th regiment, died at Madison, Wis., entered May 4th by R. H. Delap, guardian, Viroqua, Vernon county.
- VIOLAM. MARK—aged 13 years, daughter Wm. H. MARK, 2d regiment, died at Brookville, entered May 20th by mother, Eau Galle, St. Croix county.
- EFFIR W. MARK—aged 9 years—as above.
- CATHABINE R. MARK—aged 7 years—as above.

- EDWARD DEVOR—aged 10 years, son of Amar Devoe, 29th regiment, died at Vicksburg, entered May 21st, by A. B. Devoe, Pleasant Springs.
- GEORGE PARMLEE—aged 9 years, son of Davis B. Parmlee, 38th regiment, died near City Point, Va., entered June 27th, 1870, by Robert Boyle, gaurdian, Berlin, Green Lake county.
- DANIEL HAYNES—aged 13 years, son of David Haynes. 82d, regiment, died at Jackson, Tenn., entered August 4th, by guardian, Charles Johnson, Sturgeon Bay.
- HARRISON STILWELL, aged 8 years, son of Barnet Stilwell, 32d regiment, died at Jackson, Tenn., entered August 20th, by mother, Middleton, Dane Co.
- SAMUEL BECKER, aged 8 years, son of John Becker, 35th regiment, died at Brownsville, Texas, entered August 29th, by mother, Milwaukee.
- WALTER OBMSBY, aged 9 years, son of Horace Ormsby, 22d regiment, died at Beloit, Wis., entered September 1st, by Harriet Ormsby, mother, Beloit, Wis.
- WESLEY JONES, aged 10 years, son of William Jones, 3d regiment of cavalry, died near Little Rock, entered September 1st, by Mary A. Barton, mother, Center, Rock Co.
- John A. Grar, aged 10 years, son of John H. Gear, 3d regiment, died at Dallas, Ga., entered September 3d, by Mary A. Gear, mother, Rockford. Winnebago Co.
- NENA L. BAKER, aged 2 years, daughter of William H. Baker, 8d regiment, entered September 8d, by Ellen Baker, mother, West Point, Columbia Co.
- CHARLES B. DEWREK—aged 7 years, son of John Dewrek, 52d regiment, died at Whitewater, entered September 8d, by Emily L. Dewrek, mother, Berlin, Green Lake Co.
- GEORGE CRANDALL—aged 9 years, son of Delos V. Crandall, 19th regiment, died at Fair Oaks, Va., entered September 5th, by Mary Crandall, mother, Sparta, Monroe Co.

- JOHN D. CRANDALL—aged 8 years, as above.
- MARY ANNA LESSLAYOUNG—aged 12 year, daughter of John Lessleyoung, 37th regiment, died at Pittsburg Landing, entered September 5th, by Margaret Lessleyoung, mother, Appleton, Outagamio Co.
- WILLIE HILL—aged 13 years, son of Erasmas W. Hill, 29th regiment, died at Watertown, entered September 5th, by Caroline Hill, mother, Watertown, Jefferson Co.
- GEORGE M. HAMILTON—aged 12 years, son of Andrew Hamilton, 47th regiment, died at Boscobel, entered September 9th, by Louisa Hamilton, mother, Boscobel, Grant Co.
- SEMANTHA M. OWREY—aged 11 years, daughter of Henry Owrey, 17th regiment, died at Fort Schuyler, entered September 14th, by Caroline Owrey, mother, Dunn, Dane Co.
- CHAS. S. ANGELL—aged 10 years, son of Geo. W. Angell, 10th regiment, died at Nashville, Tenn., entered September 21, by Lydia Davis, mother, Irving, Jackson Co.
- EVERAL S. STEVENS—aged 11 years, son of Alonzo Stevens, 4th regiment, died at Baton Rouge, La., entered September 23, by Susan C. Letson, mother, Hexton, Jackson Co.
- CARRIE B. STEVENS—aged 8 years—as above.
- Nellie A. Stevens—aged 6 years—as above.
- Addison Stevens—aged 10 years, son of Morrison Stevens, 19th regiment, died at Point Lookout, entered September 23d, by Margaret Stevens, mother, Springfield, Jackson Co.
- HENRY F. STEVENS—aged 8 years—as above.
- SUMBER GIFFORD—aged 13 years, son of Henry Gifford, 32d regiment, died, entered September 25, by Sidney Gifford, guardian, Packwaukee, Marquette Co.
- MARGARET LUSK, aged 11 years, daughter of Peter Lusk, 7th regiment, died in prison at Andersonville, entered Sept. 27th, by Elizabeth Wilson, mother, Madison, Dane Co.

A large number of those discharged were on account of age; others were taken home by their friends, their circumstances having changed for the better, the remainder, a few, have forfeited their places by having stayed beyond the time of their leave of absence. but from the fact that no application has been received for their readmission, the supposition is that their friends did not intend to have them return.

The sanitary condition of the Home has been, and is, better than could be expected. Since last October and November, when, as was stated in the last report, we had a few cases of scarlatina, there has not been a serious case of sickness among us, and during the past summer, when bowel complaints and kindred diseases were so so prevalent, there has not been a case sufficiently severe to keep a child in bed or from its meals for two consecutive days. We attribute the continued good health of the children, to the facts that we aim at as absolute cleanliness of person and premises as is possible; that the clothing is suited to the season; that the food, while plain is of the best of its kind, and exercise at proper hours, almost unlimited; these combined with the healthfulness of our location, and the watchfulness of our physicians, have under the providence of God, been the causes of our exemption from disease; these are facts, and challenge examination and contradiction.

There have been two deaths during the past year, that of Henry A. Morse, on Nov. 9, 1869, of congestion of the lungs, and that of Emma Bulow, on Feb. 12, 1870; she was an invalid when admitted in January, 1867, and during her long illness and decline, won, by her patient and uncomplaining disposition, the love and sympathy of all familiar with the Home. All who knew her felt that death was rest to her.

The condition of the schools will perhaps compare favorably with almost any other ones of similar grade. Four of our teachers, employed last year, left at the close of the term; their places have been supplied by others, who, in the short time in which they have been engaged, have proved themselves fully qualified for their positions. I hope and expect an abundant success to follow their labors, for the reason, among others, that they appear heartily to sympathize with their children.

School No. 1 is under the charge of Miss M. A. Babcock. They study reading, grammar, spelling, geography, arithmetic—written and mental—U. S. history, and writing.

School No 2 is taught by Miss Laura Harnden, and pursues the same studies as the one above, with the exception of history and grammar.

School No. 3 is under the charge of Miss Lottie Perry. They study reading, spelling, geography and arithmetic.

School No. 4 (primary) is under the charge of Miss Millie Brock. They are taught reading, spelling, and the elements of arithmetic.

For the reason that about twenty-six of the most advanced scholars were discharged at the close of last term, our schools may not grade so high this year, but we shall aim at as high a standard as in the past.

The music is under the charge of Miss Mary A. Paddock. We expect her labors in this department to be productive of good results.

The following are the principal text books used:

Union Readers—1 to 5 inclusive, Union Spellers, Primary Spellers,

Robinson's Prog. Practical Arithmetic, Robinson's Elements of Written Arithmetic,

Progressive Intellectual Arithmetic,

Primary Arithmetic,

Guyot's Geographies,

Wilson's U. S. History,

Kert's Grammars,

Spencerian Copy Books.

The Sunday School has become an absolute necessity; and none of those who have been or are engaged in it, would willingly consent to its relinquishment.

About the last set—and, I imagine, the most difficult one—of the Superintendent, Hon. W. E. Smith, previous to his departure for Europe, was to resign. He left with the best wishes of every adult, and, what is better, every child in the Home. Hon. Li. Breese was selected as his successor. He cheerfully consented to

act as such, and by his kindness and sympathy is earning for himself the love and respect of those under his charge.

The President of the United States having offered through Gov. Fairchild, to appoint one boy annually to the Naval School at Annapolis, Md., in May last I requested Hon. D. Worthington and Prof. O. M. Conover of Madison, and Prof. Brooks, a graduate of Yale, to examine three boys with reference to such appointment. They spent the larger part of three days, and finally concluded that while the boys passed a very creditable examination, yet their proficiency was not such as to warrant sending either one of them to Annapolis to stand the strict examination required there. This was no more than I expected, knowing as I did their limited advantages in the past, and the rigid examination they would have to undergo at the Naval School. I hardly dared hope that either one of them would be prepared to avail himself of the President's generosity. I regret it, as I think their future lives would, under the discipline of the school, have been useful to their country and honorable to themselves.

In compliance with your directions. I have given liberal but necessary outfits to the class selected by you at your last meeting for the Normal School. I accompanied them to Whitewater at the commencement of the term, and am happy to know that they have fairly entered upon their course. Knowing them as I do, I have little There is one thing in connection with this fear of their success. matter which causes regret, as you are aware. I selected eleven for examination by the state superintendent. Eight of these passed an examination which would have admitted them to the Normal School. You, having reference first to the requirement of the law that they should be taken one from each congressional district, and second, to their own necessities, selected six of that number. I regret that the other two could not have been sent also this year, as having passed the age at which they can remain here, they are no longer inmates of the Home, and of course cannot reap the benefits of the generosity of the State.

And I am reminded to say one thing here: It seems desirable that the future of the children who leave the Home, should not be entirely lost sight of. I confess to a large degree of solicitude for

their future welfare. The time between that at which they leave the Institution, and that at which they arrive at their majority, is the most critical period of their lives, and I often feel that some of those who have been so much interested in their welfare in the past, could, by their advice and sympathy, do much to direct and control their future. But this involves a large amount of correspondence, more than is possible for the clerical force of the Home—consisting as it does of myself alone—to perform.

The question is often asked me, "What do you do with the children you discharge from the Home?" I reply, that is a question we have not yet been called upon to meet, as all who have left have been provided for by their friends. When it does come, we shall endeavor to provide them with good homes. - One thing is certain; we shall not turn them into the world to shift for themselves. again, I am often applied to for boys and girls of certain specified Some appear to think that all they have to ages and conditions. do is to make the application. To such it may be well to say, that the children are placed in my charge to sed, clothe, educate and care for to the best of my ability, the means to do so being ample; and that I neither have or desire any authority beyond that. I have reasons for knowing that in many cases it would be for the interests of some of the children if they were adopted into a good family, as many of the applicants are; but there are difficulties surrounding the case which I fear are not appreciated. First, the applicant must be suited with the child. Second, I must be suited with the applicant. And third—and bardest of all—the mother, if living, must be made to feel that it will be to the interests of her little one to give it up to another. I imagine that it will be a very difficult matter to make some mothers feel this, and it is no more than can be expected. They, perhaps, are satisfied that their children, while here, are being cared for, and can remain for the time allowed by law, and their hope is that their circumstances may change so that at the end of that time they can have them again. I have done in the past, and am willing in the future to do all that I can to further the wishes of benevolent friends in this matter. It involves a large amount of correspondence; sometimes more than I have time to perform, but what I can do, will be done cheerfully.

The discipline of the Home is very good; the children as a whole, render a cheerful obedience to our wishes. Absolute perfection we neither expect or desire. They will compare favorably with a like number of children in any part of the land; there is perhaps, much less of quarrelling, or harsh, hard words among them than would be found in any commutity of children, and what little there is, is caused by the presence of a few unruly spirits. They are a robust and happy lot, and we hope while here to keep them so.

At the date of last report, our improvements and repairs were uncompleted. We had them finished before winter set in, and although doing more than was originally contemplated; such as a new boiler, a cistern holding over '800 barrels, and several smaller items, the whole was done within the appropriation of \$8,500, there being a balance left of \$307.30, which was with your consent, applied toward the purchase of a new piano. In what has been done, I know of no waste of money, but can see one or two instances of penuriousness, where a little larger outlay at first would have been true economy.

We found during the winter a want, the necessity for which we hoped would not exist, namely, a drying room. In the cold winter days it was impossible to dry the clothes in time for use, and it became absolutely necessary to have a steam drying room. We had the steam and, in part, the room; all that remained was to put up drying bars and steam pipes. The question may properly be asked, "What did the Institution do without a drying room in previous years?" It may be replied, that they did not do without one, or rather several. Part of the old wash house was partitioned off, a four-foot stove put in, and the room hung with lines for that pur-That, with the addition of large clothes bars around the kitchen and children's dining room stoves, managed to dry what clothes could not be dried out of doors. After completing our new wash house and laundry, the old one was dismantled, and became unfit for use, and of course we could not continue drying clothes It was neither safe or pleasant to do so. around stoves.

Another want developed itself; the two furnaces in the school house were found to be insufficient to warm it. An examination of them by a mechanic showed a fault in the setting; one of them was 2—Sol Orre Home.

[Doc. 6.]

so nearly burnt out as to render it very doubtful whether it would last until spring. Owing to the mildness of the season, requiring but little fire, it did so, however, but fell to pieces upon being taken down; it was impossible to force the air through the horizontal flues without opening the windows of the rooms for ventilators. We consumed about sixty tons of coal during the winter, which is perhaps more than double the amount it ought to require. replaced the one partially destroyed with a wood furnace, altered for the purpose—which was in the basement of the house, and could be dispensed with, and have taken down and reset the other. They have been done about a month, and are well dried and fit for use. The weather has been so mild that we have had no occasion to test them yet. I hope and expect they will do better service now than ever before, and with a far less amount of fuel, although owing to a lack of sufficient ventilation in the building I do not expect absolute success in warming it economically.

Ever since being here I have had to put up with the inconvenience of having no office room, and have had to keep my deak, at which all business was done, in the only private room we have. I desired to remedy it last summer during vacation, but had not time then, and was forced to defer it until this summer's vacation. I have remedied the evil, and by moving and using the old wash house, have, in addition to an office acccessible to children and all, a shoemaker shop, and sleeping room for the kitchen and laundry help, which was much needed. I think you will recognize the absolute necessity there was for the above improvements, the cost of which has been within \$1,200, and will have to be paid out of the appropriation for the current year.

The above may be included under the head of improvements, the completion of which places the Institution in pretty good condition. I do not think it will be necessary or advisable to expend much in further improvements; as in the nature of things, the "Home" will soon have accomplished the end for which it was established. Of course it will be necessary each year to expend a certain amount in order to keep the buildings in fair condition, particularly as they are not all first class. I think it would be economy to do a certain amount of painting next summer, especially on the outside. The

It will also be necessary to renew some of the shingles. The roof of the rear dormitory leaks badly. An examination of the shingles shows them to be of an inferior quality, the majority having knots in them. The government additions to the main: building were not expected to be in use until this time, and were not built with reference to stability. I have already, been obliged to put stone piers under all the posts, as they stood upon the ground and were, many of them, rotted off.

We shall also have to do something.—I hardly know what.—to prevent the wearing away of some portions of the bank of the lake, the dining room and dormitory is now so near as to make the danger of its falling down more imminent each season.

As stated in the last report, the result of remodeling the sewing department was a decided saving of money; we could effect a still further saving, if we could do all our sewing in the Home—as it ought to be—the only thing that has prevented our doing to has been a want of space for a general sewing room: Whether this want is of sufficient magnitude to be supplied, I will leave to your decision.

We are fortunate in our helpers, having but few changes; the girls as heretofore, rendering efficient aid. We miss in our domestic arrangements, as well as in other respects, our larger girls.

At the request of the executive committee, I purchased a library with the money appropriated by the legislature for that purpose. I endeavered to make judicious selections, and I think with success. The books have been covered, labelled and numbered, and are free to the use of all the children under wholesome restrictions.

I have also purchased a good piano upon favorable terms, and have had no occassion to regret the purchase; the pleasure it has already afforded the obildres, has more than repaid the outlay.

I have also adopted the plan of doing our own sobbling, and much of the shoemaking, employing one man for that purpose; some of the boys rendering efficient assistance out of school hours. During the term in which I have followed: this plan, I find that a decided saving has been effected, in addition to having the children better shod.

The question is often asked, "How long will it be necessary to

maintain the Home?" That, of course, depends upon the number of new applications. As stated above, the number at present in the Home, including applications accepted, is 265. We have now as many boys as we have sleeping room for, but have room for a few more girls. I have, in compliance with sundry requests, sent a number of blanks to various points in the State, and expect to hear from them soon. I think from present indications that the number in the coming year will be fully as large as this, and will hardly decrease for the next two years; after then it will probably be rapid. There will not be so many next year to discharge on age as there was this, as we have but few over fourteen years old. Hardly any of the applications now received are for those over twelve, ranging · from eight to twelve, indicating that children who were almost infants in the latter years of the war have been maintained by their mothers until the need of an education and better care than they could bestow, forced them to apply for the benefits of the Home. The great majority of applications are manifestly from those in very destitute circumstances, and it has always been the policy of the Executive Committee to give the preference to the most needy, beginning at the poer houses, in which there never ought to be a child.

The total amount of the receipts during the year, was \$46,870.-70; of this amount there has been expended \$3,605.58 in the completion of improvements in progress at date of last report; \$4,275-39 in paying indebtedness at close of last year; \$200 in purchase of a library, and \$35,951.40 on account of current expenses, leaving a balance in my hands on Sept. 30, of \$2,138.38. There are at this time bills unpaid not to exceed \$5,920.

We are under renewed obligations to many friends for acts of kindness and sympathy. Among them to Mrs. Cornelia Tallman, of Clinton, Wis., for an unsolicited donation of \$12.35; to several friends of Madison, through the hands of Capt. Wm Jones, for \$6 for fireworks on 4th of July, and to Rev. ————, of Mineral Point, for \$9.50. The former donation, was by advice of some members of the board, used on the 4th of July; the latter one was applied to the purchase of Sunday School papers for the children.

The following papers have been donated to the Home, for which we return our thanks, and respectfully ask a continuance of the same:

Daily State Journal,
Soldiers' Record,
Western Farmer,
Western Soldiers' Friend, (Chicago,)
Waupun Leader,
Richland County Republican,
Berlin Courant,
Janesville Gazette,
Black River Falls Banner,
Fond du Lac Commonwealth.

We are also under obligations to the Hon. S. S. Merrill for children's trip passes over the Mil. & St. P. R. R., and other favors, which are fully appreciated and gratefully acknowledged.

Finally, gentlemen, it is no mere form of words for me to express to you individually my grateful acknowledgments for your constant kindness and courtesy to myself and wife, and also for the hearty co-operation I have always received from you. If my administration of affairs has been successful, I feel it is in a great measure because of your uniform support.

Respectfully submitted,

W. P. TOWERS,
Superintendent.

#### DETAILED FINANCIAL STATEMENT.

To the Executive Committee of the Board of Trustees of the Soldiers' Orphans' Home of Wisconsin.

GENTLEMEN—The following is a detailed statement of the receipts and disbursements of the Home from October 1. 1869, to September 30, 1870, inclusive:

Pad	e.	From whom received.	Amoun	t.

# TREASURER'S REPORT.

STATE OF WISCONSIN,
TREASURER'S OFFICE,

Madison, Oct. 10, 1870.

To the Hon. the Board of Trustees of the Soldiers' Orphans' Home, of Wisconsin:

I have the honor to transmit you herewith, my report of the receipts and expenditures of the Soldier's Orphans' Home during the fiscal year ending Sept. 80, 1870.

Very respectfully,

HENRY BÆTZ,

Ex-officio Treasurer Soldiers' Orphans' Home.

Henry Batz, State Treasurer,

In account with Soldiers' Orphans' Home.

### PHYSICIANS' REPORT.

To the Trustees of the Soldiers' Orphans' Home, Madison, Wis.:

GENTLEMEN—I have the honor to report that the health of the children of the Home, from the date of my last report, until April 15, 1870, was on the whole, good. During the time we had twenty-seven cases of Scarlet Fever, from which there were no deaths.

Died of Inflammation of the Lungs, November 9, 1870, Henry A. More.

Died of Consumption, February 12, 1870, Emma Billows.

'Respectfully submitted,

JOHN FAVILL,

Physician to the Home.

Madison Nov., 18th, 1870.

To the Trustees of the Soldiers' Orphans' Home-

QENTLEMEN: I have the honor to report that since my connection with the Home, April 15, 1870, there have been no deaths.

At that time there were seventeen cases of catarrhal ophthalmia, two of impetigo, and one of scrofula. Since April there have been three cases of fracture of the arm and forearm, and several incised wounds, but no sickness that has not yielded to mild treatment. Much credit is due the superintendent for the excellent hygienic and sanitary regulations of the institution, as well as to the matron and nurse's assiduous care, the result of which is the moral and physical health of the children. At present there are no sick in the hospital.

Respectfully submitted,

A. J. WARD,

Physician to the Home.

#### LAWS OF WISCONSIN

RELATING TO

## THE SOLDIERS' ORPHANS' HOME.

AN ACT to provide a Home for the Orphans of Wisconsin Soldiers.

SECTION 1. An institution is hereby established, the name of which shall be "The Soldiers' Orphan's Home of Wisconsin."

SECTION' 2. For the purpose of providing suitable buildings for said institution, the Governor, Secretary of State, State Treasurer, and Attorney General, are hereby empowered and authorized to purchase for the state of Wisconsin, block one hundred and fifty-two (152), of the city of Madison, Dane county, according to the recorded plat thereof, together with all the buildings and improvements thereon, provided a perfect title can be acquired to the said property, for a sum not exceeding ten thousand dollars (\$10,000), the title of which shall be vested in the state of Wisconsin.

Smorrow 3. Whenever the title to said property shall be vested in the state of Wisconsin, as provided in section two of this act, the Governor shall appoint seven persons, one from each congressional district, and one from the state at large, who shall be trustees of said institution, all of whom shall be tax payers and residents of this state. They shall be styled "The Board of Trustees of the Soldiers' Orphans' Home, of Wisconsin," and a majority of them shall constitute a quorum for the transaction of business. Of those members first appointed, three shall serve for three years, two for two years and two for one year, as shall be designated by the Governor at the time of appointment, and at the expiration of these

successive terms, the vacancies shall be filled in like manner, for the term of three years; and each member shall serve until his successor shall be appointed; and should any vacancy accidentally occur by death, resignation or otherwise, the same shall be filled by appointment of the Governor, for the unexpired portion of the term for which such trustee would have been required to serve.

SECTION 4. The board of trustees shall manage and direct the affairs and concerns of the Orphans' Home, in all its general interests; and they shall make, subject to the approval of the governor, all needful by-laws and regulations for the proper administration of the said Orphans' Home, not inconsistent with the constitution and laws of this state or of the United States. The trustees shall receive no compensation for their services, but all expenses necessarily incurred by them in the performance of their duties shall be paid out of the state treasury, on the warrant of the secretary of state

SECTION 5. The said board of trustees shall appoint from their number a president and secretary, to serve for such period and to perform their duties under such regulations and restrictions as may be prescribed in their by laws. The treasurer of the state shall be ex officio treasurer of the board. The secretary shall keep a faithful record of all the transactions of the board; and the president shall have power to call extra meetings of the board, on receiving a written request to make such call from not less than two members of said board.

SECTION 6. The said board thall appoint a superintendent of the Heme, and all such other officers as may be provided for in the by-laws; and they shall fix the compensation of all the officers connected with the institution. Said board of trustees shall meet annually, on the first Tuesday of October, which shall be styled the annual meeting; and they shall also meet annually on the second Tuesday of April, which shall be styled the semi-annual meeting. At each of these regular meetings, they shall visit and examine into the affairs of the Home, and at their annual meeting they shall make a full report to the Governor of all their proceedings connected with said the Home.

SECTION 7. The board of trustees shall have power to take and hold in trust, for the use and benefit of said Home, any grant or

demise of real estate, and any donation or bequest of money, or other personal property, to be applied to the maintenance of soldiers' orphans' or the general use of the Home.

SECTION 8. The superintendent shall be the chief executive officer of the Home, and shall exercise and control all assistants necessarily connected with the institution, below the grade which may be designated in the by-laws as officers, and may employ or discharge any assistant, being responsible to the trustees for the proper discharge of that duty; and, for any satisfactory cause, the said superintendent may be discharged by an affirmative vote of a majority of all the members of said board.

SECTION 9. All soldiers' orphans who may be admitted into said Home shall be maintained therein at the expense of the state.

SECTION 10. For the purpose of distributing the benefits proposed by this act, equitably throughout the state, the board of trustees shall apportion as near as practicable, the number of orphans to be admitted from each county, upon the basis of the number of soldiers' orphans actually residing in said county; and the county board shall apportion, as near as practicable, the number to be admitted from each county between the several towns thereof, upon the basis of the returns made to the clerk of the board of supervisors, as provided by section twelve of this act.

SECTION 11. The necessary prerequisites of admission into this institution, shall be as follows: All such orphans over the age of four and under fourteen years, whose fathers, having enlisted from this state and who have either been killed or died while in the military or naval service of the United States, or of this state, during the late rebellion, or who have since died of disease contracted while in such service, and who have no means of support, shall be entitled to the benefits of this institution: provided, that those who have neither father nor mother, shall in all cases have the preference in deciding upon applications

SECTION 12. In order to carry into effect the provisions of this act, it shall be the duty of the board of trustees to furnish to the clerk of the county board of each county in this state, uniform blanks with all necessary instructions as to the manner of filling up the same, which blanks and instructions shall be distributed by the clerks of

the county boards to the chairmen of the board of supervisors of the several towns, the mayors or presidents of the incorporated cities or villages within the several counties of this state; and in all cases of doubt, the fact of the death of the father, while in military or naval service, shall be determined by the records in the office of the adjutant general of this state.

SECTION 13. Upon the acceptance by the board of trustees of any application for the admission of any orphan, the chairman of the town board of supervisors, or mayor of a city, shall make an order for the removal of such accepted child to the Orphans' Home, and shall appoint some suitable person to covey such child or childen thereto; and all necessary expenses incurred in such removal shall be paid by the county in which such child shall have a legal residence.

SECTION 14. The trustees shall appoint from their own number an executive committee, who shall perform such duties and be governed by such restrictions and regulations as may be prescribed in the by-laws, not inconsistent with the provisions of this act; and such committee shall be authorized to draw warrants upon such funds as may be from time to time appropriated to defray the expenses of said Orphans' Home, and may be directed by the trustees in conformity with this act: provided, that all warrants so drawn shall be countersigned by the secretary of state, and such warants shall designate the appropriation from which the same shall be paid.

SECTION 15. There is hereby appropriated out of any money in the state treasury not otherwise appropriated, the sum of ten thousand dollars, to pay for the property authorized to be purchased by section two of this act.

SECTION 16. This act shall take effect and be in force from and after its passage and publication.

Approved March 31, 1866.

AN ACT to amend chapter 39 of the general laws of 1866, entitled, "an act to provide a Home for the Orphans of the Wisconsin Soldiers."

SECTION 1. Section 6 of chapter 39, of the general laws of 1866, is hereby amended so as to read as follows: Section 6. The

said board shall appoint a superintendent of the Home, who shall also discharge the duties of financial agent, and such other duties as the board shall prescribe; and they shall also appoint all such other officers as may be provided for in the by-laws, and shall fix the compensation of all officers connected with the institution. Said board of trustees shall meet annually on the first Tuesday in October, which shall be styled the annual meeting, and they shall also meet annually on the second Tuesday of April, which shall be styled the semi-annual meeting. At each of these regular meetings they shall visit and examine into the affairs of the Home, and at their annual meeting they shall make a full report to the Governor of all their proceedings connected with said Home.

SECTION 2. The board of trustees of the "Home shall, by virtue of their office as trustees, be the legal guardians of all children who are now or may hereafter become inmates of the Home," and shall be authorized to receive all pensions, back pay and bounties due or to become due to any child that is now or shall hereafter become an inmate of the Home, and shall invest the same upon good security, and hold it in trust for the child or children to whom such money belongs; and such trustees shall also have power from time to time, with the assent of the Governor, to bind any child that is an inmate of the Home, for such term and for such purpose as such trustees shall deem proper and for the interest of each child respectively: provided, that in case such child shall have a parent living, the consent of such parent shall first be obtained.

SECTION 3. The board of trustees are hereby authorized to discharge from the Home any child of fifteen years of age or over, if in their opinion the interests of the institution require it, or in their opinion such child is capable of self support; but no child shall be discharged from said institution without the consent of the executive committee, and the executive committee shall not allow any parent or guardian to remove any child under fifteen years of age from the Home unless the application for such removal shall be accompanied by a certificate of the chairman of the board of supervisors of the town in which such parent or guardian resides, showing that such parent or guardian is able to support and educate such child or children, or unless the regulations or interests of said institution require the discharge of certain children.

SECTION 4. This act shall take effect and be in force from and its passage and publication.

Approved April 11, 1867.

AN ACT to provide for a course of instruction in the state normal schools for certain pupils of the Soldiers' Orphans' Home.

Home are hereby authorized and empowered to select from the most proficient and best qualified pupils of said Home, annually a number not exceeding six, and to place such pupils in one of the state normal schools, and maintain them there at the expense of the state, while such pupils are pursuing a course of instruction for the purpose of qualifying them as teachers of common schools: provided, that the expenses of so maintaining them shall not exceed two hundred dollars in full for board, clothing and books, per annum for each pupil, and that no one pupil shall be so maintained for more than two years.

Those to be placed in the normal schools for such SECTION 2. course of instruction shall be selected from the pupils of the Home in the following manner, to wit: At the request of the board of trustees of said Home, the state superintendent of public instruction shall annually examine all pupils in the Home, who are at the time of such examination, fifteen years of age or more, in regard to their scholarship and other qualifications necessary for successful teachers of common schools, and shall designate by name all those so examined who, in his opinion are qualified to enter upon such course of instruction herein provided for, and who will, by such course of instruction become successful teachers of common schools; and from the number so designated by such superintendent, the said board of trustees shall select those to be placed in the normal schools; and in making such selection from year to year, they shall distribute the benefits of this act equally, as far as practicable, among the representatives in said Home of the several congressional districts of the state.

SECTION 8. The board of trustees of said Home, shall include in their annual report for each year a detailed statement of their doings, under authority of this act, and an itemized account of all expenses incurred, and shall also deposit vouchers with the state

treasurer for all moneys expended in carrying out the provisions of this act.

SECTION 4. There is hereby annually appropriated to the board of trustees of the Soldiers' Orphans' Home of Wisconsin, from any money in the state treasury belonging to the general fund, not otherwise appropriated, a sum sufficient to carry into effect the provisions of this act.

SECTION 5. This act shall take effect and be in force from and after its passage and publication.

Approved March 11, 1870.

AN ACT to appropriate to the Boldiers' Orohans! Home a sum of money for the purchase of a library.

SECTION 1. There is hereby appropriated to the board of trustees of the Soldiers' Orphan' Home, out of any money in the state
treasury, not otherwise appropriated, the sum of two hundred
dollars annually, for the term of three years, for the purpose of purchasing and maintaining a library for the use of the pupils of the
said Home. The money hereby appropriated shall be expended under the direction of the board of trustees, or the executive committee
of said board, and an itemised report of all expenditures under this
act shall be presented in the annual report of the board of trustees.

SECTION 2. This act shall take effect and be in force from and after its passage.

Approved March 15, 1870.

JOINT RESCLUTION authorizing the board of trustees of the Soldiers Orphans' Home, to admit certain children therein named.

Resolved by the Senate the Assembly concurring, That the board of trustees of the Soldiers' Orphans' Home of Wisconsin be and they are hereby authorized to admit into that institution, and to care and provide for the four children of Mrs. Martha Thayer, whose husband is insane in consequence of wounds received at the first battle of Bull Run, and is now and has been for some time an inmate of the Wisconsin Hospital for the Insane.

Approved April 11, 1867.

### RULES, REGULATIONS AND BY-LAWS.

Smorton 1. The board of trustees shall meet at such place in the city of Madison as shall be designated by the president of said board on the first Tuesday of October annually and on the second Tuesday of April annually. The first of which meetings shall be styled the "annual meeting," and the second the "semi-annual meeting." At either of such meetings the board may adjourn to meet at any future day, if in their opinion the welfare of the Home demands such meeting to be held.

SECTION 2. Any business connected with the prosperity of the institution or the welfare of its inmates not inconsistent with the by-laws or the organic act, may be transacted at either of such regular meetings, and at all meetings of the board four members shall constitute a quorum for doing business.

SECTION 8. Special meetings may be called by the president when he shall deem it for the interests of the institution, and he shall call a special meeting upon application of two (2) members of the board. On being directed by the president it shall be the duty of the secretary to notify each member of the board, by mail or otherwise of the time at which such meeting has been appointed, and all such meetings shall be conducted as provided for conducting regular meetings.

SECTION 4. At all meetings of the board the following shall be observed as the regular order of business:

- 1st. Reading and approval of the minutes.
- 2d. Petitions and communications.
- 8d. Reports of officers of the institution.
- 4th. Reports of committees of the board.
- 5th. Business lying over.

6th. Miscellaneous or new business, including all business connected with the management of the Home not included in the above specifications.

SECTION 5. The president, vice president and secretary, ap pointed at the first meeting, shall hold their office until the next annual meeting, and until their successors are appointed and enter upon the duties of their office. At the first and at each succeeding annual meeting, the board shall elect a president, vice president and secretary, each of whom shall hold his office for the term of one year and until his successor is prepared to enter upon the duties of the same. There shall also be appointed at each annual meeting, an executive committee of three (3) members, of which the president shall be ex officio as member and chairman, of said committee.

Succion 6. It shall be the duty of the president to peside at all the meetings of the board and of the executive committee, to draw warrants on the treasurer for all amounts audited by the board or executive committee, and to exercise a general supervision over the affairs of the institution. In the absence of the president, the vice president shall possess all the powers and discharge the duties of the president.

SECTION 7. The secretary shall keep a record of all the proceedings of the board, and he shall also keep a record of all warrants drawn on the state treasury by the executive committee, and he shall report to the board at each regular meeting the number and amount of such warrants. In the absence or inability of the secretary to perform his duties the board may appoint a secretary pro tem.

SECTION 8. The state treasurer is constituted by the organic act the treasurer of this institution, and all the duties usually devolving upon this officer shall be discharged by the treasurer of the state of Wisconsin.

SECTION 9. The executive committee shall perform such duties and be governed by such regulations as may be prescribed in the by-laws and resolutions of the board, not inconsistent with the organic set. 'It shall be the duty of the executive committee, previous to the annual and semi-annual meetings of the board, to examine the books, accounts and vouchers, and settle with the officers of

the Heme, and make a full report thereof to the board. The said committee shall pass upon all applications for admission into the Home, and they may at any time direct the superintendent to discharge those children who may be of suitable age to care for themselves. The said committee shall audit all accounts and draw warrants for the payment of audited accounts, and they shall maintain a general supervision over the financial affairs of the institution, and keep the board fully advised thereof.

SECTION 10. The resident officers of the Home shall consist of a superintendent and matron, who shall reside in the institution and devote their entire time to promete the best interests of the same. Such officers shall be subject to the provisions of the by-laws and to such rules and regulations as may be at any time adopted for the government of the Home. The superintendent and matron shall not resign without giving two (2) months' notice of such intention to the president of the board.

SECTION 11. The superintendent shall be the chief executive officer of the Home, and shall employ and control the teachers, assistants, attendants and necessary employes of the institution; and may discharge any of the above named employes, being responible to the trustees for the proper discharge of his duty. The number of employes in the various departments shall be fixed by the board of trustees, and the compensation for each shall also be fixed by the board.

SECTION 12. The superintendent shall receive an annual salary of twelve hundred dollars, payable quarterly on the warrant of the executive committee. The superintendent shall prepare a code of rules and regulations for the government of persons employed in the institution, and for the government of the children admitted therein and shall see that call employes are energetic and faithful in all respects in the performance of their several duties.

SECTION 13. The superintendent shall pay strict attention to all children admitted to the Home, and see that all teachers and subordinates pay particular attention to the proper education, health and comfort of the children admitted into the institution; and no religious influence of a sectarian character shall be tolorated in the institution, but all children shall be under strict moral discipline,

but shall be allowed to attend divine service on the Sabbath wherever they may desire to or where their mother or friends may have desired. The superintendent shall organize under competent teachers, a school in which all the children shall enjoy the advantages of a thorough and complete English education.

SECTION 14. The educational department shall be under the general supervision of the superintendent, and shall be conducted by a principal and such assistant teachers as are hereafter provided for. The superintendent is authorized to employ four female teachers at a salary of twenty five dollars per month.

SECTION 15. The superintendent shall obtain as nearly as practicable a complete history of every child admitted, embracing the name, age, residence, nativity, regiment in which the father served, when and where the father died, name of the mother (if living), and what means, if any, the child has for support, and generally all facts connected with the history of the child and the parents which can be procured, all of which shall be entered in a book kept in the institution for this purpose, which shall be open to inspection at all times.

SECTION 16. All moneys received by the superintendent or by any other officer or employe which is intended for the benefit of the Home, shall be promptly paid over to the treasurer, and the party paying the same shall receive from the treasurer his receipt, and the same shall be accounted for in his settlement with the board. The superintendent shall lay before the board at each meeting an abstract statement of the condition of the institution, and at the annual meeting shall make a detailed statement of all matters of interest connected therewith, and shall transmit such report to the president of the board on or before the first day of each annual meeting, to be by him laid before the board.

SECTION 17. The board of trustees may at any time, for causes satisfactory to themselves, remove any officer connected with the institution, by a vote of a majority of all the members at a regular meeting, or by a vote of two-thirds at any special meeting.

SECTION 18. The superintendent shall have the general supervision of the buildings, appurtenances and grounds connected therewith, subject always to the control of the trustees or of the executive committee. He shall perform the general duties, and make all purchases necessary for the use of the Home, consistent with the appropriation made therefor, and shall be responsible for the safe keeping and proper use of such articles purchased. And in all cases of purchase he shall require deplicate bills of items, and shall certify upon each bill to the correctness of the same, that the articles charged were purchased by him for the use of the Home, and the prices charged are as agreed upon. He shall keep the books of the Home, and keep a faithful record of the financial transactions of the institution, and shall make a report of all his doings monthly, with a detailed statement of the expenses for the month including labor and supplies, and to perform such other duties as he may from time to time be directed to perform by the board or executive committee. All moneys which may be from time to time placed in his hands by the executive committee for disbursement, he shall faithfully account for at the close of each month, or as often as the executive committee may require.

SECTION 19. The matron shall have the care of the bouse, and it shall be her duty to see that the same is kept clean. She shall also see that the cooking, washing, and ironing, and generally all the necessary work in the building, is done properly. She shall also see that the children are well cared for and kept cleanly at all times. The matron shall receive a salary of four hundred dollars per year, payable monthly.

SECTION 20. Persons employed in the Home shall be held accountable for all their time, and no one shall be permitted to leave the institution without express permission from the superintendent. All persons employed by the institution, shall devote their whole time and attention to advance the interests of the Home, and promote the general welfare of the inmates, and no one, having contracted service shall be allowed to discontinue such service without giving the superintendent one week's notice of a design to do so. All persons asking employment about the Home must give unquestionable evidence of good moral character.

SECTION 21. All charges for malfaesance against any officer of the institution, shall be submitted to the board in writing, and a copy of such charges shall be furnished by the secretary to the person against whom the same was made, at least one week before such charge shall be acted upon by the board.

SECTION 22. Whenever the correct basis upon which to apportion the number of children to be received into the institution, as provided by the organic act, from each county, is received by the board, the number will be forthwith communicated to the clerk of the board of supervisors of each county in the state, and applicants to the number each county is entitled to, will be received, preference being given in all cases to those who have neither father nor mother and who have no means of support.

*SECTION 23. Orphans who may be admitted into this institution may be taken away by their friends or guardians, with the consent of the executive committee, upon proper representation of facts showing that the interests of the child will be promoted thereby.

SECTION 24. The officers and employes of the Home, in the discharge of their respective duties, shall not exceed the authority given them by these by-laws, and shall strictly conform to all standing resolutions of the board of trustees.

SECTION 25. These by-laws may be altered or amended by a majority vote of all the members at any regular meeting, or by a two-thirds vote at any special meeting.

SECTION 26. All applications for admission of orplans to the Soldiers' Orphans' Home, shall be approved by the chairman of the hoard of supervisors of the town, or mayor of the city, or president of any incorporated village in which the applicant may reside.

Approved May, 1, 1867.

LUCIUS FAIRCHILD,

Governor.

RESOLUTION of the board of trustees of the Soldiers' Orphans' Home.

Resolved, That the children, inmates of the Soldier's Orphans' Home, shall not be allowed to leave the institution, except they are discharged by the executive committee, unless they have a written leave of absence from the superintendent, stating the time at which such leave of absence shall terminate; and any of said in-

mates who do not return to said institution in accordance with the terms of their leave of absence, (unless the same shall have been extended by the superintendent, for cause,) shall be considered as having been discharged from the Home, and shall not be re-admitted except by vote of the board of trustees.

#### TRUSTEES' REPORT.

To His Excellency LUCIUS FAIRCHILD,

Governor of the State of Wisconsin:

The Trustees of the Wisconsin Institution for the Education of the Blind, have the honor to present the following as their twenty-first annual report. With it they transmit the usual financial reports of their secretary and treasurer, and that of the superintendent of the Institution, containing account of its educational operations and some kindred matters.

The following is a summary of the Board's receipts and disbursements for current expenses:

#### Receipts.

<b>♣</b>			
Balance in hand at date of last report		\$6,688	88
Appropriation for year ending Jan. 81, 1871		18,000	
From work department and other sources		1,074	
_		2,012	02
Total		\$25,712	35
Disbursements.			
		•	
For Salaries	<b>\$4</b> ,117 25		• • •
Wages	1,880 38		• • •
Sabsistence	4,673 98		
Fuel and light, including payments on coal of			
last winter and next winter also	8,580 98		
House furnishing	1,129 24		
Means of instruction	516 20		
· · · · · · · · · · · · · · · · · · ·	- · · · · ·		
Expenses of barn and stable	657 58	•••••	
Repairs and improvements	1,862 11	• • • • • • •	
Water	852 04		• • •
Work department	602 86		• • •
Miscellaneous-Including labor, medical ex-			
penses, insurance, postage and traveling			
expenses, laundry expenses, etc., etc	1,499 25		
<b>0-20-00, 10-200, 0-200, 000, 000</b>			
Total	\$19,872 82	• • • • • •	
Deduct credits on sundry bills	149 92		
Amount of money paid for current expenses		\$19,722	<b>4</b> 0
Balance in ourrent expense fund	• • • • • • • • • •	\$5,989	95

Out of a special appropriation for furnishing new building, \$1, 855,18 has been expended directly for the purpose; and an amount equal to the unexpended balance of \$144,82 has been paid for articles of bedding, hardware &c., for use in the new part, upon the regular current bills of the Institution. If we add this balance therefor (as seems proper) to the surrent expense balance, it will be found that the trustees have in hand \$6,134.77, applicable to the support of the Institution until January 81, 1571, It is presumed to be sufficient.

For opening communication between the cellars of the old and new parts of the house and for securing the foundation of the central part, an appropriation of \$1,500 was made. The work has been thoroughly done for \$1,400. The balance seems properly transferable to the building fund.

Work upon the extension of the house has occupied more of the time of the board than any other matter. Work upon the heating apparatus is not entirely done. Of the \$5,100 appropriated to this object \$2,995.63 have been paid out, and it is expected that the balance (\$2.104.37) will meet the remaining expenses. The building itself is practically completed, the contractors having finished their work, and only a few matters of small expense, not provided for in the contracts, remaining to be attended to.

The following is a condensed statement of receipts and disbursements for building:

Receipts.

	<b>20000 pee.</b>		
	Balance from last year	\$1,885	83
	Appropriation of 1870 for building proper	19,625	<b>00</b>
	Apprepriation for plumbing	1.575	00
•	Add balance of appropriation for passage	100	00
		\$22,685	63
	$oldsymbol{Disbursements}.$		
	To C. Busack, contractor for mason work	• • • • • • •	• •
•		• • • • • • •	
	stairs and protection for areas	•••••	• •
_	For work on iron cornice		
	For registers, etc. for ventilation, for expavation, building cisterna, for flagging, door steps, etc., and		
	for labor	• • • • • • •	• •
	For architect's services	• • • • • • •	• •
i	For plumber's work, proper	22,148	
	Relance in building fund	\$477	338

This balance will be needed to settle two or three small upsettled accounts and to provide for the little matters referred to above.

The matter of extra work done by Mr. Bussek upon area walls and coping, submitted for your sonsideration and that of the Legislative Committee last year, we are gratified to state has been amicably adjusted and settled for by the payment of \$2,450. This amount having been paid from funds already in hand, the Institution stands indebted upon final settlement to Mr. Bussek in the sum of \$2,978 50, which is due him as soon as the money can be obtained by special appropriation.

The building now completed is one in all respects ereditable to the state. It will probably afford room for the school for a score of years to come. The Trustees believe that it will resist the ordinary causes of decay for generations, perpetuating in the years when Wisconsin shall have far outgrown its present wealth and population, the memory of her early liberality to the unfortunate.

Its cost, including the amount due Mr. Busack, architect's fees, heating apparatus, plumbing, gas pipe, &c., is about \$91,000. By examination, we find that the appropriations of the state for buildings, repairs and improvements, up to this date, have been \$155,-655.00. Some of this has been expended upon buildings, improvements and fixtures now removed; but as it would cost more to creet the old buildings still in use than they originally cost, perhaps it is not very far from the truth to say that the above named sum pretty closely approximates the present value of the state's investment here in buildings and fixtures.

The suggestions of the superintendent in his report, on the subjects of water and light, are approved by the trustees. Water is, of course, essential, not only for domestic uses, but for security against fire; and it should be obtained at as little cost of money and labor as possible. It has cost over \$350.00 to supply the Institution during the past year, by drawing from the river; and even when it has been drawn into the eisterns, a considerable quantity has to be pumped to the 4th story by hand. We believe the whole work can be done most economically and effectually by the use of steam. The expense of the pump, etc. required would not

be large; but the board await the result of experiments now in progress before presenting an estimate for the consideration of the legislature.

The Institution itself and the lives of its inmates are in continued peril from the use of so many lamps. Besides the ordinary risk in the use of kerosene, it is manifest that among so many blind persons increasant care must be required to prevent accidents. This subject has been referred to in previous years, and the course of the Trustees in fitting the house while in course of erection with gas pipes has been approved. It is hoped that this winter an appropriation will made for procuring a machine for making gas, similar to those in use in other state Institutions. Such a machine with the necessary gas fixtures and a building in which to place it will cost about \$2,500.

The suggestion of the Superintendent in regard to obtaining clothing for indigent pupils, deserves the thoughtful consideration of the Legislature.

A great quantity of apparatusis needed for the proper instruction of the pupils. A certain amount of this must be obtained every year, either for the first time or to replace what is worn out, the cost of which is regarded as a constant item of current expense. Desiring, however, to precure this year a number of articles, which will be of permanent value and therefore ought not to be charged to the expense of a single year, the Trustees request a special appropriation of \$1,000 for the purpose.

The following is the estimate of the amount of money necessary for the current expenses of the Institution for the year ending Jan. 31, 1872:

For Subsistence	\$5,500 00
Salarles	4.800 00
Fuel and light	2 815 00
Wages	1,700 00
House furnishing	500 00
Means of instruction	450 00
Expenses of barn and stable	600 00
Repairs and improvements	500 00
Miscellaneous items—including work department, laundry expenses, postage and travelling expenses, medical expenses, insurance, care of grounds, labor and inciden-	,
tal expenses	1,985 00

\$18,800 00

For convenience of reference, the above named sums to be appropriated are now recapitulated:

Indebtedness for building	\$2,973 50
Lighting house with ges	2,500 00
Apparatus	
Current expenses	18,300 00
Steam pump and fixtures	

The Institution has now entered upon its twenty-first year. In the past it has fulfilled the reasonable expectations of its friends in regard to the blind, and has contributed, in its measure, to the cultivation in the breasts of the people of those noble sentiments which they have, since its establishment, manifested towards other classes of the unfortunate. At present its condition is prosperous. Our hope is that in the future it may be still more useful to the blind and creditable to the state; and to this end we invoke the continued favor of the good people of Wisconsin, and of the God who has bestowed on them the means wherewith to exercise the benevolence with which he has inspired their hearts.

Respectfully submitted,

R. B. TREAT, President.

ORBIN GUERNSBY, Secretary.

JANESVILLE, Nov. 15, 1870.

#### Respectfully submitted,

J. D. REXFORD,

Treasurer

November 15, 1870.

## REPORT OF THE SECRETARY.

To the Trustees of the Wisconsin Institution for the Education of the Blind:

GENTLEMEN: Herewith I present a statement of the orders drawn upon the treasury of the Institution from Nov. 5th, 1869 to this date. In numbering, the numbers between 2,209 and 2,800, were passed over.

Respectfully,

ORRIN GUERNSEY, Secretary.

JANESVILLE, October 25, 1870.

## DETAILED STATEMENT OF ORDERS DRAWN.

# SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Wisconsin Institution for the Education of the Blind:

GENTLEMEN:—While those who have charge of the education of the blind ought to be anxious to discover, and prompt to adopt any improvement in the manner of conducting an Institution for their benefit, yet greatest success is generally to be expected from diligent and patient application of settled principles in methods heretofore approved. This plan will, however, make the report of one year's proceedings bear so strong a resemblance to that of another as to render it, to those familiar with the general subject, quite an uninteresting document.

During the year we have endeavored to make this a pleasant home (so far as our limited accommodations admitted), for the children gathered here; to cultivate in them those habits which will make them pleasant associates; to instil those principles which will preserve them from vicious practices; to give them such intellectual training as will render them competent for the discharge of the various duties of life, and to encourage a disposition to encounter the difficulties of life resolutely and hopefully. Time alone will show—and that but imperfectly—how much has been accomplished. If our pupils shall prove to be industrious, cheerful, intelligent and virtuous members of society, it will doubtless be due in part, to the labors of this year. If they shall turn out idle, discontented, ignorant or vicious men and women, it will still be true that earnest efforts have been made to prevent it.

It is gratifying to record here the interest with which my subordinates have entered into their work, and the faithfulness with which they have performed their duties. You will be pleased also to

be assured that with a few exceptions —always to be expected—the pupils have devoted themselves to improvement with commendable energy.

As heretofore, the labor of instruction has been performed in three departments.

In the literary department, classes were conducted last term, as follows: In reading, two; in spelling, four; in writing, one using card and pencil, and one using the Braille method; in geography, three; in arithmetic, four; in grammar, algebra and physiology, one each. Each class has recited daily, for five days in the week.

This term we have the following classes provided for, viz.; In reading, three; in spelling, four; in writing, by Braille system, one; in arithmetic, four; in geography, three; in grammar, one; in algebra, natural philosophy and mental philosophy, one each.

Pressure of other duties preventing me from devoting as much time as I desired to the direct daily supervision of class instruction, the plan was adopted of having a weekly examination of some class selected at the moment by lot from the whole school. This was made as thorough as possible, and produced good results. At the close of the term the usual examination for promotion was faithfully conducted, several days being occupied in the work. In most cases the increase of knowledge and of mental discipline was satisfactory.

In the department of music, instruction has been given upon the piano, the violin, the melodeon, and in a few cases upon other instruments. For several years we have had two choirs. In the course of this year it became necessary to organize a third. Although to attend to the three we were obliged to resort to the undesirable plan of alternating one with another, so that each had three lessons one week and two the next week, still the arrangement secured on the whole greater improvement. This term, with additional help in that department, we are able to make a better arrangement. Each of the three choirs meets five times a week. cial training has been given to promising voices. Harmony has been regularly taught, and a small string band has made good pro-On the whole, the musical department is believed to be in a creditable condition. Both in this department and in that of literature, valuable assistance has been rendered by some of the more advanced pupils. The experience thus gained will be found hereafter of very great value to those who are intending to teach after leaving the Institution.

In the work department the younger girls and boys have been trained in making the bead-work common in our Institutions. This has been done not so much for the sake of learning to make the fancy articles themselves, although some pecuniary profit is often derived from this knowledge, as for the sake of the increased keenness of touch and the greater case and nimbleness of motion which the fingers attain while practising the art. A further advantage incidentally results in a cultivation of taste in matters of color and gracefulness of form. The older girls have been instructed in sewing, knitting, &c., with direct view to future useful employment and consequent happiness.

The young men have been taught broom-making. In such a State as ours (mostly devoted to agriculture, and not very thickly peopled) this business seems to present to a blind man a better prospect of future support than any other, while it gives opportunity for the acquisition of the manual dexterity requisite for doing many other things. Thus far we have taught nothing else in our shop. It seems desirable to add also, before long, instruction in putting in the seats of cane-seated chairs. Most neighborhoods contain a considerable number of these articles of furniture. A good workman might find some employment in repairing these as they wear out. If work of this kind were not sufficient to support a man, it might yet add something to his gains from other sources.

The following statement shows the amount of pecuniary profit derived from the sale of the pupils' work. In reality it but partially shows the true state of the case, since it only shows the difference between the cost of materials purchased and the amount received from sales. On the one hand it takes no account of the amount of usoful sewing done by the girls for themselves or for the house; on the other, it takes no account of the cost of instruction. This remark is made merely in explanation of what the statement purports to show; for no reflecting person will expect to estimate the worth of this training to our pupils, by the trifling amount gained or lost on the materials consumed.

### Shop.

### DR.

1869. Sept. 1. To brooms on hand	180 80
CR.  By sales	<b>66</b>
Balance in favor of shop	
Girls' Work Department.	
DB.	
1869. Sept. 1. To manufactured articles	131 28
CR.	\$3C8 10
1870. Sept. 1. By sales of work	85
Balance against Girls' work department	\$52 27

The difference between the gain in one department and loss in the other, shows on the whole a gain of \$189.79; but as said above, this showing does not fairly represent the efficiency of the department, and especially of the girls' branch of it.

The health of the school has been as good as could be reasonably expected among the class of persons who constitute it. Very few cases of illness have occurred among those who were in attendance. One pupil, however, Miss Adeline Utley, who left school in poor health the previous term, died at home after nearly a year's illness. She was a young lady of more than ordinary intellectual ability, and ranked as one of the very best scholars of the school. While we lament her early death, and sympathize with the afflicted family, it is very pleasant to record that her life here had been such as to endear her to officers and pupils, and furnish ground for the confident hope that she has gone to a better world.

The extensive building operations in the midst of which the male members of the school have been obliged to move for two years, have oreasioned the responsible officers of the Institution very great and never-ceasing anxiety and labor. The moving of materials, removal or change of position of familiar way-marks, making. of new excavations, and the destruction of fences about old ones, the careless displacing of barriers in dangerous places—these and similar things, which have been constantly occurring, have been sources of danger against which the most active vigilance could not wholly guard. Providentially, however, we succeeded in avoiding any serious accident, except in a single instance. In that case three or four of the young men, in violation of repeated injunctions, ventured up two unrailed flights of stairs and went into a remote part of the new house which they were forbidden to enter, except in the basement and first story. From this height one of them met with a perilous fall, but mercifully escaped without any broken bones.

It is needless to recount here the difficulties to which we have been subjected from lack of space for dormitories, for school rooms and for music rooms. In these respects our accommodations will soon be ample for the requirements of a number of years.

We shall now have room also for proper care of apparatus. has here ofore been useless to attempt to procure many articles much needed to facilitate the work of instruction, because there was no place in which either to keep them or properly to use 'them. Especially has there long been needed two full sets of dissected maps of the continents, and an additional hemispherical map. would furnish but two maps of a kind for the school; and when we consider that in a school for the seeing it is deemed indispensable that each pupil should have a geography and an entire atlas, certeinly one map for all our girls, and another for all our boys, cannot be thought too many. But these are expensive, since they must be prepared expressly for us by skillful workmen. necessary to ask a special appropriation for this purpose, and for the purchase of some musical apparatus. Means are also needed for the purchase of books in raised letters, of which an unusually large number have been published during the year, and of which several

others are understood to be in preparation. These books very soon go out of print and then cannot be obtained at any price. It is necessary, therefore, to procure them when issued and to preserve them for future use. In this way only can a good library for our pupils be collected and kept up.

From time to time we receive pupils so unfortunate as to be not only blind but feeble-minded. It is by no means easy to draw a line and say that one child whose condition is a little above it may receive instruction, while another of a little lower grade shall not. Within the nine years of my connection with the Institution, we have received several whose cases were considered doubtful. were necessarily discharged. One or two remain who are making manifest improvement, thanks to the tireless patience of their teachers, and to the application of some ideas derived from observation of the operations of schools for the feeble minded. ing this year one has been received whom, after some months' hard work, we have been obliged to dismiss as incapable of improvement in the school. And yet such children are not strictly incepable of improvement. Considered in reference to what they knew before, the improvement is considerable. They have to be excluded here for the very same reason that shuts out the blind who do have good minds, from the district schools, viz., they must be taught by different processes from those employed for the rest of the school; and the teacher (even if skilled in those processes) cannot spare the time from the other pupils. Our experience proves what has been still more clearly and fully shown in the Institutions founded for their benefit both in this country and in Europe, that many children of this low grade can be so educated as to greatly improve their condition. Of course the number of such as are both blind and feeble-minded is quite small. Of those who have the mental difficulty without that of blindness, there must be a large number in our State. It is greatly to be hoped that the State will not much longer defer to provide for their relief.

The number of pupils instructed since the last report is sixty-four. The number of new pupils received is twelve. There has also been one re-admission and a number of accepted applications for admission, are now on file. The number dismissed during the

year is six. During the greater part of the year, the number of applications for admission of male pupils was in excess of our reem to receive them; and applicants were obliged to wait till a vacancy occurred before they could be received. It will probably be a long time before this will occur again; but I have no doubt that could every one who needs the privileges of the Institution, be brought in at once, our spacious new building would be filled immediately instead of providing, as expected, for the growth of years. People unfamiliar with the matter would be greatly surprised to know how indifferent many parents are to the education of their blind chil-While some hasten to procure for them all possible advantages, others neglect their education altogether. Sometimes they assign reasons which are creditable to parental feeling - such as fear lest the child may be unhappy away from home, or that some accident may befall it—and sometimes very frivolous reasons are given. One such instance has occurred since I began to write this paragraph; a letter has been brought in from a benevolent gentleman in regard to a child living a few miles from his residence in whose education he has taken an interest. The boy's condition at home is represented as very unfortunate, but the father, when urged to send him to school, gives among other reasons for not doing so, the facts that he can save him trouble by bringing wood and water, and help him find the cattle at evening by listening for the cow bell! Other instances not very dissimilar might be named. The experiences of other Institutions for the Blind, show that this state of things is not peculiar to Wisconsin. Everywhere great pains have to be taken to bring to the families in which there are blind children, the knowledge of the advantages provided for them in the Institutions. Even then numbers are left to grew up in ignorance. When the time in which education can be received has passed, some of them apply for admission and seem to think it hard that the school whose privileges they refused, cannot become an asylum te relieve their destitution. There are children now growing up who will mourn in maturity the mistaken kindness or the indifference to education on account of which they are doomed to lead lives of unalleviated misfortune. The very existence of the Institution is unknown to many citizens, especially of those who have been in the

State but a short time. The census of this year will assist in searching out blind children in such families, and thus promote the objects of the Institution. It may be remarked that the percentage of blind children under education in the Wisconsin Institution, as compared with the census of 1860, was found, a few years since, to be greater than that of any other Institution in the United States.

No change of officers has taken place in the Institution during the year, except in the musical department. Mr. Bischoff, who has taught so successfully with us for two years, is now engaged in private teaching, and his place has been filled by Mr. M. D. Jones, a former pupil of this Institution, and lately a teacher in the Philadelphia Institution. Work has increased so much that one teacher, even with assistance rendered by advanced pupils, cannot perform it all. Another music teacher has therefore been appointed. Miss Flora F. Winslow, who takes this position, is a former pupil of this Institution who has had success in teaching since leaving school.

In this connection I may, mention that one of our pupils who left us during the year, did so to accept a position as teacher of music in the Arkansas Institution.

The delay of the contractor for the construction of the stairs and verandas having caused all the other contractors to be behind time in the exmpletion of their work, it has been impossible to open school at the regular day. The new term began on the 10th of October. These delays and uncertainties in regard to the time of opening school, are injurious to its efficiency. Owing to the condition of our buildings, we have had several such delays within a few years. We may now reasonably expect that there will be no more of them for a long time to come. It is worth your consideration, however, whether it would not be well if the term of school were regularly shortened by beginning the annual vacation one week earlier and opening the school in the fall one week later. Our school is now in session for forty-two continuous weeks-s great number of weeks than is thought best for most schools, although they have the advantage of several vacations in the year.

The establishment of a University for the Blind, in which they may receive the collegiate and professional education afforded to the seeing by our existing colleges and professional schools, has recently

been advocated. Such an Institution would require a very large sum of money for buildings, libraries, cabinets, apparatus, etc., and for securing the services of men of the high grade of talent and learning which the scheme implies. There is no need of incurring this great expense for a few blind persons. Colleges and professional schools abound, any one of which will gladly admit (as several have already done) a qualified blind man to the enjoyment of its . privileges; and any blind youth whom a college education will benefit very much, can acquire in our Institutions for the Blind, the mental discipline requisite to prepare him to make a good use of Furthermore it would be a decided misfortune for those privileges. a blind man expecting to take such a part in life as will require the preparation afforded by a college education, to be deprived of contact with the seeing while receiving that education. If he cannot succeed in doing the work that seeing men do in preparation for the duties of active life, certainly he cannot succed in competition with them in the practice of a profession. In England a "College for Blind sons of Gentlemen" has lately been established. A part of its purpose manifestly is to furnish its pupils while at school with the enjoyment of the luxuries to which they have been accustomed at home; but, while it seems to design for its pupils a higher educa-' tion than is furnished in our Institutions, it still proposes to send its graduates to one of the great Universities to complete their education among the seeing.

It is gratifying to see an increased interest and activity in the publication of books for the blind. Our own little printing press has been found very useful in the preparation of various lessons for the school. It has been used more for spelling lessons than for anything else, and we have now two volumes of a spelling book (based upon M'Guffey's) prepared for use in the school room. This will at once make the teacher's work easier and the pupil's progress more rapid and sure.

I have come slowly to the conclusion that some provision is necessary for procuring clothing for certain destitute pupils. It is a delicate matter to manage, inasmuch as giving any aid where it is not actually required, tends to foster a willingness to be dependent and a spirit of improvidence, which are not desirable. Both parents

and children ought to strive to procure what is required without help from the Institution. If they must have assistance, it is better that it should come from the hands of friends and neighbors who feel an interest in them, than from any organization, because the sentiment of gratitude will be more naturally exercised in that case. Since, however, such relief cannot always be had, it may be best to procure the passage of a law authorizing the Superintendent to supply the articles needed for such pupils at the expense of the county from which they come.

The Institution has never been properly supplied with water, of which large quantities are required. The cisterns, including a new one built this season, hold about two thousand barrels; but they will not store enough for our wants. During the year we have paid over three hundred and fifty dollars for drawing water from the river. Of course, in ordinary seasons the rains will furnish more water, but there is a natural limit to the amount to be derived from this source, while the quantity used will increase from year to year. Then, a considerable part of it has to be pumped, with great labor, to the fourth story. It would be better to get a steam pump, by which a constant supply may be obtained and the tanks kept full without so much hard work. If the deep well in the cellar should not furnish a sufficient supply, it can easily be obtained from the river.

The number of kerosene lamps in use in the house is quite large. The danger from this source to life and property, where there are so many blind persons, is so manifest, that I believe the legislature would readily grant the necessary sum for the purchase of a machine for making illuminating gas.

The Institution has many friends in different parts of the State, whose acts of kindness are gratefully remembered. In particular, thanks are due to Hon. C. S. Hamilton, U. S. Marshal, for his endeavors to furnish early information in regard to the blind children who might be found by his assistants in taking the census. They are also due to S. S. Merrill, Esq., of the Mil. & St. Paul Railroad, for directing, at the suggestion of Hon. S. Clark, the conductors on that road to pass pupils on their way home over that line free of charge. Indeed the pupils have ever had much reason to

thank the conductors and others in charge of the cars for kind and thoughtful attention while traveling.

Miss Woodward, of the Pennsylvania Institution for the Blind, has recently sent us several books in raised letters; and the publishers of the papers named below have sent their papers, (some regularly and some occasionally), to the Institution. Their kind ness is highly appreciated and deserves grateful acknowledgement here.

# ADMISSION OF PUPILS.

Any person wishing to make application for the admission of a pupil into the Institution, must address the Superintendent, giving definite and truthful answers to the following questions, vis.:

1st. What are the names and post office address of the parents or guardian of the person for whom application is made?

2d. Are such parents or guardians legal residents of the State of Wiscon-

sin?

3d. What is the name and age of the person for whom application is made?

4th. At what age did he or she become blind, and from what cause?

5th. Is he or she of sound mind, and susceptible of intellectual culture?

6th. Is he or she free from bodily deformity and all infectious diseases?

7th. What are his or her personal habits and moral character?

Upon the receipt of such application by the Superintendent, the applicant will be notified as to whether or not the person in question will be admitted; and no one must be sent to the Institution until such notification shall have been received.

No person of imbecile or unsound mind, or of confirmed immoral character, will be knowingly received into the Institution; and in case any person shall, after a fair trial, prove incompetent for useful instruction, or disobedient to the wholesome regulations of the Institution, such pupil will be thereupon discharged.

All are expected to come provided with an adequate supply of good, comfortable clothing, which must be replenished from time to time, as it becomes necessary.

The stock of clothing should embrace suitable articles for both summer and winter, and a sufficient number of each kind to admit of the necessary changes for washing and repairing.

All the clothing must be sent in good condition not only upon the first entrance of the pupil, but also at each subsequent return from home after the vacation. Arrangements are made for keeping clothing in repair during the term; but if new garments are required the Institution does not undertake the work of making them.

Each article should be distinctly marked with the owner's name or initials, in order to prevent confusion or loss.

A small sum should be deposited with the superintendent for occasional expenses.

It is important that new pupils should enter upon their term of instruction at the commencement of a session; and it is expected of all others that they shall be present at the opening of the school, and remain until it closes, on the last day of the session, unless prevented from doing so by sickness or other emergency. It is also expected that timely arrangements will be made for the departure of every pupil from the Institution within a few days after the close of each session.

All letters to the pupils should be addressed to the care of the Institution, in order to insure their prompt reception.

From ten to fourteen is the most favorable age for entering the Institution, provided the pupils have judicious care and training at home, prior to that age. But as this is not always the case, and as there are many who lose their sight after that age; or, having lost it earlier, do not find an opportunity of going to school at the proper time, the regulations of the Institution allow the admission of all proper subjects who are not under eight or above twenty-one years of age.

It must be borne in mind, however, by the friends of blind children that though they have the privilege of sending them to the Institution at a later period than the one mentioned as the best, yet it is of the highest importance that they should be sent within said period; for as they grow older their neglected powers lose their susceptibility for cultivation, rendering the training more and more difficult, until they become wholly incapacitated for receiving such an education as will fit them for a life of usefulness, independence and happiness. It is not uncommon to witness results of this kind, arising out of the morbid tenderness with which a blind child is frequently regarded by its friends, rendering them unwilling to intrust him, at the proper age, to the care of strangers, lest some harm should befall him. Indeed, every year's experience serves to indicate more clearly the lamentable prevalence of this unjust neglect; as there are constantly applying for admission into the several Institutions of the country, those whose melancholy lot is to lead a life of hopeless ignorance and dependence, but who might, with proper training in early youth, have become happy and useful members of society, maintaining themselves comfortably and respectably.

The term of instruction is not limited to any definite number of years, but is determined in each individual case by the acquirements of the pupil and consequent fitness for graduating. The length of each one's term will of course depend upon his aptness to learn, and the extent of the course to be pursued.

The session of the Institution commences on the first Monday of September in each year, and closes on the last Wednesday of June following; leaving a vacation of more than two months, during which time the pupils have an opportunity of visiting their homes and replenishing their clothing:

Parents of blind children are cordially invited to visit the Institution, that they may decide from their own observations whether it is best to send them here.

All persons are requested to send the names and addresses of blind children of their acquintance to the Superintendent.

T. H. LITTLE.

### NOTE.

THE WISCONSIN INSTITUTION FOR THE EDUCATION OF THE DEAF AND DUMB, located at Delavan, Walworth Co.. is free to all the deaf and dumb of the State, and will receive those who are too deaf to be taught in the common schools. Pupils are admitted between the ages of ten and twenty-five. The term begins on the first of September.

For further information address the Principal of the Institution for the Deaf and Dumb, Delavan, Wis.

## TRUSTEE'S REPORT.

The Board of Trustees of the Wisconsin Institute for the Deaf and Dumb, herewith submit to the Legislature their Nineteenth Annual Report.

The past year has been one of prosperity for the Institution. The officers have performed their duties faithfully; the school has been successfully carried on; the pupils have enjoyed continued health, and their numbers have been largely increased. It is believed that there are still many deaf and dumb children in the State who have not been educated, and who will be brought to the Institution another year, after the publication of the census returns, to receive the advantages here afforded.

The reports of the different officers present in detail the general condition of the Institution, and its expenditures for the past year.

Owing to the mildness of the last winter, at its close, fifty tons of coal remained of the three hundred purchased a year ago. During last summer 267 1-2 tons of hard coal were obtained, at a cost of \$2,702.40, making the price about \$10 per ton, delivered at the Institution.

The increase of twenty-five per cent. over the number of pupils present last year, has caused increased expense during six months of the present year, for subsistence, wages, and an additional teacher, and made necessary the immediate purchase of bedsteads, bedding and furniture. The estimates for the year were reduced by the last legislature nearly four thousand dollars. To meet this extra expense the sum of two thousand dollars is requested.

The board present the following estimate of the sums necessary for the support of the Institution from March 1, 1871 to March 1, 1872:

### Estimate for the year, commencing March 1st, 1871.

Subsistence	\$9,825
Fuel and lights	4,000
Dry goods, furniture and house furnishing	2,552
Indigent pupils	600
Books and school purposes	600
	13,387
Salaries and wages	
Insurance and trustees' expenses	1,000
Farm, barn and stock	600
Steam heating apparatus	800
Steem pump	400
Hose	240
Gas machine and gas pipe	350
Cabinet shop	350
Shoe shop	200
Freight, drugs and miscellaneous	760
Deficioncy in current expenses	2,000
Ordinary repairs, painting, etc	1,200
Laundry building	2,550
Steam pipe and fittings	425
Partitions in library	300
Bathing tubs and fixtures	175
	350
Oven and fixtures	
Supporting attic partition	1,000
Total	210 064
4.0 pg	P12, 704

The growing condition of the Institution, both present and prespective, calls for additional means for house furnishing, including furniture, beds and bedding, and also for more accommodation within the building. Neveral rooms are necessary, and can be had by dividing the large library room into smaller ones, by partitions. The facilities for making and baking bread, are quite insufficient, being in the kitchen; and a separate bake room, with a brick oven, is needed, which it is proposed to fit up in the present laundry. The laundry accommodations have also been outgrown, and the size of the family renders the labor of washing and wringing by hand very great. An appropriation is asked to build a house to contain a laundry, dry room and ironing room, so that our steam may be made available for washing and wringing, as well as for drying the The vegetable cellar, which is the only cellar, is too small. It is out of doors, and has a plank roof covered with earth, and is now in such a leaky condition as to require immediate repairs. The removal of the dry room would allow the enlargement of the boys" both room, which is quite small, and contains but two tubs for seventy-three boys. These improvements are very much needed, and should not be deferred.

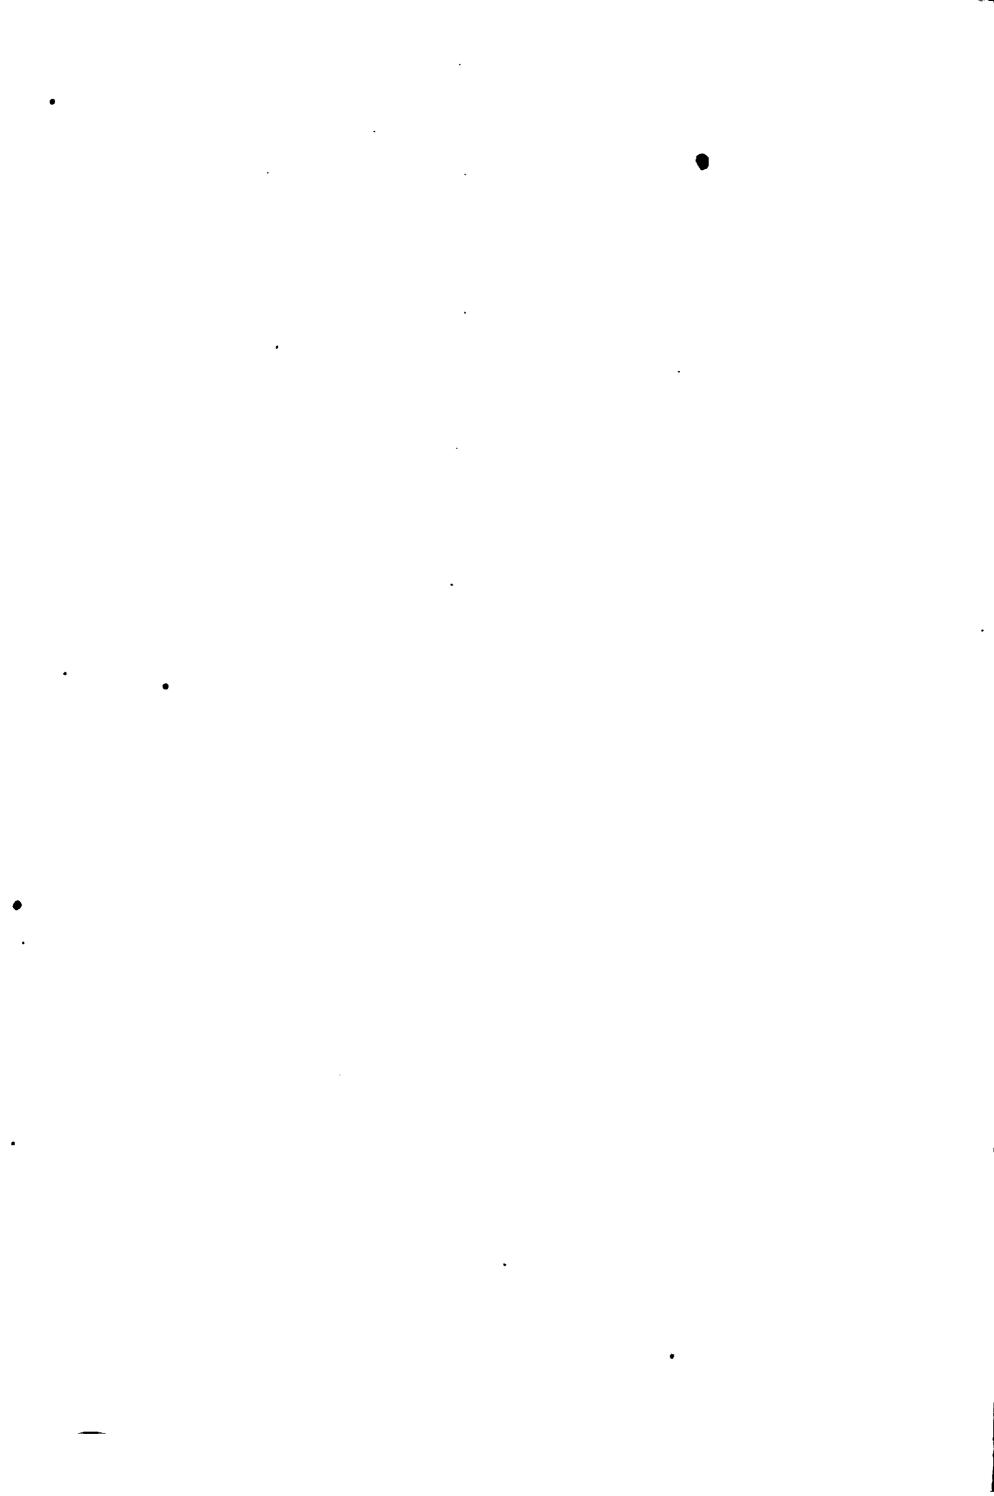

Owing to a defect in the construction of a partition supporting the cupola, it has gradually settled, until it is now unsafe, and in danger of falling at any time, and prompt and immediate measures are demanded to support it from the foundation. Temporary pillars were put up in the chapel last summer, but they are insufficient. To remedy this defect, one thousand dollars are required.

The estimates have been carefully made by the board, and are judged to be necessary for the Institution.

Respectfully submited,

C. H. STURTEVANT,

Secretary.

APPENDIX.

• • •

# REPORT OF THE PRINCIPAL.

To the Board of Trustees of the Wisconsin Institution for the Deaf and Dumb:

GENTLEMEN:—In reviewing the history of the Institution for another year, and the success attained, we note progress in the various departments, fidelity and efficiency among the officers and employes, a remarkable exemption from sickness, and, as a prominent feature, a large increase in the number of pupils.

#### NUMBERS.

Twenty-two left during the year, eleven of whosh finished the regular course of study and graduated in June; three moved out of the State, and the remaining eight did not return at the opening of the term in September: but notwithstanding this loss, we have at present twenty-four more pupils than ever before at any one time in the history of the Institution.

Number present at the date of the last report	95 45 4
Whole number under instruction	144
Number present October 1, 1870	122

This gratifying increase is due largely to circulars of the Institution recently sent to every school district in the State, and to special efforts to bring in new pupils, and serves to increase the importance of the Institution as an object of benevolence, and to strengthen its claims upon the public, for their sympathy and support, in the work of elevating the deaf mutes of our State.

#### CHANGES AMONG THE OFFICERS.

Since the date of the last report, Mr. L. Eddy, who after ten years of labor, had left from impaired health the year previous, returned in November with restored health, and still gives the Institution the benefit of his skill and experience.

The entrance of so many new pupils in the fall, made it necessary to form two new classes, and also to obtain the services of an additional teacher; accordingly, Miss Julia Northrop, of Mauston, Wis., was employed, and has commenced her duties with an earnestness which promises success.

Miss M. J. Sturtevant, who for two years had held the position of Assistant Matron, left at the close of the summer term, to enter into domestic relations, carrying with her the good wishes of the whole household. Her place is filled by Miss E. E. Boyce, formerly Visitors' Attendant, who is succeeded by Miss Adeline Northrop, of Mauston. Both of these ladies are devoting themselves to their work with energy and success.

Mr. S. M. Parish, who for ten years had served as Assistant Steward, left the first of July, and is succeeded by Mr. A. J. Woodbury, of Hebron, Ill., a young man of ability and promise.

In the domestic department changes have occurred, and have been carefully made as occasion required. This department is now in good working order, and continues under the management of Miss A. J. Cernell, who by her energy and efficiency has contributed much to the good order and comfort of the family. The female pupils are daily instructed and employed in the lighter parts of housework, and under the care of the Assistant Matron they are also taught to sew, mend and knit. They have done the ordinary sewing and mending for the Institution, besides assisting to make a new supply of bedding. The instruction in these departments forms an important part in their education.

#### REPAIRS AND IMPROVEMENTS.

Various repairs and improvements have been made during the year. A large wrought-iron water-tank, holding one hundred and sixty barrels, has been placed in the attic, which is filled by the steam pump, and gives us a much needed supply of water. Anoth-

er similar tank, holding fifty barrels, has been put in the boiler house, to receive the condensed steam after it has passed through the building. Additional water, gas and steam pipes have been put in where they were necessary, and the labor performed by the engineer. A new tile drain has been laid from the kitchen and girls' wash room to the sewer. One of Van's ranges, with steam table attached, has been procured. It gives good satisfaction, and adds much to the convenience and comfort of the household. One hundred and fifty feet of rubber hose has been bought. Additions have been made to our stock of bedding and of crockery, which was quite low; the library has been replenished, and a quantity of matting, carpeting and furniture has been purchased. An ash-house, of brick, has been built, and also a small house disconnected from the building, for the gas machine, giving greater security against Some of the floors, the sash, window-cases and cornices of the east wing and main building have been painted, and also the cupola, all of which have needed attention for several years.

#### SHOPS.

The management of the shops has improved during the year. Two trades are taught—cabinet-making and shoe making. The labor of mute boys, working three hours a day cannot be compared with that of men with all their faculties, working all day; nevertheless the boys have shown that their infirmity is no obstacle to their becoming good workmen.

In the cabinet shop, besides making plain furniture for the Institution, and for sale, much of our ordinary repairing has been done.

The shoe shop has never been in better condition. Besides supplying the boys with boots and shoes, and doing most of the repairing, good and saleable work is manufactured.

It is difficult to make the shops remunerative, and they were not established for this purpose, but in order to give the boys, under masters who understand the sign language, a knowledge of the use of tools, and a start in their trades, without which it would be difficult to find employment after leaving the Institution, and no man. desires to take a raw mute apprentice. The training of the shops is an important addition to the education of the school room; and

many, after leaving, are able to earn a good living by the trade acquired at school.

The following statement exhibits the financial condition of the shops for the year:

### Cabinet Shop.

Receipts Expenses, lumber, etc. \$217 71 Salary of master. 900 00 Fuel and lights 80 00	• • • • • • • • • • • • • • • • • • • •
Balance in favor of shop	\$35 73
Shoe Shop.	
Expenses, materials, etc	• • • • • • • •
Balance in favor of shop	<b>\$132 16</b>

Uniting the two there is a profit of \$167.89, which is a decided gain over the previous year, when the shops were a charge upon the Institution to more than this amount.

#### THE SCHOOL.

During the past year the school has been divided into seven classes. The labor of the teachers has been faithfully performed, and gratifying progress has been made. The first thing necessary is to give the pupils some knowledge of our language, and about three years are speat before he can understand a simple text-book. Then, Arithmetic, Geography, History and Grammar, etc., are taught, but the great effort is to teach the English, and so to furnish the means of gaining information from books and of commusicating with people. The ability to write correctly varies in different pupils, but most of our graduates are enabled to understand ordinary books and papers, and all can receive ideas through the medium of signs. As our course of instruction is limited to seven years, the mutes, with their disadvantages, are not able to gain more than a common school education; but these advantages we can and do afford them, and are enabled to this extent to relieve

their misfortune, and to restore them to society, from which they have been exiled.

Three public examinations are held during the year; the one in June being the most critical. It is conducted by a committee, and all the exercises are carefully marked, both to find out the progress made, and to fix the standing of the pupil for the year to come. The average of the whole school, upon examination, was found to be considerably higher this year than it was last.

During the winter a course of lectures in chemistry was delivered by Mr. Eddy. A variety of expeaiments were performed, and much interest was excited. A literary society—"The Wisconsin Deaf Mutes' Lyceu.n"—was organized among the boys, and sustained with spirit during the winter. The usual programme of debates, essays and addresses was carried out with the assistance of the teachers. This feature was entirely new to this Institution, and was found so profitable that it will doubtless be continued. A temperance pledge which was circulated, received the voluntary signatures of the three oldest classes entire. The newspapers are closely watched, and the latest news rapidly communicated by some older one, in signs, to eager groups, who are thus enabled to learn the events of the outside world.

#### ARTICULATION.

The class in Articulation and Lip reading, continues under the charge of Miss Eddy, and now numbers twenty-one pupils. Nine entered this fail, and among them are a few congenital mutes, and also a number of semi-mutes and semi-deaf, who cannot be taught in our common schools, and here receive especial attention and patient training, which they cannot elswhere obtain. This portion of the class remain with their teacher all day. With them success is certain. They have a partial knowledge of spoken language, which is retained and improved, and made the basis of their education.

The class of last year are improving in distinctness of utterance and fluency in lip reading. They recite about an hour a day, and are taught by signs the rest of the time. Four of the best members left at the close of the year, all of them having been much benefitted. One young man who lost his hearing at fourteen, and

[Doc. 8.]

could not understand a simple question eighteen months ago, can now understand conversation with tolerable ease, even from bearded lips. Most of this class can understand anything read slowly, from the lips, as well as they could if the book were in their own hands.

The progress made is encouraging, and is especially gratifying to relatives. This department is not yet permanently established in this or other institutions in this country; but it is believed that a portion in our large schools can be so instructed, with profit.

### GRADUATING CLASS.

At the close of the term, June 29th, eleven pupils having finished the regular course of study, graduated from the Institution. A public exhibition by the class, under the direction of their teacher, Mr. Eddy, was given in the chapel. The occasion was honored by the presence of Gov. Fairchild, and a number of the state officers, and was one of much interest. The pupils were complimented for the creditable manner in which they acquitted themselves. Some idea of the attainments of the class will be gained from the

### Programme.

- 1. Declamation. Landing of the Pilgrims. By Churles Demarais, Fond du Lac.
  - 2. Class exercise in Grammar.
  - 8. Arithmetic.
  - 4. The Reaper and Flowers. By Agnes Rutherford, Lake Mills.
  - 5. Physiology.
  - 6. A story written from signs.
- 7. The Parting of Marmion and Douglas. By W. H. Trowbridge, Augusta.
  - 8. Natural Philosophy.
  - 9. John Barleycorn. By A. W. Goold, Racine.
  - Physical Geography.
  - 11. Valedictory. By Joseph Mosnat, Franklin.

The "Valedictory Address" was gracefully delivered in the sign language, by Mr. Mosnat, and was read at the same time to the audience. It is given as a specimen of the original composition of one deaf and dumb from birth. Mr. Mosnat, and also Mr. Balis, have received scholarships in the National Deaf Mute College at Washington, D. C., and have recently entered there.

### Valedictory.

Before we came here we learned from our parents. In their school we learned to eat, walk, work, and to take care of ourselves; but little of language and religion. If we had not come here we could not get good business or could not communicate with each other or speaking persons, and we would have grown up ignorant and superstitious.

We came here ignorant and afraid, and pitying us, Miss Eddy and Mr. Phillips took us, and led us along in the way of knowledge some years, when we were united under Mr. McWhorter; Miss Eddy keeping some of us to add to our knowledge by teaching articulation.

Under these teachers we have studied seven years, till we think we know how those feel who have traveled through Europe and other lands, and seen and learned wonderful things. Our eyes are opened to see a new world.

We feel grateful to the state for establishing the Institution to develop our minds, and give us an education, and give this free, the most useful and important thing in the world, and especially to deaf mutes. The United States claims a part of our thanks for this. We feel grateful this is not a heathen land. Why are many Institutions established in the United States? We believe it is because of the christian religion which makes people to be tender-hearted and generous.

As we leave here we wish to thank the Governor for his interest in us, for his efforts to get enough money for the Institution; for his frequent attendance here for six years, and for his kindness and love to the pupils.

To the Trustees we are much indebted for their care of us, and for their anxiety for the pupils, that we should do well; and fo their good choice of a Principal.

To the Principal we feel grateful for his good and faithful care for supplying our wants, for instructing us, for his efforts to have us form right principles and characters.

The teachers have labored hard to give us an education, and to teach us religion which is the most important of all things in the world. You have shown that you are our real friends, because you

have been interested in teaching us, and working for our future success, and trying to make us walk in the way to everlasting life. We have received much from you during seven years.

For the class I will say, we thank you all, and bid you good-bye. May we remember and practice all the instructions which we have received here, and be comfortable and prosperous during life. And now, class-mates we part, not expecting we will come together here again, but may we so live that we can all meet in heaven. Farewell.

After the address, diplomas were distributed by Judge Allen, president of the Board of Trastees, to the following:

James C. Balis, Milwaukee.
Charles Demarais, Fond du Lac.
Dennis Durick, Stephensville.
George French, La Crosse.
Alfred W. Goold, Racine.
Joseph Mosnat, Franklin.
Theodore Stone, Augusta.
Wales H. Trowbridge, Augusta.
Maggie Hutton, Janesville.
Agnes Rutherford, Lake Mills.
Euphame Vedder, Berlin.

#### EXHIBITION BEFORE THE LEGISLATURE.

By invitation of the legislature, in February, nine of the pupils visited Madison in company with Dr. Chapin, Mr. Eddy and the Principal, and gave an exhibition of their proficiency and of the language of signs, in the Assembly Hall. The visit was cheerfully made; and the plan of frequently bringing before the legislature in this way, the merits of our Institution and its claims for their support, would without doubt, result in increased interest in the deaf mutes throughout the state, and in the cause of deaf mute education. An exhibition by the pupils of the Blind Institution, was made to the legislature the evening previous.

#### CONVENTION OF DEAF MUTE INSTRUCTORS.

The seventh convention of American Instructors of the deaf and

dumb was held at Indianapolis, August 24th, 25th and 26th, and was largely attended by delegates from nearly all the Institutions in the United States. Most of the teachers of this Institution were present and took part in the proceedings. Numerous papers were presented of ability and practical character, and various topics pertaining to deaf mute instruction, were discussed. The coming together from the various parts of our land, of so many laboring to advance a common cause, and the harmonious interchange of views, could not but result in good to the unfortunate class of mutes.

### FERBLE MINDED CHILDREN.

The application of a number of feeble-minded children, for admission to this Institution, has directed our attention to this unfortunate class. Six were brought to us last year; some of whom could hear well, but could not speak. Most of them could, apparently, be taught, in a school expressly for them, but none of them were proper subjects for our Institution, and they were refused with much regret. Not a year passes but what we hear of such children, and the numbe in the State is too large to be overlooked. There is much need of an Institution for imbecile children, and Wisconsin should not be behind other States in careing for this class.

#### WANTS OF THE INSTITUTION.

The present number of pupils reminds us that our Institution is growing rapidly. It has increased one-fourth during the past year; our dining room is nearly filled, and without deubt, in two or three years, the building which was designed for one hundred and fifty pupils, will be full. We have now the names of thirteen children upon our books. who expect to enter next fall, and as no class will graduate, our capacity may be reached then. We need two more school rooms, and furniture, beds and bedding; larger bathing and clothes rooms for the pupils; a bake room with a brick oven; a larger cellar; and special building for a laundry, besides ironing and drying rooms. Considerable repairing and painting are necessary to keep the buildings in good condition. The supporting of the attic partition, which has been settling for several years, and is now unsafe, should not be delayed. These wants of the Institution are

pressing, and need to be at once supplied, in order to maintain its efficiency, and for the safety and comfort of its inmates.

#### ACKNOWLEDGEMENTS.

Our thanks are due to the officers of the Walworth County Agricultural Society, and of the Western Union, Chicago and Northwestern and Milwaukee and St. Paul Railways, for favors shown to the pupils and officers of the Institution, and to the editors and publishers of the following newspapers, who have sent their publications to us gratuitously during the year. The papers have been regularly distributed among the pupils, and are read with much interest.

DELAVAN, WIS., October 19, 1870.

# PHYSICIAN'S REPORT.

To the Board of Trustees of the Wisconsin Institution for the Deaf and Dumb:

GENTLEMEN—The completion of another year imposes upon me the duty of submitting a report relative to the sanitary condition of the Institution.

There has been during the year no epidemic disease, and but little sporadic; and what has occurred has been occasioned entirely by the unavoidable change of diet and habits which occurs where pupils are collected from different stations in life, and from different localities.

This freedom from sickness is principally owing to the care and efficiency of the officers and teachers of the Institution, to the perfect system of sewerage, the dietary, the well ventilated and well kept dormitories, the attention to clothing and its adaptation to the seasons, bathing, and uniform cleanliness.

This very favorable record cannot but be gratifying indeed to you and to all the friends of the Institution.

Very respectfully,

D. B. DEVENDORF,

Physician in charge.

Delavan, Oct. 1, 1870.

# TERMS OF ADMISSION.

- 1. No charge is made for pupils from this State, except for clothing and traveling expenses. Pupils from other States will be charged the actual cost per year for board and tuition, payable semi-annually, in advance.
- 2. Applicants must be between the ages of ten and twenty-five years, free from immoralities of conduct, and from contagious and offensive diseases.
- 8. Application for admission should be made to the Principal of the Institution.
- 4. The session commences on the first Wednesday in September, and closes on the last Wednesday of June. The proper time for admission is at the commencement of the session, and no pupils will be received at any other time, except in extraordinary cases.
- 5. The regular course of instruction occupies seven years, and it is expected that all who enter the Institution will remain for this period, unless providentially prevented. No pupil can be removed from the Institution during the progress of the session, without the permission of the Principal and Board of Trustees.
- 6. Parents and guardians will be duly notified of the day on which the school closes, that they may make arrangements for conveying their children home. Except in cases of sickness, pupils cannot be permitted to leave before the specified time. The frequency with which arrangements are made for pupils to leave a few days before the close of the school, renders it necessary, to prevent disappointment, to direct special attention to this rule.
- 7. Parents and guardians are required to provide their children with sufficient and suitable clothing while they remain at the Institution. Every article should be marked with the full name of its

8-D. & D.

owner. A sum of money, not less than five dollars, should be deposited with the Steward for incidental expenses.

8. Pupils are expected to spend the vacation at home, or with their friends. This arrangement is as desirable for the health of the pupils, which will be promoted by a change of air and exercise, as for the convenience of the Institution.

In the case of each pupil who enters the Institution, it is desirable to obtain a written statement embracing the following particulars:

- 1. The name of the pupil in full.
- 2. The year, month and day of his birth.
- 3. The cause of deafness. If not born deaf, at what age and from what cause did he become so?
- 4. Is the deafness total or partial? If the latter, what is the degree of hearing? Is it of any practical benefit to him in his intercourse with others?
- 5. The natural capacity. Is it bright and active, or dull and stupid, or idiotic?
- 6. Has the child had the small pox, scarlet fever, measles, mumps, whooping cough? Has he been vaccinated?
- 7. Were the parents related before marriage? If so, in what manner?
- 8. Are there any persons in the family connection entirely or partially deaf? If so, at what age and from what cause did they become so?
  - 9. The names, residence and post office address of the parents.
  - 10. The number and names of the children.

A blank form will be furnished to any person by the Principal, with the above questions conveniently arranged for answering.

All business letters, or letters of inquiry in regard to pupils in the Institution, or those whom it may be designed to place there, should be addressed to

EDWARD C. STONE,

Principal,

Delavan, Wis.

## BY-LAWS

Adopted by the Board of Trustees, October 20th, 1870.

### ARTICLE I.

#### OF THE TRUSTERS.

- 1. The regular meetings of the board of trustees shall be the annual meeting on the second Wednesday of October and the meeting in connection with the public anniversary, on the Tuesday before the last Wednesday of June; both to be held at the Institution.
- 2. At each annual meeting the trustees shall elect by ballot, one of their number president, and another of their number secretary; three of their number an executive committee, and a treasurer, who may or may not be one of their number.
- 8. At their meeting in June, the trustees shall take up, as special business, the fixing the salaries of the officers and employes of the Institution, and the determining of the repairs and improvements to be made during the vacation, and the general ordering of affairs for the year to come.
- 4. The president shall preside at the meetings of the board and perform such other duties as may be required of him.
- 5. The secretary shall keep an accurate account of the proceedings of the board, and shall record the same in a book to be kept for that purpose; and also an account of all moneys received from the state treasurer, and the general disposal of the same.
- 6. In the absence of the president and secretary, their places may be filled by appointments pro tem.
- 7. The president, or two of the trustees may call special meetings of the board, and a quorum, to consist of a majority of the

trustees, shall have power to elect any officer of the Institution, in case of vacancy.

- 8. All moneys to be drawn from the State treasury, shall be drawn by the treasurer on warrant signed by the president and see retary.
- 9. The treasurer shall have the custody of all moneys received. For all disbursements of money for the ordinary expenses of the Institution, the principal shall make an order on the treasurer, in form substantially as follows: "Pay to the order of A. B., dollars, (stating the object for which drawn);" and taking receipts therefor; and when articles are purchased, specific bills are to be made, and the same properly receipted on delivery of said order. All special outlays shall be directed by the board of trustees. The treasurer shall give bonds, to be accepted and approved by the board, for the faithful discharge of his duties, in such sum as the trustees may determine, and shall deliver to his successor in office, all money, books and papers belonging to the Institution, and report to the board at the annual meeting, and at other times when required.
- 10. The executive committee shall meet as often as once a month, at the Institution. They shall keep a careful oversight of all expenditures of money; they shall see to the insurance of the building, for such sums as the trustees may determine, and shall consult and advise with the principal, in regard to the general management of the Institution; and shall, with the pricipal, have business prepared for the meetings of the board, and keep a record of their doings, to be submitted to the board.
- 11. The board of trustees shall appoint the principal, the teachers, the matron, the engineer, and master mechanics, employed in the Institution, and fix their salaries; and may direct in regard to other persons to be employed, and their wages.

### ARTICLE II.

#### OF THE PRINCIPAL.

1. The Principal shall be the executive head of the Institution, He shall reside in the Institution and have the general control of all

its concerns, with the counsel and advise of the Executive Committee. He shall have power, subject to the approval of the board, to make such rules and regulations of the internal police as he may deem best for the government of the Institution and for its system of instruction.

- 2. He shall implicitly obey all orders and instructions of the board, and carry out in good faith any system of operations they may direct.
- 3. He shall, by and with the advice of the Executive Committee, hire, assign the duties, direct so far as may deem proper and dismiss where he may consider necessary all employes of the Institution not specifically mentioned in these by-laws.
- 4. No subordinate officer shall contravene or or interfere with the directions given at any time by the Principal to the pupils, or to the persons by him employed, but on the contrary they shall give their efficient countenance and support to all such directions, and report to him any neglect or act of disabedience.
- 5. The Principal shall teach the pupils, and require the persons employed, to respect and obey the other officers, in the proper dischare of their appropriate duties.
- 6. He shall superintend and direct the intellectual, moral and religious instruction of the pupils, carefully avoiding every thing of a sectarian or denominational character. He shall pay especial attention to the health and comfort of the pupils; and when the boys are engaged in labor, he shall entrust them to some responsible person connected with the Institution.
- 7. He shall have power to employ a clerk, to assist in keeping the accounts, making purchases and attending to such other matters as may be necessary. He shall keep books containing regular accounts of all expenditures incurred and orders drawn, with the vouchers therefor, and at the regular meetings of the trustees present to them an abstract of all classes of expenditures. He shall also notify, by mail or otherwise, each trustee of any regular or special meeting of the board, specifying the time and object of meeting and in time to allow the trustees to be present.
- 8. He shall from time to time, communicate to the trustees, such information as he may think necessary, or as they may require, in

regard to the operations of the Institution, and the manner in which the various officers perform their duties; and shall have a statement in writing prepared, of all business under his knowledge and charge ready to present to the board of trustees before the day appointed for any meeting of the same, and his books and accounts in complete readiness for their examination.

9. He shall keep a register of pupils, and such other books as may be designated by the trustees, in such form as they may prescribe.

### ARTICLE III.

#### OF THE TRACHERS.

- 1. The teachers shall instruct the pupils under the direction of the Principal, and perform such other duties connected with the departments of instruction and supervision, as the Principal may from time to time direct or require.
- 2. They shall attend the daily devotions and take such part in the religious instruction of the pupils as may be assigned them by the Principal.

### ARTICLE IV.

#### OF THE MATRON.

The matron, under the direction of the Principal, shall have charge of the female pupils out of school hours, and a general direction of the domestic affairs of the Institution.

### ARTICLE V.

#### OF THE PHYSICIAN.

The physician shall be elected annually by the board. He shall visit the Institution when notified, shall prescribe for the sick, shall look carefully to the sanitary condition of the Institution and its surroundings, and shall faithfully perform all the duties in the line of his profession, and shall report the condition of his department at each regular meeting of the trustees, and at such other times as he may deem necessary, or the board may require.

### ARTICLE VL

#### OF THE MASTER MECHANICS.

The master mechanics shall have charge of the shops and the supervision and instruction of the pupils assigned to them in their respective trades, and perform such labor in the line of their occupations as may be required of them, and report to the Principal the condition of their shops, when he shall require.

### ARTICLE VII.

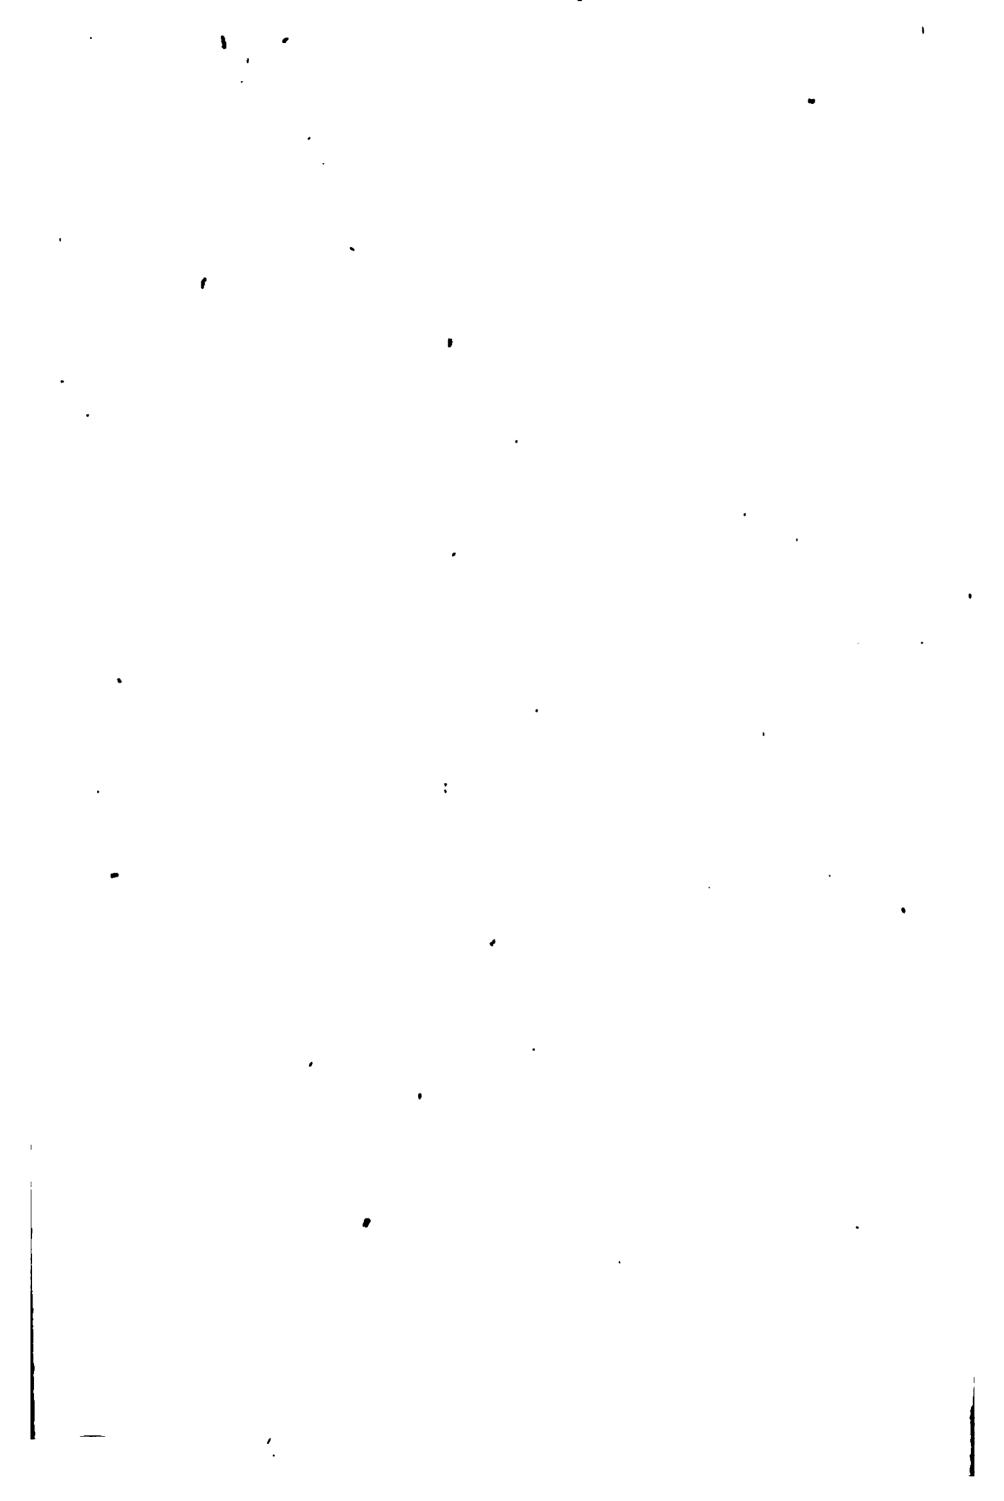

#### OF THE INGINEER.

The engineer shall have charge of the heating and lighting apparatus, and shall regulate the same with due regard to safety and economy, and under a sense of the grave responsibility of his position.

### ARTICLE VIII.

#### OF PHE PUPILS.

- 1. Pupils shall be received and dismissed only by the Principal, with the sanction of the executive committee.
- 2. Every pupil who has not been vaccinated before being received into the Institution, shall be vaccinated without delay.
- 3. Pupils honorably dismissed from the Institution, shall receive a certificate signed by the president and secretary.
- 4. Pupils shall not be allowed to retain any pocket money, but on admission shall deliver the same to the Principal, who shall cause it to be credited on his books, and returned in such sums as he may deem advisable, the object for which it is furnished being specified.

# ANNUAL REPORT.

OPPIOR OF STATE PRISON COMMISSIONER,
WAUPUN, September 30, 1870.

To His Excellency Lucius Fairchild,

. Governor of the State of Wisconsin:

Sin—As required by law, I herewith submit my first annual report as Commissioner of the Wisconsin State Prison.

Owing to the destruction of the workshops by fire, on the second day of May last, involving a large loss of property in stock, machinery, tools, &c., the financial result of the year's business is entirely changed from what I had confidently hoped, and had reason to expect, it would be. The origin of the fire is, not certainly known, but I am fully satisfied it was caused by the falling of sparks from the smoke-stack upon the roof of the building. rive at this conclusion from the fact that on several occasions prior to the second of May, the roof had caught fire from that source, and being discovered in time the flames were extinguished. inflammable nature of material used in the construction of the roof, and the rapidity with which the flames sprend, rendered it impossible to save but little of the large amount of property contained in The lumber used for roof boards, had previously the building. been used on the same building, and was covered with a preparation of tar, instead of shingles. When last used, the side covered with tar was placed next the inside of the building, so that when the fire reached the space between the roof and ceiling, the flames spread instantly through the entire length, nearly four hundred feet, filling

the rooms below with a black suffocating smoke. Had the partition walls extended up to, or through the roof, we could probably have saved a large portion of the stock and machinery burned, and possibly a portion of the building. As it was, with the partition walls carried only to the height of side walls-the underside of roof boards covered with tar, and the outside with pine shingles, it was beyond the power of human effort to stay the devouring flames, or to save but little of the property in the builing. I immediately became satisfied that our best efforts must be put forth to confine the fire to the shop building and thus prevent greater disaster. this we were successful. Several of the most expensive machines, rearly all the machine belting, a few pieces of ready made furniture, and a small quantity of chairs and chair stock were saved. l'rompted by a knowledge of the danger of ascident from this cause, I did, on or about the first day of Murch, place a platform (or walk) upon the roof of the building, extending the entire length, with frequent off-sets, upon which were placed barrels of I also placed a permanent ladder on the side of the building, affording easy access at all times to the roof. I also prepared, and placed in the second story of the engine house, a water tank sufficient to hold fifty barrels, which was kept constantly filled with water for use in case of fire.

I also placed upon the roof immediately over said tank, one of Carver's No. 2 force pumps, with fifty feet of rubber hose attached. I also turned the exhaust steam from the boiler into the smoke stack, hoping thereby to deaden the sparks as they passed out of the stack. But in spite of all the precautions that seemed necessary to the full protection and preservation of the property, it took fire, and was burned, together with about 150,000 feet of lumber of various kinds, a large quantity of finished cabinet furniture stored in the building (the greater part of which was passed over to me by my predecessor in office), machinery, tools, finished and unfinished chair stock, &c., &c., amounting in the aggregate to about twenty-five thousand dollars, besides the building. Notwithstanding the heavy loss of property, and the serious interruption of the work being prosecuted in the shops, yet I can but feel that there is great cause for rejoicing that the calamity was no worse.

There was piled in the yard over 300,000 feet of lumber besides that which was burned; about 700 cords of wood, and the close proximity of the blacksmith shop, and other baildings, to the burning structure, caused great fear in the minds of all that the whole property of the State, within the enclosure, would be destroyed. But owing to the favorable direction of the u ind at the time, to the untiring efforts of the citizens of Waupun, who came an masse to our rescue, and to the prompt and efficient labors of the prisoners, the flames were confined to the shop building, and the piles of lumber in its immediate vicinity. No accident happened to life or limb, no prisoner escaped, and so far as I am able to judge, none thought of escaping, but on the other hand, all seemed to work as though the property were their own, and "so far" are entitled to the thanks of the people of the State. During the progress of the fire I sent a telegram to the Governor, and other State officers at Madison, requesting their immediate Presence at Waupun, for the purpose of consulting as to the best, or proper course to pursue, in the emergency. Lieut.-Gov. Pound and Secretary of State Breese (being the only State officers present at the capitol at that time) came promptly in response to my call, and although no definite line of action was fixed upon at this interview, yet they each unhesitatingly expressed the opinion that steps should at once be taken towards rebuilding the shops. This course seemed necessary in order to keep the prisoners employed during the summer, and to provide a place where they could be employed during the coming winter. Feeling the importance of immediate action, I visited Madison about the twelfth of May, and held further consultation with the State officers, at which time the question of convening the legislature was fully discussed, but as that course must necessarily involve a large expense to the State, as well as great inconvenience to the members of the legislature, and for the farther reason that soveral of the prominent bankers of the State very generously proffered all necessary funds to meet the expense of rebuilding, acting Governor Pound declined (and I now think wisely) to issue a proclamation convening the legislature. The banks above referred to are "The National Exchange Bank of Milwaukee," "The Milwaukee National Bank of Wisconsin," of Milwaukee, "The Wisconsin

Marine and Fire Insurance Co. Bank," of Milwaukee, "The State Bank," of Madison, "First National Bank," of Madison, and "The Bank of Madison."

Acting upon the advice and counsel of the State officers, and of a large number of prominent business men and tax payers of the State, and deeming it the wisest and only proper course to pursue under the circumstances, I borrowed five thousand dollars of each of said banks (except the "Wisconsin Marine and Fire Insurance Company Bank") making in the aggregate the sum of twenty-five thousand dollars, with interest after the first day of August until paid. Although this sum is much less than will be required to complete the building and purchase the necessary outfit of machinery, yet it has been sufficient to enable me to make favorable contracts in all cases, and to make such payments on the same as to induce spirited competition for the work. Believing it to be the policy as well as the interest of the State in the construction of its public buildings, to have especial reference to permanence and so curity from fire, I determined in rebuilding, to avoid as far as possible, all danger of a like disaster in the future, and to that end have constructed the building entirely of stone and iron, except the floors.

It is true the expense of the building will be somewhat increased, but the greater security thereby afforded will more than doubly offset the increased expense. When it was determined to rebuild as: quickly as the force and means at my command would permit, I set about opening a quarry in the prison yard, and on the fifteenth day of June commenced cutting stone for the building, employing but one man (a general superintendent) besides the regular corps of officers Since that time there has been taken out of the and prisoners. quarry, and mostly laid into wall, 80,106 cubic feet of stone; of fine pointed surface-work, we have done 16,220 feet; of axed and bushhammered surface: work, 8,664 feet; excavations in quarry and for foundation walls, 6,372 cubic yards; filling and grading in prison yard, 8,469 cubic yards; the walls of the old building have been taken down and removed, the window and door frames and doors for new building, fourteen saw frames and saw-tables, one hundred forms for putting up cane seat chairs, all joiner work, and all work above enumerated has been performed by prisoners in the institution

since the lifteenth day of May last. As a result of this labor, the State will have on the fifteenth day of November next, completed and ready for occupancy, a first class building in every respect, entirely firs-proof except wooden floors, 217 feet by 54 feet, two stories high, with engine house attached, 42x44, two stories high and with two drying houses, one 20 by 22 feet, and one 14 by 28 feet; a brick smoke stack, 110 feet high, with engine and boilers; steam-heating apparatus, shafting and pulleys, and a large portion of the machinery inc place and ready for use. For the accomplishment of this highly favorable result, great credit is due to the general superintendent of work, Mr. Wm. E. Wheeler of Beloit, Hon. C. S. Kelsey, deputy warden, and all the subordinate officers, who have worked as though they had a hard task to perform in a short space of time. I cannot, in justice to the prisoners under my charge, omit favorable mention. of the part they have enacted in the performance of this work, cheerfulness and obedience with which they have performed the various and arduous duties assigned them, goes far to convince me that many of them may yet return to society as honest and industrious citizens.

All have labored with an apparent determination to finish the work at the time above stated, and it is now sufficiently advanced toward completion to warrant assurance on my part that it will be done without fail.

In addition to the work of rebuilding the shope, I have deemed it absolutely necessary to the proper care and preservation of the buildings heretefore constructed, as well as the comfort and convenience of the occupants, to make some repairs on the roofs of the main building and of the female prison.

During the summer months when there was nothing to obstruct the free passage of water, it passed off without cateing serious inconvenience, but in the winter and spring, when the gutters were liable; to become choked with snow and ice, the water would scak into the top walls of the buildings, and into the rooms below, causing rapid decay of the buildings, as well as rendering them at times nearly uninhabitable. The same is true of the appartments occupied by the deputy warder. Although the repairs made are of a semicontact temperary character, yet I think 45 sufficient to render

the n comparatively safe and comfortable for two or three years to come. I deem it my duty, however, in this connection to state that the time is not very far distant, when a proper regard for the interests of the State will prompt a general overhauling and repairing of the roofs of all the older buildings here, in order to save them from decay.

In the government and discipline of the institution, I have adopted the rule of kindness with sufficient firmness to convince the prisoners under my charge that "disobedience," as well as industry and good conduct, would surely meet its reward. Very few cases of refractory conduct have occurred, and no cases of severe or harsh The prisoners have at all times been well fed and compunishment. fortably clothed, and as a reward for industry and good behavior have been allowed a weekly ration of tobacco, to such as have been in the habit of using it before coming here. The average expense of clothing and bedding has been somewhat increased over last year, which increase can be very justly accounted for in the following manner: When I entered upon the duties of this office, on the third day of January last, there was very little, if any, ready-made clothing on hand, except such as was being worn by the prisoners, so much wern that nearly every one required an entire new suit. between that time and the first of April. Another cause of an increased expense in this department is, the work performed since the second May, is much more destructive to clothing, boots and shoes, etc., than indoor work. The blankets in the cell-rooms were all very much worn, and many of them were comparatively worthless, making it necessary to the reasonable comfort of the prisoners to purchase about fifty blankets, during the months of January and February. The above reasons, together with the fact that about fifty coats and twenty vests were burned at the time of the fire, and that there is on hand at the close of the fiscal year over two thousand dollars in merchandise, consisting of ready-made clothing, cassimeres, and other goods recently purchased for this department, must I think satisfactorily explain the cause of the increased expenses the past year.

As I stated in the commencement of this report, the financial results of the business of the prison during the nine months ending with this date, fall vastly short of my expectations. I found the

working force of the institution engaged almost exclusively in the manufacture of chairs, but with very little stock on hand suited to the work. Being apprised of the short supply of lumber on hand, and to avoid, as far as possible, any delay that might arise from that cause, I purchased, to be delivered the last week in December last, sufficient lumber for a temporary stock, and thus was enabled to furnish profitable employment for nearly all the men, immediately upon entering upon the discharge of my duty as commissioner.

At the time of the fire the shops were well systematized, and in very successful operation. The sales had increased from \$2,080.61 in January, to \$3,280.48 in February; \$4,148.96 in March, and \$8,262.80 in April. The sales of \$1,281.52 in May were mostly from goods manufactured in April, and were mainly in the railroad warehouse ready for shipment, when the fire occurred. I feel warranted in saying that had the fire not occurred, the sales up to this date would have been at the rate of fully fifty thousand dollars per annum. The entire sales, from all sources, for the nine months ending this day, amount to \$16,636.86.

. It required but little experience, to convince me that the practice adopted to some extent beretofore, of employing a traveling agent to sell the products of the workshops, on credit, throughout the adjoining States, was unwise, unless absolutely necessary to avoid a large accumulation of manufactured goods on hand. Hence I determined to find a market at the earliest possible moment, where I could sell for cash the goods manufactured, thus saving to the State the expense of a traveling agent, and avoiding any liability to loss on account of bad debts. About the first of March last I succeeded in making a contract with Messrs. Abernathy, Woods & Co., of Leavenworth, Kansas, for the sale of all the chairs I could make, more or less, for cash on delivery at the place of destination, for a period of one year from date of contract. I had delivered goods upon said contract about two months, when the fire occurred, during which time I shipped to them goods amounting in the aggregate to four thousand five hundred and ten dollars. For several reasons I regard this contract a favorable one. First, because the proceeds are cash on delivery. Second, because certain styles and kinds of chairs were fixed upon, and the treuble and delay caused by altering styles

to suit the varied tastes of enstomers, in different localities, was thus avoided, and the production thereby largely increased. Third, there was hardly a possibility of loss on account of bad debts. And last, but not least, the large expense required to support a traveling agent was thereby saved. I am happy to state that I can probably resume the contract with these parties for the belance of the year, or until March 1st, 1871, at which time I hope to renew it for another year on like favorable terms. I fully agree with my predecessor in the opinion that "no branch of manufacture could have been selected better adapted to the psculiur condition of this institution, than the manufacture of chairs. It is especially calculated to give profitable employment to all classes of prisoners, for even the mentally weak and short-termed, can now be made useful."

By tables Nos. I and 2 you will see that only seventeen per cent. of ell the inmates were mechanics at the time they entered the prison, hence the difficulty in furnishing profitable employment at any hand-work, or at any labor requiring expensive material.

I am gratified to know that steps are being taken to provide more ample means for the care and comfort of the insane persons of the State. Permit me to suggest that in the building of the asylum about to be commenced in Oshkosh, one ward, or so much thereof as may be necessary, he set apart and arranged for the care and safe keeping of the cristinal insane. There are now confined in this prison seven persons, who are more or less insane, and who cannot with the conveniences at our command, receive such care and treatment as would seem to be due these really unfortunate persons. As soon as; suitable accommodations can be furnished them elsewhere, I would recommend their removal at once.

The derangement caused by the fire, renders it difficult to give a full and minute statement of all the affairs of the prison at this time.

In estimating the value of improvements thus far made, I have included the whole walls of the building, although they are not yet fully completed. Between this time and the first of January next, the shops will be finished and the machinery in place and in operation. I will then furnish you a full statement of the value and cost of the improvements made to that date, and the amount of money

required to pay indebtedness and for current expenses for the ensuing year. I think, hewever, that to pay said indebtedness and ourrent expenses, and to make such improvements as will be necessary for the year 1871, it will require an appropriation of fully seventyfive thousand dollars. Among the improvements needed, in order to give ample room for the convenience of the working force of the institution, and for storage, is the extension of the shop to its original length, or 160 feet, in addition to what has been constructed during the present year. To accomplish this will require an outlay in cash of about ten thousand dellars. A large part of the cut stone necessary, will be prepared during the coming fall and winter, and but a small force will be required during the summer months to com plete the work. Besides, it can be done without materially lessen ing the income from the shops or adding to the amount required to pay officers' wages. The table showing the estimated value of labor and material for the new building is as complete as it is possible to make it at this time. In placing avalue upon the work, I have intended in all cases to fix it below what the same labor and material would cost for the same improvement made on private contract outside. My supplemental report will show the work all completed, with an itemized statement of value and cost. The system heretofore practiced of fixing and carrying along from year to year a certain value to the furniture, beds, bedding, &c., in commissioner's and other apartments of the institution, from which no revenue is derived, but which is rather an annual source of expense for repairs, &c., I deem to be entirely unnecessary, and tends to mislead the people as to the real value of this property: An outgoing commissioner may wish to leave as the fruits of his labor, a large amount and value of property in the institution, and in invoicing he may place a higher value upon many things than they are actually worth. His successor having the same commendable desire to leave the institution in as appar. ent good condition as he found it, sees no good reason why he should take a given article from his predecessor at one dollar and hand is over to his successor at fifty cents, although the latter sum by reason of natural wear and decay, may be as much or more than its real worth. Here a fictitious value is carried along from year

to year until the article is worn out. To preserve the uniformity of the practice, without disturbing the harmony. of the invoice, a new article is purchased and carried into the invoice, at the same value given a year or more before to one which was then perhaps nearly worthless. I have, therefore, adopted another and, I think better plan, of invicing all such property by enumeration with descriptive list, showing the quantity, and condition at the time of . taking inventory. The inventory of property from which I expect to derive a revenue is complete, and the value affixed is as low as the same property can be purchased in any market for cash. The average income from shops (aside from cabinet and chair shop) is somewhat increased over last year, showing a gain in the blacksmith shop of \$1,34.793, and in shoe-shop of \$1,444.83. As you will observe, there is no table showing the amount of work and income from the tailor shop. Following out the practice adopted heretofore of charging goods purchased for this department to account of merchandise, I am at this time unable to separate the articles purchased for this department, from those purchased for other departments of the institution. For my next annual report I will prepare a complete financial table, showing the exact cost of all goods purchased and value of products of the tailor shop for the current year. The value of work done for the State (including material) in the tailor shop, during the last nine months is \$4,600 45, and custom work to the amount of \$70.95. A full exhibit of cost of material compared with the value of finished work would, I think, show a net gain in this department of fully twenty-five hundred dollars for the nine months.

The value of permanent improvements thus far made on new building amounts in the aggregate to \$32,926.28, involving a cash outlay of about ten thousand dollars. The principal improvements yet to be made in the completion of the building, will require a much larger proportionate outlay in money. The cost of the iron roof will be about twelve thousand dollars; engine and boilers five thousand dollars; steam heating apparatus two thousand dollars; machinery, shafting, and belting about twelve thousand five hundred dollars.

For number of prisovers confined here during the past year, and for such other information as tends to give the affairs of the insti-

comprehensive tables prepared by the efficient prison clerk, Mr. D. B. Parkhurst. Great pains have been taken in the compiling of these tables, and the information imparted by them, I think, can not fail to interest the people of the State. The female prison is still under the supervision of Miss Harrington, as matron. The fact that only two females are confined within its walls at the present time, is a high compliment to the women of Wisconsin.

For information showing the number, and the percent. of productive and non-productive prisoners, I would refer you to statistical tables Nos. 1 and 2; and for the moral and religious condition of the prisoners, to the report of the chaplain, Rev. Henry Drew; and for the sanitary condition, to that of the physician, Dr. H. L. Butterfield; to both of whom I am indebted for kindness and courtesy in the discharge of their duties.

Permit me, in concluding, to tender may sincere thanks to my fellow State officers, for their sympathetic and encouraging words and acts, manifested in various ways after the fire; to my subordinate officers who have without exception, and upon all occasions, called to their aid in the discharge of their duty, so much of industry, kindness and cheerfulness as to make my own labors light, and the perplexities incident thereto, comparatively a pleasant past-time; and to the people of the State, who have, by their action, placed me in this honorable and responsible position.

Notwithstanding the accident happening so early in the first year of my term, yet I hope to be able to so conduct the affairs and business of the institution as to cause no regrets, on their part, for having placed me here.

Very respectfully submitted,

GEORGE F. WHEELER,

State Prison Commissioner.

^{*}A large amount of wood and lumber had to be moved after the fire.

Tables 1 and 2 are made up from the date of the incoming of the present administration, January 8d, to October 1st. During that period the average number of prisoners has been 195, and the number of working days 234, therefore the per cent. of table No. 1 is 19 59-100, and of table No. 2 is 20 40-100. During the same length of time there have been constantly employed, twelve men in the tailor, shoe and blacksmith shops, turning out State work (exclusive of the custom work) which shows another per cent. of 6 22-100, thus leaving but 53 79-100 per cent. of the 195 men from which an actual income is derived. At least one-tenth of the 53 79-100 per cent. are men broken down by dissipation and other causes, and if at liberty would be totally incapacitated to earn their food and clothing. Only 17 per cent. of the prison population were mechanics at the time they entered the prison.

GEO. F. WHEELER,

State Prison Commissioner.

STATE OF WISCONSIN-Dane County-88.

Geo. F. Wheeler, State Prison Commissioner, being duly swcrn, says, that the contents of the foregoing report by him subscribed, are just and true, according to the best of his knowledge and belief.

GEO. F. WHEELER,

State Prison Commissioner.

Subscribed and sword to before me, this 30th day of September, 1870.

T. W. GIBBS,

Notary Public,

Dane Co.. Wis.

CHAPLAIN'S REPORT.

In presenting my report for the year ending Scptember 30, 1870, it gives me great pleasure to say, that the past year has been one of deeper interest and greater prosperity, in the moral and religious department of the prison, than any previous year since my connection with the Institution. In the early part of the year, there was an unusual religious interest awakened amongst the prisoners, which has continued unabated up to the present time. year about fifty prisoners have professed a saving faith in Christ, a great proportion of whom, by a consistent christian deportment, give convincing evidence of the genuineness of their profession. Amongst them are several very prominent cases of consistent piety. We have organized a church of about sixty members, all of whom appear to be happy in their new relation, and rejoice in the prospect of a brighter future and higher destiny. We have, on the Sabbath, preaching at the usual hour, also two social meetings, where the prisoners manifest as deep an interest and conduct themselves with equal decorum, as is to be found in any outside congre-May we not anticipate the time when our penal institutions shall become moral hospitals, where christianity, as a good samaritan, shall achieve her mightiest victories.

The prison school is in a very flourishing condition, with a mem bership of fifty-five teachers and scholars, classified to wit: primer six, second reader 15, and the remainder in the third reader. There are also six studying the mental, and the remainder the practical arithmetic, in various stages of advancement. There are also one class each in grammar and arithmetic, both of which have been in progress but a few weeks. All of the scholars spend a portion of the school hours in writing, and are making fine progress. The number received into the school during the past year is sixty-one,

and about the same number discharged. Not a solitary breach of order occurred during the year, but every member conducted himself with strict decorum.

Prison schools are no longer an experiment, but have become a self-evident proposition, proving by their results their great utility both to the welfare of the scholars and the general discipline of the prison. It is with with pleasure that I am able to state that the permanent reformation of the offender is the prominent feature of this administration.

I am greatly indebted to our esteemed Commissioner, Hon. Geo. F. Wheeler, and his subordinate officers, for the favorable results which have crowned my efforts, both in the religious and educational departments of this institution.

HENRY DREW,
Chaplain.
